Whitco Makes It Easy and SAFE

To clean the outside of any casement window from the inside of the room.

There you have it—that eliminates the one drawback to casement windows from the woman's standpoint.

As the illustration shows, there is a space of $4\frac{1}{2}$ " between the sash and the jamb when the sash is open at a right angle to the window frame. Plenty of room to get at the outside surface for cleaning.

Whitco Hardware takes the place of both butts and adjusters. Not only does it make the sash self-adjusting, but it holds it in any position

desired. Wind cannot move it and it cannot rattle.

Whitco Hardware can be applied either to old or new sash as no special detail is required.

No special finish is needed as Whitco Hardware is entirely concealed when the sash is closed.

A set of Whitco Hardware consists of two pieces—one for the top and one for the bottom of the window. One size fits all sash. May be used either right or left hand.

Whitco Hardware is also ideal for transoms.

We shall be glad to send full information regarding Whitco Hardware on request.

NOTICE TO CONTRACTORS

Structural Steel—Alameda High School

Office of the Secretary of the Board of Education of the City of Alameda.

Sealed bids will be received by the Board of Education of the City of Alameda, and of the Alameda High School District, City Hall, Alameda, California, until the 26th day of August, 1925, at 8 o'clock p. m., at which time said bids will be opened for the erection and completion of the structural steel bracing of the gymnasium and auditorium of the new Alameda High School building, of the Alameda High School District, located on Central Avenue, between Oak and Walnut Streets, Alameda, California.

Plans and specifications for said work are on file at the office of the Superintendent of Construction for the Board of Education, City Hall, Alameda, California.

On a deposit of Twenty-five (\$25) Dollars, said plans and specifications may be had by any prospective bidder. These plans and specifications may be retained for seven (7) days.

If the plans and specifications are not returned to the Superintendent of Construction within the time above specified, or are returned in a mutilated or damaged condition, the deposit will be forfeited and will be immediately used for the purchase of a new set of blue prints and specifications.

Bids must be made on proposals obtained at the office of the Superintendent of Construction, and be signed by the bidder, accompanied by a certified check, certified to by some responsible bank or banker, and made payable to Wm. G. Faden, Secretary of the Board of Education and of the Alameda High School District, to be retained by said High School District as agreed and liquidated damages should the party or parties to whom the contract should be awarded fail to enter into the contract after the award, or to give bonds required for the faithful performance of the contract, or any bond required by law. The amount of said check shall be for at least ten (10%) per cent of the amount of the bid which bid shall be accompanied by an affidavit executed on a form that can be obtained from the Superintendent of Construction.

Bids will be opened by the Board of said District on the 26th day of August, 1925, at 8 o'clock a. m., in the Board Room of said City Hall, in said City of Alameda. The Board reserves the right to reject any and all bids or any or all items of such bids.

W. G. FADEN,
Secretary of the Board of Education and of the Alameda High School District of Alameda, California.

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock P. M., on September 8, 1925, at which time they will be publicly opened and read, for construction, in accordance with the specifications thereto, to which special reference is made, of portions of State Highway, as follows: Lassen County, between four miles west of Bieber and Bieber (11-Las-28-A), about three and eight-tenths (3.8) miles in length, to be graded and surfaced with screened gravel.

Orange County, between Laguna Beach and San Juan Creek (VII-Or-60-C), about seven and four-tenths (7.4) miles in length; to be graded and surfaced with crushed gravel or stone.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineers' offices are located at Willets, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank forms of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

HARVEY M. TOY,
LOUIS EVERDING,
N. T. EDWARDS,
California Highway Commission.
R. M. MORTON,
State Highway Engineer.

W. F. MIXON, Secretary.
Dated: August 10, 1925.

BIDS WANTED FOR HIGHWAY IMPROVEMENT

NOTICE TO CONTRACTORS

Sealed proposals will be received by the undersigned on August 20, 1925, for constructing portions of the State Highway System in Eureka and Lander Counties as follows:

(1) Bids received until and opened at 1:30 P. M., for grading, construction of culverts and placing a gravel surface between 14 miles west of Hay Ranch and Hay Ranch, in Eureka County, a total length of 13.83 miles.

(2) Bids received until and opened at 2:30 P. M., for grading and placing a cement concrete and gravel surface through Main Street, Battle Mountain, Lander County, a total length of 307 miles.

(3) Bids received until and opened at 3:30 P. M., for grading thru Richmond furnace slag dump, City of Eureka, Eureka County, a total of 145 miles.

Plans may be examined and form of proposal, contract and specifications secured in the office of the undersigned; may be examined also in the division offices at Elko, Reno and Las Vegas and the district office of the Bureau of Public Roads, Bay Building, San Francisco; also copy of Eureka County construction plans may be examined in the county clerk's office in Eureka and copy of Battle Mountain construction plans may be examined in the city clerk's office at Battle Mountain and county clerk's office at Austin. For each copy of plans, undersigned requires a deposit of fifteen dollars (\$15.00), which will be refunded upon return of plans in good condition within 30 days after opening of bids. Bids must be on proposal form of Highway Department and must be accompanied by a certified check in the amount of 5 per cent of bid.

Each bidder must accompany his bid with certificate from a surety company, duly authorized to do business in Nevada, stating that such surety company will provide said bidder with a bond in such sum as is required in and in accordance with the provisions of said specifications, conditioned for faithful performance of the contract and specifications.

Right is reserved to reject any or all bids.

GEO. W. BORDEN,
State Highway Engineer,
Carson City, Nevada.

NOTICE TO CONTRACTORS

(State Reclamation Board—Sutter County Project)

Sealed bids will be received up to 11 o'clock A. M., on Thursday, August

20, 1925, at Room 835, Forum Building, Sacramento, and then publicly opened by the Reclamation Board of the State of California, for the performance of the seven items of work as hereinafter specified, all of the work being on the Sutter By-Pass Project in Sutter County.

Each bid shall be for the performance of the entire work consisting of seven separate items, and shall be accompanied by a certified check in the amount of \$4,500.00, or by a bid bond in twice this amount. Right is reserved to reject any and all bids. Payment will be made in cash to the amount of \$12,500.00, and the balance of the bid price shall be payable in warrants drawn against Assessment No. 6 of the Sacramento and San Joaquin Drainage District.

Item 1. Excavation of channels in earth in the Tisdale By-pass, located in Section 25, T. 14 N., R. 1 E., approximately 35,000 cubic yards.

Item 2. Construction of a tree dam or barrier in a slough channel in Section 25, T. 14 N., R. 1 E., to consist of approximately 100 entire cottonwood or willow trees of a trunk diameter of 15 inches or more, and properly anchored into place.

Item 3. Repairs to two steel retards in the North borrow pit of the Tisdale By-pass, consisting of additional anchorage, log crib work, timber bulkhead and approximately 600 yards of earthwork.

Item 4. Extension and repairs on two timber retards in the south borrow pit of the Tisdale By-pass, consisting of about 700 cubic yards of earthwork, 750 lineal feet of round piles, 13,000 B. M. of timber, and a small amount of concrete.

Item 5. Construction of a pile and timber breakwater in Section 27, T. 14 N., R. 2 E.; length 1377 feet, consisting of a 3-inch timber bulkhead, supported by round piles, requiring approximately 110,000 B. M. of pine lumber, and 5800 lineal feet of round piling.

Item 6. Construction of a pile and timber bulkhead and an earth fill behind same, on the east Levee of the Sutter By-pass, about 2½ miles west of Sutter City, in Section 14, T. 15 N., R. 1 E., containing approximately 2500 lineal feet of round piles, 42,000 B. M. of pine lumber, and 6600 cubic yards of earth.

Item 7. Remodel pumping plant No. 3, located in Section 29, T. 15 N., R. 2 E., to consist of the construction of a concrete pump and motor foundation (concrete material at site), the installation thereon of the pump and motor and the proper housing of the equipment and switchboard.

For additional information, and specifications, apply to the Reclamation Board.

THE RECLAMATION BOARD,
By F. R. PIERCE,
Assistant Secretary.

A Variety of Work on the Same Machine

In addition to business correspondence the modern office has a large variety of work for the typewriter.

Tabulating, billing (simple and condensed) stenographic cutting, writing on ruled forms and many other kinds of office work can all be done on the L. C. Smith & Bros. typewriter.

The decimal tabulator and the variable line spacer are part of the inbuilt service of every L. C. Smith & Bros. machine.

2 O'CLOCK IN THE MORNIN'

"Dinnis," said Mrs. O'Halligan, with
her hands on her broad hips, "It was
2 o'clock the followin' mornin' when
ye came home the next night. And it
was half-past 2 the next mornin', when
ye came last night. But I'm a-tellin' ye
—if it's 2 o'clock in the mornin' when
ye come home tonight, or any other
night the next mornin', I'll be damned
if you won't have to get up and let
y'erself in."—Tit-Bits.

A "GENTLEMAN" DEFINED

A man who is clean, both outside
and inside; who neither looks up to
the rich nor down to the poor; who can
lose without squealing and win with-
out bragging; who is considerate to
women, children and old people; who
is too brave to lie, too generous to
cheat, and who takes his share of the
world and lets other people have theirs.
—Anonymous.

KOEHRING DANDIE

Light Mixer

**Four-cylinder
Gasoline
Engine**

FAST! Fast! Fast! Here is a light mixer with a speedy charging skip, liberal drum dimensions and a high speed discharge that will break all your records of putting concrete where it pays you profits!

Just the balanced light weight to haul behind your truck on its rubber tired disc wheels and get from job to job in a big hurry.

Four cylinder, radiator cooled, gasoline engine. Transmission from engine to drum enclosed in oil bath! Double gear drum drive, chilled, beveled gears! Drum rollers fixed to shafts revolving in big bearings!

It's useless to try to give you the smallest idea of what this Dandie represents in superior speed and construction details — but it's *strong, rugged* — it will stand-up for all the punishment you can give it, and *work and work, and work!*

And you have a chance to buy at a price that gives you all the benefit of the economies the Koehring Company effect by big, standardized production! If you had half an idea of what this mixer means in the way of actual value, you would send back the coupon for full detail by next mail!

Koehring Dandie — 7 cu. ft. capacity mixed concrete. High speed charging skip, or low charging hopper with hinged steel framed platform which may be folded against mixer for hauling. Discharged from either side of mixer.

4 cylinder gas engine, radiator cooled, or optional two cylinder engine, hopper cooled. Drum drive transmission in oil bath. Maybe equipped with *automatic water measuring tank*, and *Light Duty Hoist*.

**Send Back this
Coupon!**

OVER-PRODUCTION OF BUILDING NEAR SAYS LABOR DEPT.

The building boom which has been striving for three years to overcome the housing shortage which the war left throughout the country, has not only succeeded in doing this, the department of labor believes, but has now verged to the point of over-production and depression.

Results of a survey just concluded by Ethelbert Stewart, commissioner of labor statistics, were announced as showing that building construction in 1924 not only made up the slight lag at the end of 1923, but went ahead of demand.

The conclusions were based on building permit reports from 130 cities of 100,000 or more population and with the year 1924 forming the index of normal requirements. Population increases were taken into account in figuring the changing relation of housing supply and demand throughout the succeeding ten years.

Reduced to cost estimate, building was figured to be about four-tenth of a year ahead of demand at the close of 1924, whereas at the end of 1923 it was a quarter of a year behind the actual needs.

Huge Irrigation Project For State to Cost \$1,500,000,000

Actual work on the comprehensive plan undertaken by the state to conserve all the irrigation waters of California in a vast project capable of irrigating more than 18,000,000 acres has been resumed by field parties operating under the direction of the division of engineering and irrigation.

Resumption of the work was made possible by an appropriation of \$150,000, approved by the last Legislature, which is now available.

The project proposes the maximum conservation of every drop of water in the state and the irrigation of every available acre by a connected system of reservoirs, locks and dams extending the length of the state.

Tentative estimates place the cost at a figure near \$1,500,000,000. The division hopes to be able, within the next two years, to submit a definite plan of financing it.

Topographic Surveys

Topographic surveys have been started in the vicinity of Tulare lake in Tulare county by a field party headed by Engineer Percy L. Jones. The division now is organizing other parties. More than 40 engineers with scores of rodmen, chainmen and auxiliary helpers will be employed, according to Paul Bailey, assistant state engineer.

Most of the appropriation probably will be spent in the San Joaquin valley in the development of more engineering data on reservoir sites. The definite program will not be worked out, however, until a meeting of consultants, advising with the division on the plan, has been held.

First Unit

The advisers are A. J. Cleary, G. A. Elliott, F. C. Herrmann, W. L. Huber and A. Kempkey, engineers of San Francisco; E. A. Etcheverry of the University of California and William Mulholland of Los Angeles. More will be added to the list as the work progresses.

The physical detail for constructing the first unit of the comprehensive plan was worked out in a report submitted to the last Legislature. This report presented steps necessary for relieving Tulare county in its receding

ground water plan. The studies revealed this could be done only through co-ordinating the development and use of water in both the Sacramento and San Joaquin valleys.

It was also shown that other areas in the San Joaquin valley are approaching conditions similar to those in Tulare county. For this reason a large amount of additional work on the floor of the Valley will be necessary.

Five Sites Chosen

Five major reservoir sites on rivers running into the San Joaquin valley have been selected tentatively. These are the Melones on the Stanislaus, the Don Pedro on the Tuolumne, the Exchequer on the Merced, the Friant on the upper San Joaquin and the Pine Flat on the Kings. The Isabella site on the Kern river near Bakersfield previously was selected, but a change is likely.

The largest of all proposed reservoirs in the comprehensive plan is the Kennet, located in the Sacramento river canyon north of Redding. This would impound surplus waters of the Sacramento and Pitt rivers and would be the starting point of an intricate distributing system of canals threading both sides of the great Sacramento valley.

The Oroville reservoir is proposed on the Feather river, the Narrows reservoir on the Yuba and the Folsom reservoir on the American.

The most daring portion of the plan is the proposal to construct a huge barrier at the mouth of the Sacramento river, at which point water literally would be "borrowed" to supply the Napa, Sonoma and Santa Clara valleys and be "boosted" up the channel of the San Joaquin river by a system of locks, dams and pumping stations. The San Joaquin would thus be in the position of a river running backwards.

Southern California's problem has not been worked out thoroughly. The tentative plan is to conserve the present run off by reservoirs and underground storage and tap the Colorado river for the balance needed.

Counties along the coast line would be cared for by a system providing conservation of local waters.

SPANISH ARCHITECTURE FOR S. B. BUILDINGS

Seventy-three State street buildings demolished by the Santa Barbara earthquake of June 29 are to be rebuilt along lines of Spanish or Santa Barbara architecture, according to Bernhard Hoffman of the city architectural board of review.

Plans for these 73 buildings have been approved but there are more than a hundred waiting action. So far the owners of only one State street building, the First National Bank, have chosen other than prevailing architecture. According to Seth Keeney, president, the bank will be rebuilt from "United States" architectural plans.

HARBOR SURVEY PROPOSED

Plans to secure a survey of the proposed harbor at Redwood City were outlined at a meeting in Redwood City attended by Directors of the Chamber of Commerce, the city trustees and civic organizations. It is proposed to raise funds to finance the employment of a harbor engineer to compile a report for submission to the War Department district engineers. Already \$1000 has been secured to finance the employment of an engineer. E. B. Hinman, president of the Redwood City Chamber of Commerce, presiding at the meeting, appointed Albert Mansfield, city attorney of Redwood City and City Engineer C. L. Dimmitt to select an engineer.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

State Controller Ray L. Riley has been warned to hold up vouchers on the appropriation of \$300,000 for the improvement of the State buildings and grounds at Sacramento in a legal opinion issued by Robert W. Harrison, chief deputy State Attorney-General. Harrison declared that the inclusion of a clause providing that part of the appropriation be used for "rearrangement of the State Capitol building" placed the entire act in peril of being invalid. The clause appears only in the body of the act and not in the title. The result of this opinion will be the cessation of work on the new State building in Sacramento.

The Common Brick Manufacturers' Association of America denies the report of a Middle West architectural journal in which it was stated that the Industrial Commission of the State of Wisconsin had prohibited the use of ideal wall throughout that state. It was also reported that the state building officials of Ohio had taken similar action. Investigation, the association says, shows the reports entirely without foundation.

Dissolution of Alameda's city planning commission is imminent following protests brought before the city council alleging that the commission does not take its work seriously and that it repeatedly fails to assemble in quorum. The most recent protest is the result of the commission's failure to rather in quorum to hear a petition for re-classification to permit the erection of St. Barnabas Catholic Church at Van Buren and High Streets.

Restrictions should be placed on the height of downtown buildings, if Oakland is to avoid the congestion resulting from a population of 1,000,000 ten years hence, Dr. Carol Aronovici, city planning expert, told members of the Oakland Mutual Business Club at a recent luncheon meeting. Tall buildings may benefit the owners but they are of no benefit to the city, he declared.

Frank Town, of New York, representing Eastern capital, has been granted a franchise by the San Mateo county supervisors to construct a bridge over San Francisco Bay between Little Coyote Point, San Mateo county to a point near Hayward, Alameda county. The structure will cost between \$10,000,000 and \$12,000,000. Construction will extend over a period of approximately three years.

The Central Pacific Railway has applied to the Interstate Commerce Commission for authority to construct a new line to be known as the "Black Butte" cutoff between Weed and Grassland, California, extending twenty-three and three-fourths miles. The new line would connect with the Klamath Falls branch.

A total of 349,774,000 ft. of lumber from Oregon and Washington was received at San Francisco during the first half of 1925 and 66,868,000 ft. from California sources. A total of 71,400,000 ft. was received by rail.

The Southern Pacific's new tunnel, the third longest railroad tunnel in America, was "holed through" at 8:15 on the night of Aug. 17, completing construction through 10,322 feet of solid granite under the summit of the Sierra Nevada. The new tunnel is one of seven between Emigrant Gap and Andover in the double tracking program of the railroad. Its elevation is 6835 feet, which is 132.6 feet lower than the existing line. When the bore is completed it will give 6000 feet of level grade at the summit eliminating the use of helper engines. It will be used for eastbound trains exclusively. The Hoosac tunnel, 23,175 feet long, and the Cascade tunnel, 13,413 feet long, are the only two tunnels of greater length in the United States.

Neil Carmichael, one of the founders of the Hubbard and Carmichael Bros. Company of San Jose, died at his home in Saratoga, August 17, following a brief illness. A native of Canada, Carmichael learned the lumber business there while a young man. In 1881 he came to California to join his brother, Daniel Carmichael, who had been in the logging and sawmill business in Santa Clara county since 1874. The two brothers operated several mills for a number of years, and then, together with Thomas Hubbard, formed a partnership to manufacture lumber.

Adoption of the Louis Christian Mullgardt report, proposing a plan to facilitate transportation between San Francisco and its peninsula neighbors, has been announced by the South San Francisco Chamber of Commerce. Copies of the report have now been placed in the hands of each peninsula municipality and civic organization, as well as the city of San Francisco, the Market Street Railway Company, and the Southern Pacific Company.

Although he realizes that it might be economy to erect public buildings and thus avoid payment of rent, President Coolidge does not look with favor on suggestions for a bond issue for construction of government buildings in Washington and elsewhere. At White Court it was reiterated that Coolidge is seeking to reduce the bonded indebtedness of the government.

R. C. Flamm of Oakland has filed application with the Carmel city trustees for the position of city manager. Others who have filed include Mrs. Fred Wermuth, wife of a Carmel expressman and A. P. Fraser of Carmel, who has handled assessments for the city. Receipt of applications closes August 24.

A petition in voluntary bankruptcy has been filed by Ashley Smith, Oakland contractor and builder. He lists his liabilities at \$30,336 and assets at \$8,312.63.

Citizens' Lumber Company at Selma, Aug. 13, suffered a \$75,000 loss. Spontaneous combustion and defecting wiring are advanced as possible causes.

ALONG THE LINE

H. A. Van Norman has been recalled by the Los Angeles water and power commission at the request of William Mulholland, manager and chief engineer of the water bureau, and will take the post of assistant manager at a salary of \$12,000 a year. When Mr. Van Norman was drafted from the water bureau by the city to supervise the construction of the new Los Angeles outfall sewers under the \$12,000,000 bond issue it was understood that he would return to the water bureau whenever his services were needed. When the major portion of the work on the outfall sewer had been completed Mr. Van Norman was made city engineer, and during the short period which he held that post he reorganized the city engineering department. He expects to be in his new post by Sept. 1.

Gustave Stahlberg, San Francisco architect, was instantly killed in an automobile accident when his machine traveling at a high rate of speed overturned on the highway two miles south of Novato, Marin County. Joseph Callaghan, a civil engineer connected with the Bureau of Engineering of the San Francisco Department of Public Works, who accompanied Stahlberg, with three others, suffered internal injuries and severe cuts and bruises. Stahlberg was pinned beneath the machine and instantly killed. His neck was broken and his skull fractured.

Western Appraisal Company of San Francisco and Los Angeles has been formed with the following board of directors: R. A. Thompson and H. G. Butler, consulting engineers, San Francisco; Arthur T. Kelley, consulting engineer, Los Angeles, and G. R. Kenny, Los Angeles, general manager.

Anson Boyd has been appointed to have charge of the architectural department of the Los Angeles Board of Education. Mr. Boyd was with Meyer & Holler, Los Angeles builders, for three years previous to accepting the position and comes originally from New York City.

Bids will be asked at once by the city of Stockton to construct a bascule-type bridge over Mormon Channel at Washington street, in that city. The structure will cost approximately \$140,000, according to W. B. Hogan, city engineer.

G. A. Peverill, designer and builder, operating for fifteen years in Southern California, has located in Santa Cruz, maintaining quarters at 56 Poplar Ave. In addition to other structures, he will specialize in home building construction.

J. J. Jessup, town engineer of San Anselmo, has resigned and H. E. C. Fusier, appointed to fill the vacancy.

ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

SACRAMENTO BUILDING EXHIBIT UNDER OLD MANAGEMENT

Mrs. J. E. Smith of Los Angeles, formerly Geneva Watson of Sacramento, is again in charge of the Sacramento Building Exhibit on Ninth Street, succeeding D. G. Nunneley, who has managed the place for the past eight months.

Mrs. Smith inaugurated the building exhibit in Sacramento three years ago, having secured the idea from a like institution in the south. From the start it has been successful, and has been the means of showing hundreds of people the latest in home development and building.

Mrs. Smith announces she has many new firms interested in the exhibit, and expects to double the present capacity of fixtures.

CHINA CLAY RATE CUTS ARE PROPOSED BY BUREAU

Protestation against the proposed reduction of rate on the transportation of English china clay from New York and other eastern ports to interior points was lodged by the mining bureau of the Sacramento chamber of commerce in a letter addressed to the interstate commerce commission in Washington. The protest is made on the ground that it is an unjust discrimination against china clay producers in the United States.

The letter asserts that in California there are large deposits of high grade clay, many of them china clay, which efforts are being made to develop, so as to supply plants in the interior as well as in California.

If this reduction takes place, the bureau declares, it will be impossible to compete against this imported English clay.

HIGHWAY INITIATIVE MEASURE PROPONENTS TO MEET

Proponents of a highway initiative measure which has been drawn up by Assemblyman Robert E. McPherson of Vallejo will hold their next meeting in the State Capitol, Sacramento, on August 29th to consider the appointment of committees, the allocation of roads in Superior California and other work necessary to complete the initiative.

Similar meetings will be held later in the southern part of the state. Plans for raising \$20,000,000 to be used for the construction of new highways in California are outlined in the proposal which is designed to be submitted to the voters in 1926.

Most of the roads to be included in the initiative are already in the state system, but some additional ones are to be added.

HOLD BANQUET MEET

The Retail Lumber Dealers' Association of Santa Cruz held a banquet meeting, August 11 at the Twin Lakes Hotel, with a program in charge of George W. Wood and Frank Dean. There was community singing and musical numbers.

East Bay Plumbers Name Committees

W. H. Picard has assumed his post as president of the Master Plumbers' Association of Alameda County. Other officers chosen were:

Carl T. Doell, vice-president; J. B. Morse, secretary; V. A. Edgeworth, business manager; A. H. McKown, treasurer, and P. H. Blake, sergeant-at-arms.

President Picard has appointed the following committees to serve for the ensuing year:

EXECUTIVE BOARD—Carl T. Doell, chairman; Wm. J. Bays, V. L. Aikins, D. W. Durant, J. H. Jevons, J. B. Morse, John Rankin, H. P. Sheridan and R. I. Quinn.

BAY COUNTIES CONFERENCE BOARD—H. G. Newman, chairman; L. W. Blake and L. J. Kruse.

AUDITING—J. H. Jevons, chairman; Walter Grey, Max H. Finzel and N. J. Previali.

SICK—J. B. Morse, chairman; C. W. Knights, Kenneth MacDonald and Chas. Smith.

ENTERTAINMENT AND LADIES—

Max H. Finzel, chairman; Chas. Diefenbacher, F. M. Cooke, D. W. Durant, N. J. Previali and B. T. Schullerts.

EXAMINING BOARD—A. H. McKown and Robert Annis.

ORDINANCE—L. W. Blake, chairman; H. G. Newman, Robert Annis, J. A. Freitas and Charles Smith.

WHOLESALE—Carl T. Doell, chairman; L. J. Kruse and H. G. Newman.

EDUCATIONAL—George Stoddard, chairman; W. H. Graham and L. J. Kruse.

LEGISLATIVE—W. H. Graham.

APPRENTICESHIP—E. J. Sullivan, chairman; W. H. Nice and E. R. Mylchreest.

PLUMBING DAY—L. W. Blake, chairman; H. I. Kyle, Max H. Finzel, Frank M. Cooke, H. P. Murphy and J. A. Freitas.

CONFERENCE BOARD M. P. ASSN.—John Rankin, chairman; L. J. Madden and R. I. Quinn.

MUTUAL BENEFIT—J. B. Morse, chairman; Arthur Johnson and H. P. Murphy.

BETTER RELATIONS—D. W. Durant, chairman; J. H. Jevons and H. P. Sheridan.

Organized Labor Will Build Co-operative Apartments in N. Y.

Organized labor has terminated a campaign for the erection of a co-operative home for its own members, with the announcement that the Prudential Insurance Company of America had approved a loan of \$550,000 to the Labor Home Building Corporation, to aid in the financing of a five-story apartment building, accommodating 242 families and covering an entire city block in the Bronx, New York.

These homes will be models in every sense. There will be a large court so that the rooms will be airy and the structural work will be of steel and brick, with exterior trimmings of stone or terra cotta. It is estimated by those responsible for the project that carrying charges, including amortization, will be only about \$14 per room per month.

The Labor Home Building Corporation is backed by the International Ladies Garment Workers Union, the International Fur Workers Union, the United Cloth Hat and Cap Makers Union and the Pocketbook and Leather Goods Workers Union.

The new apartments will consist of

seven units and each will hold its quota of 3, 4 and 5-room apartments. In addition to the apartments there will be a large court garden and recreation space and gymnasium for the tenants, as well as an auditorium in which meetings may be conveniently held. The ground floor will contain 10 or 12 stores.

During the construction of the model apartments the Labor Home Building Corporation will do all the financing, but immediately upon completion the buildings will be turned over to the Union Workers Building Association, which will be composed entirely of tenant owners. This latter organization will supervise the management of the building and administer all further funds.

The cost of the project is estimated at approximately \$1,500,000. The land acquired by the unions is valued by realty authorities at approximately \$175,000, the remainder of the total cost representing the grading and erecting of the buildings and incidental fees to architects and others.

CONTRACTORS ELECT SECRETARY

E. G. Lloyd has been elected secretary manager of the Contractors' Association of Northern California. He has been executive secretary of the association for the last four years. Necessity for financial retrenchment caused the association to decide not to employ an engineer during the coming year. F. G. Simmons held the position of engineer and also manager during the last year.

BRICK ORDERS STRONG

Reports of the current month from members of The Common Brick Manufacturers' Association show that the orders on books are more than 200 per cent of the amount of brick moved during the preceding month. This is the highest ratio between orders and shipments reached during the year.

Prices remain stable. Practically the only plants idle throughout the country are those shut down for necessary repairs.

METHOD TO MEASURE STRAINS IN CONCRETE STRUCTURES

Some time ago the Bureau of Standards, Department of Commerce, brought out what is known as an "electric teller" for measuring changes in the length of structural members produced by variations in the load upon the structure. The operation of the teller depends upon the variations in resistance to the passage of an electric current of a stack of carbon disks. This is the same principle as that employed in the microphone in the transmitter (the part we talk into) of the telephone. There is, therefore, nothing new in the principle employed, but the Bureau was the first to apply this principle to a precision measuring instrument.

Recently a new use has been found for this device in the measurement of the strains in mass concrete. For this purpose a special cartridge has been designed which houses the stack of carbon disks, and which is embedded in the concrete at the point where the measurement is to be made. Wire leads extend to the surface and are carried to some convenient point where the indicating instruments are placed. These instruments are calibrated to show any deformation in the concrete due to loading.

The instrument will shortly be used in an investigation which is to be carried out by a special committee sponsored by the Engineering Foundation on a dam to be erected at Fresno, California.

BUILDING HOOM TO LAST TEN YEARS IS PREDICTED

While the building shortage is gradually being met, it will be a decade before the industry become full, according to Robert Beck, president of the Longacre Engineering & Construction Co., New York, erectors of office buildings, apartments and theatres in New York, Chicago, Washington, Detroit and other cities. He said:

"It is true the greatest call still is for one-family residences and the weakest demand for business structures, but numerous transfers and the large sales of lots in most cities indicate there will be considerable volume of building in sight for months.

"Trends of today, as indicated by the frequent announcement of tall office buildings with large single floor areas, will continue to be in the direction of the concentration of companies on single floors instead of on many small floors."

L. A. BUILDING STEADY

Los Angeles' building operations hold a steady pace. Up to and including the 11th, the city building department issued during August 1248 permits with an estimated valuation of \$4,029,753. This is less than for the corresponding period of July, during which 1366 permits with an estimated valuation of \$4,474,223 were issued, but is greater than for the first 11 days of August, 1924, during which 1288 permits with an estimated valuation of \$2,778,769 were issued. For the current year up to and including August 11, Los Angeles' building total was \$98,501,104, as compared with \$94,267,289 for the corresponding period last year. There has been no material change in the building situation. A larger volume of work is under way now than earlier in the year, but there is no shortage of labor and materials can be had for prompt delivery. Prices generally appear to be stabilized for some time.

Hoover Appoints Committee to Standardize Mechanics' Lien Law

The appointment by Secretary of Commerce Herbert Hoover of twelve qualified men as a committee to draft a standard State mechanic's lien act is announced in a statement issued by the Department of Commerce. At the request of several national organizations, the Department has undertaken to prepare an act suitable for adoption in the different States.

Mechanic's lien laws provide that contractors, sub-contractors, mechanics, laborers, architects, material men, and others who have contributed toward the construction of a building may obtain a lien on the property if they are not paid for their services within a reasonable time. The owner of the property then has to pay promptly or allow his property to be sold by the court to settle the claims. One class of cases where lien laws play an important part arises when an irresponsible contractor defaults or goes into bankruptcy, leaving obligations due to workers, material men and sub-contractors. Under the provisions of a lien law these creditors may obtain payment from the owner of the property on which the work was performed.

The State laws vary greatly and therefore cause confusion and expense to organizations doing business in several States, and to workers who move from one State to another. Dissatisfaction has been aroused in a number of States by laws whose provisions are said to be unfair to one or more of the different groups concerned, or to be difficult to construe.

In order to frame an act which will be as fair as possible to all the different groups it was felt that they should be represented in deciding on the general principles to be embodied in the act and that the best possible legal advice should be obtained in connection with phrasing it. The committee that Secretary Hoover has brought together accordingly includes

representatives of the principal groups including some whose interests are those of the owner.

When a preliminary draft of the act is completed, it will be sent for criticism and suggestions to interested organizations and individuals, including a special new committee of the National Conference of Commissioners on Uniform State Laws of which Mr. Charles V. Imlay, a member of the Hoover committee, is chairman.

The committee has held two meetings, but in view of the large amount of work required to draft such a model law, involving an extensive study of existing statutes and court decisions in regard to them, no date has been announced for completion of the preliminary draft.

The committee's membership is as follows: F. Highlands Burns, Baltimore, Md., Pres., Maryland Casualty Co.; William F. Chew, Baltimore, Md., Ex-Pres., National Association of Builders' Exchanges; John M. Gries, Washington, D. C., chief, Division of Building and Housing, Department of Commerce; George F. Hedrick, Washington, D. C., Pres., Building Trades Council, American Federation of Labor; Charles O. C. Hennessy, New York City, N. Y., Chairman, Legislative Committee, N. Y. State Savings & Loan Assn. League; Charles V. Imlay, Washington, D. C., National Conference of Commissioners on Uniform State Laws; William E. King, Washington, D. C., Counsel, National Association of Builders' Exchanges; Victor Mindeff, Washington, D. C., American Institute of Architects; Charles H. Paul, Dayton, Ohio, American Engineering Council; Frank Day Smith, Detroit, Mich., National Retail Lumber Dealers' Association; Leonard C. Wason, Boston, Mass., Associated General Contractors; John L. Weaver, Washington, D. C., Ex-Pres., National Association of Real Estate Boards; Dan H. Wheeler, Secretary.

West Coast Porcelain Company Consolidates with L. A. Concern

Announcement is made of the consolidation of the West Coast Porcelain Manufacturers of Millbrae, Calif., with the Washington Iron Works of Los Angeles. According to G. E. Schneider, general manager of the latter concern, the merger will give it the most complete line of plumbing fixtures made on the Pacific coast. The line of vitreous chinaware made by the West Coast Porcelain Manufacturers includes toilets, lavatories, urinals, etc., while the Los Angeles plant produces porcelain enameled bath tubs, lavatories, urinals, sinks and laundry trays. The seven-acre factory of the West Coast concern at Millbrae is said to be one of the best equipped on the coast for the manufacture of vitreous china fixtures. As a result of the merger its products will now be marketed in southern California under the brand name of the Washington Iron Works, pioneer Pacific coast manufacturers of porcelain enameled fixtures.

"The first and most important effect of the consolidation is the extension of the Washington guarantee to include vitreous china fixtures," Schneider

declared. "Effective immediately, we give the same guarantee on vitreous china fixtures as we do on porcelain enameled fixtures. This guarantee, signed by both the Washington Iron Works and the plumbing merchant, agrees to replace free of charge any Washington fixture which develops any defect after installation. Plumbing merchants throughout southern California are able to supply these guaranteed fixtures immediately."

The capacity of the two plants is more than 1700 fixtures daily, it was announced, and over 750 men are employed. The two factories, which cover 10½ acres, consume over 200,000 pounds of raw materials daily. In volume and value of output these consolidated plants form one of the leading manufacturing organizations on the Pacific coast. Hundreds of thousands of dollars worth of materials used in the manufacturing processes are bought locally, and all the fixtures produced are installed in Pacific coast homes and buildings, with a considerable volume of shipments to Honolulu, South America, and the Orient.

TRADE NOTES

Owing to the confusion that has been created in the minds of customers and to eliminate any doubt as to its identity, the National Lumber Company of Alameda, recently incorporated, to change its name. The concern will hereafter be known as the Federal Lumber Company with headquarters at 2313 Blanding Avenue, Alameda. The announcement is made by H. L. Massey, manager for the company.

The Hayward Building Material Company is occupying its new plant at Mt. Eden road and the Western Pacific tracks, Hayward. The plant includes bunkers for the storage and distribution of crushed rock, sand and gravel, a warehouse and office building. A belt conveyor system for the direct unloading of cars is a feature of the plant equipment.

Eureka Mill and Lumber Company, now located at 3615 East Fourteenth Street, Oakland, has purchased a three acre site at East Fourteenth Street and Fifty-eighth Avenue, Oakland, on which the company plans to expend \$250,000 in establishment of a new plant.

Albert DeShields has retired from the firm of Axford and DeShields, doing a general foundry and manufacturer's hardware business in San Jose, and the business will be continued by H. W. Axford who assumes all liabilities. Quarters are maintained at University and Chestnut Avenue, College Park, San Jose.

The Sierra Lime and Mineral Company of Sacramento has been incorporated with a capital stock of \$25,000. Directors of the company are: Allen F. Grant, Malcolm K. Grant, J. F. Dunsky, Charles J. Eastman and S. Hornstein, all of Sacramento.

The Tynan Lumber Co. of Salinas has sold its branch yard at Gonzales, Calif., to the South Milling Company. The latter concern already has yards at Soledad and King City. James Barry will have charge of the yard at Gonzales.

Gladding, McBean and Co. announces the removal of warehouse quarters from 147-51 Minna Street to 1255 Harrison Street, between Eighth and Ninth Streets, San Francisco. General offices of the company, however, will remain at 660 Market Street, San Francisco.

The Fuller Lumber Company of Lodi has been taken over by the United Lumber Yard Co. of Modesto and Sacramento with headquarters in the former city. The sale includes yard and planing mill.

Norman Taylor, 118 Stanley Road, Burlingame, will operate in the Peninsula district under the trade name of General Sheet Metal Works and Retail Shop with headquarters at 400 Linden Ave., South San Francisco.

R. B. Bunker has been appointed East Bay representative for Cannon & Company, brick manufacturers. And will maintain office at 354 Hobart St., Builders' Exchange Bldg., Oakland.

Anderson Planing Mill, located in lock bounded by N and O, 19th and 20th Streets, Sacramento, suffered a \$25,000 fire loss August 16.

Seventy Electric Utilities Operating in State of California

In a report compiled by Mr. L. S. Ready, Chief Engineer of the California Railroad Commission at the request of Mr. P. S. Clapp, assistant to Herbert Hoover, the report being for use at Stanford University, interesting statistics, showing the extent of the operations of the electric utilities operating in California, have been assembled. The report shows that as of December 31, 1923, there were a total of 70 electric utilities operating in California. In addition there are a number of municipally owned electric systems, but as these are not subject to the Commission's jurisdiction and do not report to the Commission, they are not included in Engineer Ready's figures, as the 12 largest electric utilities in California handle approximately 97 per cent of the electric utility business in

the state, their reports to the Commission are used as the basis for the estimates made.

According to Chief Engineer Ready's figures the approximate rate base, in 1922, for the 12 largest utilities totaled \$334,000,000; in 1923, \$374,000,000; and in 1924, \$445,000,000. The total rate base for all utilities, engaged in the electric business for the same years was respectively \$242,000,000, \$384,000,000 and \$455,000,000.

The following table shows the gross electric revenue for all electric utilities for the years 1922, 1923, and 1924. This table also shows the revenue from sales to other California utilities and the gross revenue exclusive of the latter. This represents the electric revenue received from the sale of electric energy to the public, including sales to municipally owned systems

	1922	1923	1924
Gross revenue electric operations.....	\$73,714,093	\$75,541,683	\$86,076,530
Revenue sales to other California electric utilities	5,685,669	4,312,872	4,717,790
Gross revenue of California electric utilities less sales to other electric utilities in California	68,028,424	71,228,811	78,480,596
Taxes of electric utilities for electric properties	6,600,000	7,360,000	7,200,000
Interest and dividends of public utilities operating electric utility service	30,941,244	33,999,852	39,243,541
Surplus earned	3,447,824	1,304,074	2,857,046*
*Decrease.			

The following is from the report: "The table sets forth the item of taxes, chargeable to electric operations. The total payment of taxes reported for the 12 largest utilities was determined. The revenue of these utilities was 97 per cent of the total revenue from electric utilities and as the main part of taxes is determined as a percentage of gross revenue, the taxes for the entire utilities have been estimated at one hundred ninety-seventh's of that for the twelve companies. The taxes estimated are those chargeable to electric utility operations, although several of the utilities supply other service.

"A number of the electric utilities supply other utility service such as gas and water service and it is, therefore, impossible to set forth the interest and dividends applicable to the electric operations. The total set forth in the table under this heading, represents the interest and dividends paid by the utilities serving electricity, although the payments cover interest and dividend payments on securities representing other properties. The 12 largest electric utilities had a gross electric revenue in 1923, exclusive of sales to other California utilities, of \$70,890,000. These same utilities had a gross revenue from the sale of gas of \$29,150,000, and from the sale of water of \$968,000. The net revenue from these two utility services for the year 1923 available after operating expenses, taxes and depreciation, totalled approximately \$11,200,000. Revenue was also received from railroad and steam-heat utility service. For the 12 utilities

in question a rough approximation of the reasonable investment in other utility service for 1923 would be \$100,000,000.

"It should also be noted that the amount shown for interest and dividends and also surplus covers certain limited non-utility operations.

"The figures show the approximate rate base for the 12 largest utilities for the three years in question. The Commission has not determined, according to Chief Engineer Ready, the rate base for each of the years for the several utilities, but as to the 12 utilities, rate determinations have been made during the last three or four years and the totals shown have been obtained by adjusting the rate bases for the individual companies by the additions and betterments to the properties. The amounts given closely approximate what would probably be determined by the Commission had it fixed the rates for the utilities during each of the years.

"The Commission," continues Ready, "in determining rates, has generally used as the rate base the reasonable historical cost of the property used and useful in the service of the public. In more detail this may be defined as the reasonable cost or investment in structural properties and equipments of the property, plus the present market value of lands and plus the value of material and supplies and working capital necessary for the operation of the properties. The rate base is determined for the average for each year."

MEDIUM PRICED HOMES NOW GREATEST NEED

The housing shortage has been reduced principally to a need for small homes, according to Grace J. Landon, statistician of the National Lumber Manufacturers Association.

Small homes, she finds, cost an

average of \$4000 each. Although such homes cost more than they did several years ago, she states, they afford more comfort. Also she directs attention to the fact that people, taken as a whole, now can afford more.

The percapita wealth in the continental United States was \$2318 in 1922 as against \$1950 10 years earlier. In 1880 it was but \$900.

METHOD TO MEASURE STRAINS IN CONCRETE STRUCTURES

Some time ago the Bureau of Standards, Department of Commerce, brought out what is known as an "electric teller" for measuring changes in the length of structural members produced by variations in the load upon the structure. The operation of the teller depends upon the variations in resistance to the passage of an electric current of a stack of carbon disks. This is the same principle as that employed in the microphone in the transmitter (the part we talk into) of the telephone. There is, therefore, nothing new in the principle employed, but the Bureau was the first to apply this principle to a precision measuring instrument.

Recently a new use has been found for this device in the measurement of the strains in mass concrete. For this purpose a special cartridge has been designed which houses the stack of carbon disks, and which is embedded in the concrete at the point where the measurement is to be made. Wire leads extend to the surface and are carried to some convenient point where the indicating instruments are placed. These instruments are calibrated to show any deformation in the concrete due to loading.

The instrument will shortly be used in an investigation which is to be carried out by a special committee sponsored by the Engineering Foundation on a dam to be erected at Fresno, California.

BUILDING BOOM TO LAST TEN YEARS IS PREDICTED

While the building shortage is gradually being met, it will be a decade before the industry become lull, according to Robert Beck, president of the Longacre Engineering & Construction Co., New York, erectors of office buildings, apartments and theatres in New York, Chicago, Washington, Detroit and other cities. He said:

"It is true the greatest call still is for one-family residences and the weakest demand for business structures, but numerous transfers and the large sales of lots in most cities indicate there will be considerable volume of building in sight for months.

"Trends of today, as indicated by the frequent announcement of tall office buildings with large single floor areas, will continue to be in the direction of the concentration of companies on single floors instead of on many small floors."

L. A. BUILDING STEADY

Los Angeles' building operations hold a steady pace. Up to and including the 11th, the city building department issued during August 1348 permits with an estimated valuation of \$4,029,751. This is less than for the corresponding period in July, during which 1266 permits with an estimated valuation of \$4,474,223 were issued, but is greater than for the first 11 days of August, 1924, during which 1288 permits with an estimated valuation of \$3,778,740 were issued. For the current year up to and including August 11, Los Angeles' building total was \$98,264,104, as compared with \$94,267,289 for the corresponding period last year. There has been no material change in the building situation. A larger volume of work is under way now than earlier in the year, but there is no shortage of labor and materials can be had for prompt delivery. Prices generally appear to be stabilized for some time.

Hoover Appoints Committee to Standardize Mechanics' Lien Law

The appointment by Secretary of Commerce Herbert Hoover of twelve qualified men as a committee to draft a standard State mechanic's lien act is announced in a statement issued by the Department of Commerce. At the request of several national organizations, the Department has undertaken to prepare an act suitable for adoption in the different States.

Mechanic's lien laws provide that contractors, sub-contractors, mechanics, laborers, architects, material men, and others who have contributed toward the construction of a building may obtain a lien on the property if they are not paid for their services within a reasonable time. The owner of the property then has to pay promptly or allow his property to be sold by the court to settle the claims. One class of cases where lien laws play an important part arises when an irresponsible contractor defaults or goes into bankruptcy, leaving obligations due to workers, material men and sub-contractors. Under the provisions of a lien law these creditors may obtain payment from the owner of the property on which the work was performed.

The State laws vary greatly and therefore cause confusion and expense to organizations doing business in several States, and to workers who move from one State to another. Dissatisfaction has been aroused in a number of States by laws whose provisions are said to be unfair to one or more of the different groups concerned, or to be difficult to construe.

In order to frame an act which will be as fair as possible to all the different groups it was felt that they should be represented in deciding on the general principles to be embodied in the act and that the best possible legal advice should be obtained in connection with phrasing it. The committee that Secretary Hoover has brought together accordingly includes

representatives of the principal groups including some whose interests are those of the owner.

When a preliminary draft of the act is completed, it will be sent for criticism and suggestions to interested organizations and individuals, including a special new committee of the National Conference of Commissioners on Uniform State Laws of which Mr. Charles V. Imlay, a member of the Hoover committee, is chairman.

The committee has held two meetings, but in view of the large amount of work required to draft such a model law, involving an extensive study of existing statutes and court decisions in regard to them, no date has been announced for completion of the preliminary draft.

The committee's membership is as follows: F. Highlands Burns, Baltimore, Md., Pres., Maryland Casualty Co.; William F. Chew, Baltimore, Md., Ex-Pres., National Association of Builders' Exchanges; John M. Gries, Washington, D. C., chief, Division of Building and Housing, Department of Commerce; George F. Hedrick, Washington, D. C., Pres., Building Trades Council, American Federation of Labor; Charles O.C. Hennessy, New York City, N. Y., Chairman, Legislative Committee, N. Y. State Savings & Loan Assn. League; Charles V. Imlay, Washington, D. C., National Conference of Commissioners on Uniform State Laws; William B. King, Washington, D. C., Counsel, National Association of Builders' Exchanges; Victor Mindeff, Washington, D. C., American Institute of Architects; Charles H. Paul, Dayton, Ohio, American Engineering Council; Frank Day Smith, Detroit, Mich., National Retail Lumber Dealers' Association; Leonard C. Wason, Boston, Mass., Associated General Contractors; John L. Weaver, Washington, D. C., Ex-Pres. National Association of Real Estate Boards; Dan H. Wheeler, Secretary.

West Coast Porcelain Company Consolidates with L. A. Concern

Announcement is made of the consolidation of the West Coast Porcelain Manufacturers of Millbrae, Calif., with the Washington Iron Works of Los Angeles. According to G. B. Schneider, general manager of the latter concern, the merger will give it the most complete line of plumbing fixtures made on the Pacific coast. The line of vitreous chinaware made by the West Coast Porcelain Manufacturers includes toilets, lavatories, urinals, etc., while the Los Angeles plant produces porcelain enameled bath tubs, lavatories, urinals, sinks and laundry trays. The seven-acre factory of the West coast concern at Millbrae is said to be one of the best equipped on the coast for the manufacture of vitreous china fixtures. As a result of the merger its products will now be marketed in southern California under the brand name of the Washington Iron Works, pioneer Pacific coast manufacturers of porcelain enameled fixtures.

"The first and most important effect of the consolidation is the extension of the Washington guarantee to include vitreous china fixtures," Schneider

declared. "Effective immediately, we give the same guarantee on vitreous china fixtures as we do on porcelain enameled fixtures. This guarantee, signed by both the Washington Iron Works and the plumbing merchant, agrees to replace free of charge any Washington fixture which develops any defect after installation. Plumbing merchants throughout southern California are able to supply these guaranteed fixtures immediately."

The capacity of the two plants is more than 1700 fixtures daily. It was announced, and over 750 men are employed. The two factories, which cover 10½ acres, consume over 200,000 pounds of raw materials daily. In volume and value of output these consolidated plants form one of the leading manufacturing organizations on the Pacific coast. Hundreds of thousands of dollars worth of materials used in the manufacturing processes are bought locally, and all the fixtures produced are installed in Pacific coast homes and buildings, with a considerable volume of shipments to Honolulu, South America, and the Orient.

TRADE NOTES

Owing to the confusion that has been created in the minds of customers and to eliminate any doubt as to its identity, the National Lumber Company of Alameda, recently incorporated, to change its name. The concern will hereafter be known as the Federal Lumber Company with headquarters at 2313 Blanding Avenue, Alameda. The announcement is made by H. L. Massey, manager for the company.

The Hayward Building Material Company is occupying its new plant at Mt. Eden road and the Western Pacific tracks, Hayward. The plant includes bunkers for the storage and distribution of crushed rock, sand and gravel, a warehouse and office building. A belt conveyor system for the direct unloading of cars is a feature of the plant equipment.

Eureka Mill and Lumber Company, now located at 3615 East Fourteenth Street, Oakland, has purchased a three acre site at East Fourteenth Street and Fifty-eighth Avenue, Oakland, on which the company plans to expend \$250,000 in establishment of a new plant.

Albert DeShields has retired from the firm of Axford and DeShields, doing a general foundry and manufacturer's hardware business in San Jose, and the business will be continued by H. W. Axford who assumes all liabilities. Quarters are maintained at University and Chestnut Avenue, College Park, San Jose.

The Sierra Lime and Mineral Company of Sacramento has been incorporated with a capital stock of \$25,000. Directors of the company are: Allen F. Grant, Malcolm K. Grant, J. F. Dunasky, Charles J. Eastman and S. Hornstein, all of Sacramento.

The Tynan Lumber Co. of Salinas has sold its branch yard at Gonzales, Calif., to the South Milling Company. The latter concern already has yards at Soledad and King City. James Barry will have charge of the yard at Gonzales.

Gladding, McBean and Co. announces the removal of warehouse quarters from 147-51 Minna Street to 1255 Harrison Street, between Eighth and Ninth Streets, San Francisco. General offices of the company, however, will remain at 600 Market Street, San Francisco.

The Fuller Lumber Company of Lodi has been taken over by the United Lumber Yard Co. of Modesto and Sacramento with headquarters in the former city. The sale includes yard and planning mill.

Norman Taylor, 118 Stanley Road, Burlingame, will operate in the Peninsula district under the trade name of General Sheet Metal Works and Repair Shop with headquarters at 400 Linden Ave., South San Francisco.

R. B. Bunker has been appointed East Bay representative for Annand & Company, brick manufacturers, and will maintain offices at 354 Hobart St., Builders' Exchange Bldg., Oakland.

Anderson Planing Mill, located in block bounded by N and O, 19th and 20th Streets, Sacramento, suffered a \$25,000 fire loss August 16.

Seventy Electric Utilities Operating in State of California

In a report compiled by Mr. L. S. Ready, Chief Engineer of the California Railroad Commission at the request of Mr. P. S. Clapp, assistant to Herbert Hoover, the report being for use at Stanford University, interesting statistics, showing the extent of the operations of the electric utilities operating in California, have been assembled. The report shows that as of December 31, 1923, there were a total of 70 electric utilities operating in California. In addition there are a number of municipally owned electric systems, but as these are not subject to the Commission's jurisdiction and do not report to the Commission, they are not included in Engineer Ready's figures, as the 12 largest electric utilities in California handle approximately 97 per cent of the electric utility business in

the state, their reports to the Commission are used as the basis for the estimates made.

According to Chief Engineer Ready's figures the approximate rate base, in 1922, for the 12 largest utilities totaled \$334,000,000; in 1923, \$374,000,000; and in 1924, \$445,000,000. The total rate base for all utilities, engaged in the electric business for the same years was respectively \$242,000,000, \$384,000,000 and \$455,000,000.

The following table shows the gross electric revenue for all electric utilities for the years 1922, 1923, and 1924. This table also shows the revenue from sales to other California utilities and the gross revenue exclusive of the latter. This represents the electric revenue received from the sale of electric energy to the public, including sales to municipally owned systems.

	1922	1923	1924
Gross revenue electric operations.....	\$73,714,093	\$75,541,683	\$86,076,330
Revenue sales to other California electric utilities	5,085,669	4,312,872	4,717,790
Gross revenue of California electric utilities less sales to other electric utilities in California	68,028,424	71,228,811	78,480,596
Taxes of electric utilities for electric properties	6,600,000	7,360,000	7,200,000
Interest and dividends of public utilities operating electric utility service	30,941,244	33,959,852	39,243,541
Surplus earned	2,447,824	1,304,074	2,857,048*

*Decrease.

The following is from the report: "The table sets forth the item of taxes chargeable to electric operations. The total payment of taxes reported for the 12 largest utilities was determined. The revenue of these utilities was 97 per cent of the total revenue from electric utilities and as the main part of taxes is determined as a percentage of gross revenue, the taxes for the entire utilities have been estimated at one hundred ninety-seventh's of that for the twelve companies. The taxes estimated are those chargeable to electric utility operations, although several of the utilities supply other service.

"A number of the electric utilities supply other utility service such as gas and water service and it is, therefore, impossible to set forth the interest and dividends applicable to the electric operations. The total set forth in the table under this heading, represents the interest and dividends paid by the utilities serving electricity, although the payments cover interest and dividend payments on securities representing other properties. The 12 largest electric utilities had a gross electric revenue in 1923, exclusive of sales to other California utilities, of \$70,390,000. These same utilities had a gross revenue from the sale of gas of \$29,150,000, and from the sale of water of \$968,000. The net revenue from these two utility services for the year 1923 available after operating expenses, taxes and depreciation, totalled approximately \$11,200,000. Revenue was also received from railroad and steam-heat utility service. For the 12 utilities

in question a rough approximation of the reasonable investment in other utility service for 1923 would be \$100,000,000.

"It should also be noted that the amount shown for interest and dividends and also surplus covers certain limited non-utility operations.

"The figures show the approximate rate base for the 12 largest utilities for the three years in question. The Commission has not determined, according to Chief Engineer Ready, the rate base for each of the years for the several utilities, but as to the 12 utilities, rate determinations have been made during the last three or four years and the totals shown have been obtained by adjusting the rate bases for the individual companies by the additions and betterments to the properties. The amounts given closely approximate what would probably be determined by the Commission had it fixed the rates for the utilities during each of the years.

"The Commission," continues Ready, "in determining rates, has generally used as the rate base the reasonable historical cost of the property used and useful in the service of the public. In more detail this may be defined as the reasonable cost of investment in structural properties and rights of way in the form of easements, plus the present market value of lands and plus the value of material and supplies and working capital necessary for the operation of the properties. The rate base is determined for the average for each year."

MEDIUM PRICED HOMES NOW GREATEST NEED

The housing shortage has been reduced principally to a need for small homes, according to Grace J. Landon, statistician of the National Lumber Manufacturers Association.

Small homes, she finds, cost an

average of \$4000 each. Although such homes cost more than they did several years ago, she states, they afford more comfort. Also she directs attention to the fact that people, taken as a whole, now can afford more.

The per capita wealth in the continental United States was \$2918 in 1922 as against \$1950 10 years earlier. In 1890 it was but \$900.

WASHED GRAVEL VS. CRUSHED ROCK IN CONCRETE

Under direction of the city engineering department of Fort Worth, Texas, tests were recently made of 200 concrete cylinders, half using washed gravel and half using crushed Chico stone. The gravel was from nearby deposits in the flood plain of a fork of Trinity River, which are the result of erosion of the rocks of the Lower Cretaceous (Comanchean) Period; the pebbles are hard and sound but their surfaces when magnified show countless minute pits. There were two mixes of concrete, 1:2:4 and 1:2½:5. After molding, the test cylinders were placed in damp sand and sprinkled daily. After 90 days, on crushing the washed gravel cylinders showed strengths of approximately 3700 and 3400 lb. per sq. in. for the two proportions and the crushed rock 2700 and 2050 lb. The superiority of sound washed gravel over sound crushed stone is ascribed partly to the fact that the facets of the crushed stone are glassy whereas the surface of the gravel pebbles is rough and pitted, also to the smaller percentage of voids in the gravel aggregate. These tests were described by John A. Hawley, consulting engineer, in a paper before the Texas Section of the American Society of Civil Engineers. Mr. Hawley performed the tests, with C. E. Collard, principal assistant city engineer, Fort Worth. Dudley L. Lewis is city engineer there.—Engineering News-Record.

GEO. M. MERRITT, BUILDER, TO FACE PERJURY CHARGE

George M. Merritt, president of the George M. Merritt Building Company, Inc., must go to trial before Superior Judge J. J. Trabucco, September 14, on a charge of perjury, as the result of the denial yesterday by the Court of Appeals of his application for a writ of prohibition. Merritt has asked for the writ contending that Judge Trabucco had no jurisdiction to try his case.

Perjury charges were brought against Merritt as the result of an allegedly false statement he swore to before a San Francisco notary October 30, 1924, in making a claim for a lien against William C. Itself for material and labor. The complaint made by District Attorney Brady charges that Merritt swore falsely to the amount of money that was due him by Itself.

A BLAST—THEN CEMENT

With intentions of cutting into a more extensive supply of lime rock the Monolith Cement Company will conduct what is said to be one of the most gigantic blasting projects ever planned in the state when 30 tons of dynamite will be exploded at the Monolith rock quarry, high on the mountain side, several miles east of Tehachapi, Sunday afternoon, August 23.

The tremendous expansive power of the mountain of nitro cellulose should almost fulfill the definition of an irresistible power, when one considers that a mere thimble full of the powder in a U. S. Springfield cartridge has a muzzle pressure of 55,000 pounds.

Many residents of Kern county, several engineers, moving picture concerns and scientists are planning to witness the spectacle, as the gigantic force tears its way through ton and tons of granite and limestone.

Nearly 92,000 Forest Fires Swept Country During 1924

Nearly 92,000 forest fires swept 29,000,000 acres of public and private lands during the calendar year 1924, according to a report just compiled by the Forest Service, United States Department of Agriculture. The actual money damage was \$35,000,000 exclusive of damage to young growth, watershed protection, wild life, and recreational facilities.

The figures, say forestry officials, clearly reflect the bad forest fire conditions which prevailed last year, especially in many southern states and in California. Compared with the calendar year 1923, 1924 figures represent an increase of 24,000 fires, and compared with the 9-year average an increase of 45,000 fires, or nearly 100 per cent. In acreage swept by the flames the 1924 figures are only slightly larger than those for 1923, but are almost double the acreage figures representing the 9-year average.

Money damage in 1924, estimated at \$38,000,000, is \$10,000,000 above the 1923 estimate, and \$18,000,000 higher than the 9-year average of \$20,000,000. Damage to young growth, watershed protection, wild life, and recreational facilities, and losses to the lumber industry, including wages and other economic values, are not included.

William B. Greeley, Chief of the Forest Service, states that the material increase in the number of forest fires reported during 1924 is partly the result of more complete reports, although 1924 was a very bad year in many sections of the country.

"Excessively dry weather was experienced in California and in the Gulf

States," said Chief Forester Greeley, "and in these States the 1924 fire figures show great increases over the 9-year average. Smaller increases are also shown in most other States."

An analysis of the 1924 statistics shows that incendiary fires top the list with 21,000, or about 23 per cent of the total. Brush burning comes next with 16,000 fires, or 18 per cent, and fires caused by smokers is third with 13,000, or about 14 per cent. Other chief causes of forest fires in 1924 were railroads, camp fires, lumbering, and lightning. Lightning is considered the only natural cause of forest fires. Only 6 per cent of the 1924 fires were started by lightning.

"The great single agency with which to combat forest fires," said Colonel Greeley, "is public opinion. No thoughtful citizen can read the 1924 figures without coming to the conclusion that the fight against forest fires is his personal fight. The Federal and State Governments are doing their utmost with the funds and equipment allotted to them. It is high time that a more effective weapon is placed at their disposal, and that weapon is an outraged public opinion."

The figures given in the Forest Service report apply to all public and private lands in the United States and not merely to the National Forest areas under the jurisdiction of the United States Department of Agriculture. On these latter areas, which embrace 157,000,000 acres, the number of forest fires during 1924 totaled 8247, the area swept by flames was 602,000 acres, and the money damage was estimated at \$1,500,000.

Standard System For Electrical Markings Approved by A. E. S. C.

The approval as American Standard of a system of connections and markings for electric power apparatus is announced by the American Engineering Standards Committee. The standard is the result of a revision of the work of the Electric Power Club which has been developed over a period of years. The most important part of the revision, which has been carried out by a sectional committee upon which all interested bodies are represented, under the sponsorship of the Power Club, has consisted in systematizing the work into a general plan which not only takes care of present needs, but also provides sufficient flexibility for future developments.

Previously, great confusion existed, as each manufacturer was using his own markings. The system as now elaborated assigns a characteristic letter to each type of connection. Subnumbers are used to differentiate between the various terminals of each class. These letters were chosen wherever possible so as to conform to the practice of many years and cause as little confusion as possible for those who have to make practical use of the diagrams presented.

The fundamental scheme is very simple, and completely covered on a single page. The remainder of the standard illustrates the methods of applying such markings to the more commonly used types of apparatus. These key diagrams are intended primarily for the use of engineers and draftsmen in correctly placing the required marking on the working diagrams of connections or wiring and for the use of engineers and wiremen installing the apparatus. Some illustrations of actual working diagrams are given to show how these markings are used commercially.

As only a relatively small part of the alphabet has been used, enough letters remain to cover any new varieties of apparatus that may be developed in the future.

This standard represents the combined effort of a large number of engineers, and has stood the test of several years practical application on a large scale.

This system of connections and terminal markings is being submitted to the International Electrotechnical Commission for adoption as an international standard.

THIRD OF ORIGINAL TIMBER SUPPLY IS LEFT

Less than one-third of the original supply of timber in the United States remains, says the Guaranty Survey of the Guaranty Trust Co. of New York. Supplies are being drawn upon at the

rate of 25,000,000,000 feet a year, while annual growth is only about 6,000,000,000 feet. In the years 1916-1922 more than 250,000 forest fires caused damage estimated at \$115,000,000. The survey recommends conservation and use of wood substitutes to meet the situation.

**PRATT'S
CONCRETE
MIX**

PHILLIPS STATION, Eldorado Co.,
ON TAHOE-Placerville Highway.
AUGUST 20, 1925.
SANDY PRATT is here.
VISITING HIS brother-in-law.
EATING HIS relatives' food.
AND FRESH fish.
FROM THE silvery streams.
OF THE high Sierras.
SANDY'S BROTHER-IN-LAW.
FISHES ALL day.
AND SANDY helps him.
EAT THE trout and everything.
IT PAYS to help.
ESPECIALLY YOUR relations.
PHILLIPS IS only two miles.
FROM CAMP Sacramento.
WHERE THE Ernie Chappells.
ARE IN charge.
LOOKING AFTER everybody.
INCLUDING THE interesting children.
SENT UP by the Rotarians.
OF SACRAMENTO.
AS SANDY Pratt, president.
OF THE Pratt Building Material Co.

DOWN TO the Pacific Ocean.
BUT, DEAR old patriotic stream.
THAT THE American is.
IT STOPS long enough.
NEAR THE 12th St. bridge.
IN SACRAMENTO.
TO DEPOSIT clean sand.
SO THAT Sandy, producer.
OF CLEAN, sharp sand.
AND HARD, crushed rock.
CAN SUPPLY a waiting world.
WITH GOOD, clean river sand.
SAID BY many.
TO BE the best sand.
FOR PLASTERING and brick mortar.
IN SUNNY California.
"I THANK you."

"WORKS" AT the dinner table.
WITH "FORKS" on the table.
SANDY SEES a "fork."
OF THE American River.
WINDING ITS way.

Fish grow big near Phillips, Eldorado County, where Sandy Pratt, producer of clean sand, hard rock and washed gravel, is "fishing" at the dining room table of his brother-in-law. Photos of some of the largest fish will be on exhibition at the "Prattrock" display at the State Fair on "San Francisco Day," September 8th.

Preliminaries Complete.

Official Proposals

NOTICE TO CONTRACTORS

(Radio Station—Marine Corps)

Sealed Proposals, indorsed "Proposals for Radio Station on Roof of Marine Corps Depot for Supplies, San Francisco, California, Specification No. 5140" will be received at the office of the District Public Works Officer, Room 307 Custom House, San Francisco, California, until 11 o'clock a. m., August 26th, 1925 and then there publicly opened for:

- Auxiliary transmitting room on roof.
- Auxiliary battery room on roof.
- Auxiliary receiving room on roof.
- Masts on roof.
- Walkways and certain partitions on fifth floor.

Work includes reinforced concrete, hollow tile, stucco, steel sash, metal covered doors, wood work, sheet metal, built up roofing, hardware, wood masts, skylights, masts, and line fittings, partitions, painting and glazing. Specification No. 5140 and accompanying drawings may be obtained on application to the Commandant, Twelfth Naval District, San Francisco, California or the Bureau of Yards and Docks. Deposit of a check or postal money order for \$10.00, payable to the Chief of the Bureau of Yards and Docks, will be received at this office for the safe return of the drawings and specification.

L. E. GREGORY, Chief of Bureau.
August 14th, 1925.

NOTICE TO CONTRACTORS

State Board of Harbor Commissioners

OFFICE OF THE BOARD OF STATE HARBOR COMMISSIONERS, Union Depot and Ferry House, San Francisco, California, August 13, 1925.

Sealed proposals or bids will be received at this office at or prior to 2 o'clock P. M., Thursday, August 27, 1925, for furnishing materials and reconstructing the foundations of the Post Office Building on the waterfront of the City and County of San Francisco, in accordance with specifications adopted by the Board, August 13, 1925, and on file in this office, to which special reference is hereby made.

The work to be done under these specifications consists in removing and replacing portions of the existing structure and furnishing all necessary materials (except Portland cement, which will be furnished to the Contractor by the Board) labor, tools, machinery and equipment for reconstructing the foundations of the Post Office Building on the waterfront of the City and County of San Francisco. The materials to be used in this work shall consist of the requisite quantities of Portland cement (which will be furnished to the Contractor by the Board) fine concrete aggregate, coarse concrete aggregate, steel reinforcement, piles, etc. Materials removed or damaged during the work and all other materials shown on the plans or called for in the specifications shall be furnished by the Contractor. All materials used must be of the best of their respective kinds if not especially specified herein.

No bid will be received unless it is made on a blank form furnished from this office and is accompanied by a certified check for an amount equal to five (5) per cent of the amount of the proposal, to be made payable to the Secretary of the Board, conditioned that if the proposal is accepted and the contract awarded, and if the bidder shall fail or neglect to execute a contract and give the bond required within six (6) days after the award is made, in that case the said sum mentioned in said check shall be deemed liquidated damages for such failure and neglect,

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

and shall be paid into the San Francisco Harbor Improvement Fund.

Bids will not be considered by the Board unless delivered to the Secretary or the Assistant Secretary, at the office of the Secretary, Room No. 17, Union Depot and Ferry House, at or prior to 2 o'clock P. M., on Thursday, August 27, 1925, at which time and place the bids will be publicly opened.

The Board reserves the right to reject any or all bids if deemed for the best interests of the State.

Specifications for this work to be had at Room 18, Union Depot and Ferry House, upon depositing \$10.00 for same, which will be returned on return of plans and specifications.

Bidders are requested to mark envelope containing bid "Bid for Reconstructing the Foundations of the Post Office Building."

CHAS. H. SPEAR,

M. E. COCHRANE,

JOHN B. SANFORD,

Board of State Harbor Commissioners.

FRANK G. WHITE,

Chief Engineer.

J. L. PHELPS, Secretary.

NOTICE TO CONTRACTORS

(Maricopa High School District)

Notice is hereby given that sealed bids will be received by C. B. Warner at the office of the high school at Maricopa, Kern Co., California, up to the hour of 1:30 P. M., September 2nd, 1925, for the erection and completion of an eight-room and auditorium high school building for the Maricopa High School District, according to plans and specifications furnished for the same by J. M. Saffell, architect, 924 Nineteenth Street, Bakersfield, Calif. Said building will be figured with frame construction with exterior cement or Kellastone Plaster, also with hollow tile and plastered for all outside walls as above. Bids will be opened at the office of the high school, Maricopa, Sept. 2nd, 1:30 P. M., 1925.

All bids must be accompanied by a builders' bond or certified check payable to C. B. Warner, Clerk of Trustees of said School District, for the sum of at least ten per cent of the amount of bid, to be forfeited should the successful bidder fail to give a satisfactory bond of fifty per cent of contract price and enter into a contract with

the Trustees of the Maricopa High School District within five days after the awarding thereof, should it be required by the Trustees.

All bids must be enclosed in sealed envelopes and addressed to C. B. Warner and marked "Proposals for Erection of Maricopa High School Building."

The right reserved to reject any and all bids for said work.

C. B. WARNER,
Clerk.

FRANK WELLS,

M. L. LYTLE,
Board of Trustees Maricopa High School District.

STATE OF CALIFORNIA

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock P. M., September 14, 1925, at which time they will be publicly opened and read, for construction, in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

San Bernardino County, between Big Bear Dam and Pawnskin (VIII-S.B.D.-43-D), about three and three-tenths (3.3) miles in length, to be graded.

Sacramento County, between Sacramento and San Francisco (X-Sac-1-B), about five-fifths (0.5) miles in length, to be graded and paved with asphalt concrete.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineers' offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

A Variety of Work on the Same Machine

In addition to business correspondence the modern office has a large variety of work for the typewriter.

Tabulating, billing (simple and condensed) stenographic cutting, writing on ruled forms and many other kinds of office work can all be done on the L. C. Smith & Bros. typewriter.

The decimal tabulator and the variable line spacer are part of the inbuilt service of every L. C. Smith & Bros. machine.

KOEHRING DANDIE

Light Mixer

**Four-cylinder
Gasoline
Engine**

FAST! Fast! Fast! Here is a light mixer with a speedy charging skip, liberal drum dimensions and a high speed discharge that will break all your records of putting concrete where it pays you profits!

Just the balanced light weight to haul behind your truck on its rubber tired disc wheels and get from job to job in a big hurry.

Four cylinder, radiator cooled, gasoline engine. Transmission from engine to drum enclosed in oil bath! Double gear drum drive, chilled, beveled gears! Drum rollers fixed to shafts revolving in big bearings!

It's useless to try to give you the smallest idea of what this Dandie represents in superior speed and construction details—but it's *strong, rugged*—it will stand-up for all the punishment you can give it, and *work and work, and work!*

And you have a chance to buy at a price that gives you all the benefit of the economies the Koehring Company effect by big, standardized production! If you had half an idea of what this mixer means in the way of actual value, you would send back the coupon for full detail by next mail!

Koehring Dandie — 7 cu. ft. capacity mixed concrete. High speed charging skip, or low charging hopper with hinged steel framed platform which may be folded against mixer for hauling. Discharged from either side of mixer.

4 cylinder gas engine, radiator cooled, or optional two cylinder engine, hopper cooled. Drum drive transmission in oil bath. Maybe equipped with *automatic water measuring tank, and Light Duty Hoist.*

CALIFORNIA HIGHWAYS SECOND TO NONE

California's state highway construction standards are equal to, if not in advance of, those of several large eastern states, where much highway building is now under way, according to a statement issued by R. M. Morton, state highway engineer.

Morton has just returned from Washington, D. C., where he attended a session of the board appointed by the secretary of agriculture to select important interstate routes for designation as "United States highways."

"California alignment was found to be superior to that on state highways in Pennsylvania, Ohio and Illinois," Morton said. "Roads there are being built 18 feet in width, while California is constructing 20 foot pavements on trunk highways. In thickness California pavements compare favorably with what is the Government standard in the East."

TO ESTABLISH YARD

The Oakland Paving Company has purchased three acres of the Durant aviation field in Oakland and will establish a material yard on the site.

BUILDING COSTS COMPARED FOR 1924-25

The index of building costs compiled by the Federal Reserve Bank of New York indicate that the average expense of building this year has been slightly higher than a year ago, while the cost index of the Engineering News Record reflects a decline of more than 5 per cent. The marked disparity between these two indexes is probably due to the varying importance assigned to the different materials entering into the average. The index of the Federal Reserve Bank is based on the wholesale price index of building materials published by the United States Department of Labor, which gives great weight to the price of lumber, and very little to the price of structural steel. On the other hand, this index is considerably more inclusive than the other, which is based on prices of only a few of the most important materials. The two indexes ascribe about the same importance to the cost of labor—approximately 40 per cent of the total.

The average cost per square foot of floor space during the first five months of this year and corresponding period last year, by classes of building, is as follows:

Classification	1925	1924
Commercial	\$5.39	\$5.17
Educational	6.51	5.77
Hospitals & Institutions	7.92	6.33
Industrial	6.91	6.78
Military and Naval	5.78	6.60
Public Buildings	7.68	6.85
Religious and Memorial	8.63	7.44
Residential	4.87	4.58
Social and Recreational	8.22	5.62
Average	\$5.47	\$5.06

STATE WATER RIGHTS BODY BUSY DURING JULY

Forty-nine applications for permission to appropriate water from streams and bodies of water in the state were filed with the division of water rights of the state department of public works during July.

A total of thirty-one permits was issued. The largest of these, from the standpoint of expense involved in the project, was granted the McCloud River Lumber Company of McCloud for a water supply for the town of McCloud. The estimated cost of the project is \$75,000.

A permit was issued the Sutter Basin Company of Sacramento for 87.49 cubic feet per second from the Feather river for irrigation of 3499 acres in Sacramento county. The estimated cost is \$30,000. Another permit issued the same company to irrigate 2126 acres, also in Sutter county, calls for an expenditure of \$20,000.

During the month the San Joaquin Light & Power corporation of Fresno applied for a permit to divert 220 cubic feet per second from the north fork of Kings river for generation of hydro-electric energy of a total of 141,750 theoretical horsepower. The estimated cost of construction is given as \$32,300,000.

GALLOWAY TO REPORT ON S. B. EARTHQUAKE DAMAGE

Announcement is made that the first official report of the American Society of Civil Engineers, following an extensive survey of the situation at Santa Barbara brought about by the earthquake of June 29th, will be made within the next few days by J. D. Galloway, chairman of the National Committee of Earthquakes, of the society. Mr. Galloway is a prominent consulting engineer and an authority on earthquake-proof construction.

"The facts are now so thoroughly clear that all engineers are agreed on the vital need of elasticity in construction," Mr. Galloway declared. "Structural steel has an ultimate compression strength of 60,000 pounds per square inch, which means that it can bear this weight without undue strain. Even in the most severe shock conceivable, in which structural steel bore stress beyond the 60,000 strain, the column would not fail, for the elasticity and cohesion of the steel itself would keep it intact although it became twisted and bent."

Galloway pointed out that the one steel-frame structure in the earthquake zone of Santa Barbara, the postoffice, was undamaged, which, he said, proves the conclusions reached by engineers following the San Francisco disaster in 1906, that elasticity of construction is the outstanding need to withstand earthquake shock.

"In almost every instance in Santa Barbara," Galloway continued, "concrete columns failed. This was due to design and lack of strength to resist the shear stresses which come from the side-ways movement of the earthquake."

PLATE GLASS PRODUCTION SHOWS INCREASE

The production of plate glass in the United States during the first half of 1925 exceeded by 9,378,838 square feet the production for the first six months of 1924.

The figures for the first half of 1925 are 56,561,960 square feet. During the same period last year the production was 47,183,122 square feet. According to present indication, the plate glass turned out during the remainder of the year will make a total production for 1925 of between 105,000,000 and 110,000,000 square feet; or between 14,000,000 and 19,000,000 square feet more than was produced in 1924.

The growth of the plate glass industry during recent years is strikingly illustrated by the fact that more plate glass has been produced during the first half of the present year than was produced in the whole of 1921. The use of plate glass in the automobile and in large buildings such as office buildings, apartment houses, and hotels has been largely responsible for this rapid growth.

In the last year or so, however, the increased use of plate glass in the windows of the medium class of homes has been an important factor.

The figures for the first half of 1925 are 56,561,960 square feet. During the same period last year the production was 47,183,122 square feet. According to present indication, the plate glass turned out during the remainder of the year will make a total production for 1925 of between 105,000,000 and 110,000,000 square feet; or between 14,000,000 and 19,000,000 square feet more than was produced in 1924.

The growth of the plate glass industry during recent years is strikingly illustrated by the fact that more plate glass has been produced during the first half of the present year than was produced in the whole of 1921. The use of plate glass in the automobiles and in large buildings such as office buildings, apartment houses, and hotels has been largely responsible for this rapid growth.

In the last year or so, however, the increased use of plate glass in the windows of the medium class of homes has been an important factor.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

A prospect of continued activity in the building industry during the coming fall is indicated by heavy increases in July permits, as reported to the national monthly building survey of S. W. Straus & Co. The total in 377 cities and towns was \$387,936,257, compared to \$274,901,172 in July last year. This was an increase of more than \$113,000,000 or 41 per cent. Of this volume the 25 leading cities reported 65 per cent, showing that the large centers of population are rapidly rebuilding in accordance with the popular demand for modern buildings of all types. It is no longer a question of "over-built" or "under-built" conditions, but rather a nation-wide movement to tear down obsolete structures and erect new ones, which will meet the standards and requirements of today.

Herbert Nunn, city manager of Santa Barbara, has discharged nine members of the city engineering department and his own secretary as a result of insubordination, he says, because they presented a signed paper to him to the effect that if he ousted George Morrison, city engineer, they too would quit. Morrison's resignation was in the hands of the city manager at the time, effective at a later date. City Manager Nunn accepted the resignation and ordered the discharge of the signers of the paper.

The Red River Lumber Company has shipped two truckloads of oak, 5000 board feet, from the vicinity of Montgomery Creek to Westwood, where experiments will be made in the veneering plant to test the utility of the wood in veneering work. There is a great deal of oak on the company's land around Montgomery Creek, both white oak and black oak. If it should work up as expected in veneering, the oak lumber, hitherto of little value, will become a considerable asset.

Sales of fabricated structural steel for June, 1925, represent 88 per cent of capacity as against 69 per cent of capacity for May, according to report of the United States Department of Commerce. According to the National Association of Sheet & Tin Plate Manufacturers, the sheet steel industry during June, 1925, was producing at 83.4 per cent capacity with total sales for the month running at 92.8 per cent of capacity.

Southern California Edison Company announces construction of the third 220-volt transmission line between Big Creek-San Joaquin river power houses and Los Angeles will start about September 1. The new line will cover a distance of 231 miles and will cost approximately \$11,000,000. Its electrical carrying capacity will be 200,000 horsepower. The line will be completed about January 1, 1927.

While the level of industrial employment for the month of June declined from the May level, the 1925 level now stands above the corresponding figures for last year. Government figures show that employment for 1925 has been fairly steady, the ups and downs that occurred being apparently due to seasonal causes.

Appointment of three receivers to take charge of the affairs of the Clear Lake Lumber Company, one of the oldest timber concerns in the state of Washington, has been announced by Superior Judge George A. Joiner of Skagit County. The appointment followed the filing of a friendly action in Skagit county to conserve the company's property for the benefit of the stockholders and creditors. The receivers named by Judge Joiner are L. L. Crosby, vice-president of the First National bank of Everett; Clyde Walton, president of the Walton Lumber Company of Everett; and B. R. Lewis of Seattle, president of the Clear Lake Lumber Company. Plans will be worked out immediately for a reorganization of the business so as to provide more capital for the concern.

Hugh White, president of the Geo. A. Fuller Company, New York general contractors, blames the bricklayers' union for strikes which are tying up \$100,000,000 worth of construction work in thirteen cities and predicted that the walkout may spread until the building program of the entire country is involved. "The contractors have been caught between the battle lines and are being made the goats," White said referring to the jurisdictional dispute between union plasterers and bricklayers which precipitated the strike.

The Stone Contractors Association of Pittsburgh granted a voluntary increase to stone masons amounting to six and one-quarter cents an hour, effective August 1st. The stone masons made no demand for an increase this year, but after the stone cutters demanded and received a raise, amounting to 50 cents a day, the contractors decided that the masons were entitled to the same wage as the cutters, and accordingly the rates were equalized. The rate for both trades is now \$14.37 per hour or \$11.50 per day.

Fred M. Strecker, president of the Penstock Construction Company of Sharon, Pa., stopping at the Hotel Oakland, announces his firm will erect a \$200,000 plant in Oakland for the manufacture of riveted steel pipe if his company is successful in securing contracts in connection with the East Bay Municipal Utility District project when bids are opened Sept. 4. Strecker will remain in Oakland until the opening of bids.

The government has formally filed petitions with the Supreme Court for rehearings in the cases of the Cement Manufacturers' Protective Association and Maple Flooring Manufacturers. In its petitions, the government specifically accepts the tests of legality of the trade associations activities as laid down by the court, but contends that the records establish their activities as outside the limits defined by the court.

Los Angeles city council has adopted a resolution declaring that "foreign cement will be legal for use on municipal work when it meets city specifications and after it has been successfully used here in private work for a period of two years."

ALONG THE LINE

John C. Shaw was appointed city engineer of Los Angeles to succeed H. A. Van Norman, who has been recalled to the service of the Los Angeles Water and power commission as assistant general manager of the water bureau. Mr. Shaw was acting harbor engineer during the last half of 1924 and since last December has been chief engineer of the McClintock Marshall Company in Los Angeles. Before coming to Los Angeles six years ago he was engaged in engineering work on various projects, including the Panama Canal locks and Cunard steamship piers in New York City, and was also in the service of the Carnegie Steel Company, Bethlehem Steel Corporation and American Sugar Refining Company. He served overseas in the world war in the Engineer Corps with the rank of major.

Wm. A. Sherman, vice-president and general manager of the Merchants Ice & Cold Storage Company of San Francisco, has been appointed president of the State Board of Harbor Commissioners by Governor Friend W. Richardson. Sherman assumes the position September 1 and succeeds Chas. H. Spear who resigned to accept a position as harbor manager for the city of Los Angeles.

D. E. Harris has been elected president of the Pacific States Electric Co., succeeding Tracy E. Bibbins, who died last month. Harris was formerly vice-president and general sales manager and occupied that position with the company since 1916. He started his electrical career twenty-seven years ago as office boy for the company of which he is now the head.

Mitchell, Jackson and Company, designers and builders, operating extensively in the San Mateo district, are planning the opening of San Francisco offices. The concern in the past few years designed and erected some of the largest structures in the Peninsula district.

A. V. Orbinson, city manager of South Pasadena, has been appointed city manager of Pasadena, filling the vacancy caused through the resignation of C. W. Koiner on July 1.

The San Diego city council has created the post of municipal hydraulic engineer. No appointment has been made as yet.

James K. James has been reappointed city Engineer and Superintendent of Streets at Santa Cruz, the position he previously held from 1919 to 1923.

Edward E. Haskell has been appointed city engineer of Santa Barbara, succeeding George D. Morrison who resigned.

ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

FEDERAL ARBITRATION LAW IS EFFECTIVE JANUARY 1

On January 1, 1925, the United States Arbitration Act passed by the last Congress will become effective. In the language of the preamble to the bill it is "An act to make valid and enforceable written provisions or agreements for arbitration of disputes arising out of contracts, maritime transactions, or commerce among the States, Territories or with foreign nations."

Under the provisions of the new law, any dispute which is subject to a civil action in court may be arbitrated instead of litigated. Labor disputes between employers and employees do not come within the scope of the act. A written agreement in a contract to submit any controversy arising under the contract to arbitrate is valid, irrevocable and enforceable in federal courts. Thus the authority of the courts is behind the private arbitration action, even though the court may never be called into action. If an arbitration agreement exists then the parties must arbitrate. When the arbitrator renders an award it must be accepted, or the court will enforce it.

REFUND OF TAXES TO OWNERS OF OFFICE BUILDINGS

Thousands of dollars may be refunded to owners of office buildings throughout the country under the ruling handed down recently by the United States Board of Tax Appeals, permitting deductions from taxable income for obsolescence of buildings, according to H. D. Bunjes, manager of the research department of the California Bank of Los Angeles in a statement to the California Real Estate Association.

It is too late to get a refund for 1919, but there is yet time for owners to file notice of their intention to submit amended income tax returns for the year 1920 to 1924.

The ruling was returned in the test case of North America Building, Chicago. It provides that an annual allowance of 3 per cent for taxes purposes is permissible for exhaustion, wear and tear and obsolescence of buildings. Formerly there was no allowance for obsolescence granted by the revenue collector.

PLUMBERS ORGANIZE

The Southern Alameda County Master Plumbers' Association will be a new organization in Hayward. At an organization meeting held recently, Rush Brunner, of Hayward, was elected president and C. R. Abbott, of Niles, vice-president. A secretary, treasurer and directors will be chosen at the next meeting.

ELECTRICIANS GET RAISE

An August 1st, the rate for electricians and fixture workers in Cleveland advanced from \$1.43 1/2 to \$1.50 per hour. The new rate will remain in effect until May 1, 1926.

Conditions in Construction Industry to be Reviewed at Meet

(Special Correspondence)

The most important action taken by the Executive Committee of the National Association of Building Trades Employers at its last meeting held in the Old Colony Club, Hotel LaSalle, Chicago, was the adoption of a resolution to call a national conference some time this Fall to discuss conditions in the construction industry.

The conference which will be open to contractors throughout the country, regardless of whether or not they are affiliated with the National Association will be similar to the one held in Cleveland on January 5th, 1925, at which time the principle matter considered was the demand for the five-day-week.

The conference held last January, which was attended by representative contractors from the majority of the leading cities of the country was a success. It served to focus the attention of the entire construction industry of the country on the uneconomic demand of certain crafts to institute the short working week, with the result that the majority of the trades decided to abandon their efforts to put the five-day-week into operation this year.

The need for frequent gatherings of

contractors to discuss conditions generally in the industry was clearly demonstrated at the former meeting and led the members of the Executive Committee to decide to call a conference for this Fall before any agreements were negotiated for next year. In most cities where contracts are made with labor organizations the demands are presented prior to the first of the year and in many instances the agreements are made on or before January 1st. For this reason it was decided to hold the conference early in the Fall in order that contractors might be fully advised as to probable conditions in the large cities.

In addition to a general discussion of conditions in the industry for next year there will be a number of other important issues brought up at the conference such as the probability of the five-day-week movement being revived once more and many other matters of vital importance to employers of labor in the building industry. The time and place of holding the conference will be determined upon in the near future and further announcements made.

Conference Adopts Standard Questionnaire

The tremendous increase in irresponsibility and inexperience in the construction industry prompted the Joint Conference on Construction Practices to attempt to work out a plan under which this evil might be minimized. A series of meetings were held which resulted in the adoption of a number of forms including a financial statement, which indicates the bidders' financial standing, an experience questionnaire designed to reveal his past record, and a plan and equipment questionnaire giving certain information with respect to his qualifications for undertaking a specific project. The Conference on May 22, 1925, at a meeting in Washington, D. C., adopted a resolution to the effect that each committee represented should transmit the questionnaires and financial statement forms to their respective societies for the purpose of obtaining their approval and recommendations for use of the forms.

With few exceptions the laws governing public contracts stipulate that such contracts shall be let to the lowest responsible bidder. Unfortunately there has been no recognized standard of responsibility with the result that the term "responsible bidder" has come to mean any one who can furnish a surety bond. That the furnishing of a bond does not necessarily indicate responsibility is generally known and the surety company that writes a bond has not presumed to guarantee that the bidder whom it bonds is responsible. The bonding company merely guarantees that the contract obligations will by some means be fulfilled.

The forms are unqualifiedly recommended by the Joint Conference for use in connection with the award of either public or private contracts and it urges that they be given an immediate and thorough test.

NEW ARCHITECTURAL CLASSES

Announcement is made that a new school of architecture will be established at University of Southern California beginning with the fall term. The course will be increased from four to five years and graduates will be given the degree of bachelor of architecture. The Allied Architects Association of Los Angeles, will co-operate with the university in this course.

SURVEY BUREAU POPULAR

The Master Builders Association of Kansas reports that an average of over five surveys a week have been made in the quantity survey bureau, maintained by the organization, since the middle of May. The bureau was started last year and has proved to be a valuable service to the members of the aggressive Kansas organization.

FINE GROUND CEMENT MAKES STRONGER CONCRETE

New light on how fine-grinding of cement makes concrete stronger is given by a ten year research just completed at the Bureau of Standards, Department of Commerce. Experiments prove that fine-grinding makes concrete stronger, especially if greater amounts of cement are used with the sand and gravel. The same increase may be obtained as economically through the use of more cement.

The research is part of a larger program of bureau research on useful properties of materials and how they may be enhanced. That fineness is a vital characteristic of Portland cement has long been known, but data were lacking as to the exact effect of such fineness on Portland cement over long periods of time. These data are now available.

Ten years ago test cylinders of concrete were made up of five brands of cement and Potomac River sand and gravel. These first kept in moist air 28 days, then exposed to Washington weather for periods up to 10 years. Specimens broken after 6 months, and 1, 2, 3, 5, and 10 years showed greater strength compared with similar specimens made of normal cement. The older specimens showed less increase, but the result is conclusive: fine grinding of the cement increases the strength of the concrete, especially with rich mixes.

As the industry grew, the fineness has increased until at present under the national specification or quality standard 78 per cent passes through a standard cement sieve having 40,000 openings per square inch.

PALO ALTO BUILDING ACTIVITY SHOWS STEADY INCREASE

With \$258,964 in building permits issued during the month of July—the second highest total recorded for a single month since 1920—development activity for 1925 in Palo Alto reached a new peak during the month just completed.

Comparisons with statistics for 1924 show that building permits for the first seven months of 1925 aggregated \$1,245,802 as compared with \$1,083,179 for the corresponding period last year, although the July record for this year was below that for the same period a year ago.

Reflecting the continued growth in the residential districts, permits for 27 residences were issued during the month, calling for an expenditure of \$176,746. This brings the total number of residence permits issued during the period January 1 to August 1 up to 155.

The following table compiled by the board of public works gives the details of Palo Alto's development activity for July:

Residences	27	\$176,746
Residence alterations	13	9,180
Garages	23	28,956
Garage additions	3	332
Business	1	12,400
Business alterations	3	3,600
Warehouse	1	5,000
Miscellaneous	2	150
Apartment house	1	23,000
Totals	74	\$258,964

DREDGER LOSS

Flames caused by back fire which ignited the oiled flooring of the deck, totally destroyed a \$25,000 dredger owned by the Sonoma Sand and Gravel Company near Santa Rosa.

Saving to Motorists Will Pay For Reconstruction of Highway

Five hundred dollars per day, \$183,000 per year saving to motorists using the state highway between Redding and Dunsmuir.

Based on present traffic only, this is the story in dollars and cents of the reconstruction of the Pacific Highway through the Sacramento Canyon, now under way by the California Highway Commission.

The distance will be shortened from 65 miles to 58.5 miles, or 10 per cent. Even more startling improvements will be made in alignment, width and reduction of maximum grades.

The saving in operating costs is based on the reduction in mileage ONLY; the advantage of increased speed and safety, accidents prevented and lives saved, cannot be estimated in dollars and cents. It exists nevertheless.

Large Expenditure Justified

Engineers of the commission point out that, capitalizing at 5 per cent the saving of \$183,000 per year in operating costs because of the reduced distance, the state is justified in expending \$3,660,000 on this project.

At present we are engaged in regrading and surfacing at an expenditure, including bridges, of approximately \$2,750,000 from the gasoline tax and motor vehicle funds. The saving, it will be noted, will pay for the work now under way, and a considerable part of the cost of paving, estimated at \$2,000,000. Paving, however, can not be undertaken until fills have had ample time to settle and additional construction funds have been provided. In the meantime, the road will be kept

in good condition by intensive maintenance.

The reconstruction of the Pacific Highway through the Sacramento Canyon, studies for which were authorized in 1923 after the enactment of the gasoline tax law, is one of the major projects of the California Highway Commission. Its accomplishment will be a credit to all who have had a part in it, particularly the engineers who have devoted years to a study of the most satisfactory location for the highway.

Gasoline Tax Provides Funds

This work would be impossible without the reconstruction fund supplied by the present two cent gasoline tax, only half of which come to the state, yet motorists using the road will get their money back many times over when the work is completed.

This great interstate connection, at first looked upon more as a lateral connection for Siskiyou County, now has an average traffic of 1000 vehicles per day for the entire year, a traffic undreamed of when the road was first planned, which, with the lack of funds, accounts for the standards approved in 1914. During the summer months, it approaches 3000 vehicles a day. Nothing less than a road of highest standards can safely handle this rapidly growing traffic through a mountainous country.

Such a highway is now being provided, and when the work is completed, the Pacific Highway through the Sacramento Canyon will be an interstate connection of which all Californians may well be proud.

Installment Plan Business Reaps Profits For Painters

(Reprint from Southwest Builder & Contractor)

A statement issued by two finance companies of Philadelphia which have been loaning money to property owners for painting buildings on the installment plan shows that during the month of June 621 contracts were closed for doing work under this plan. Contracts for painting on the installment plan amounting to \$205,526 had been completed up to July 1. These figures are significant of what can be accomplished by systematic effort to promote business. They represent a very small proportion of the amount of painting done in Philadelphia, of course, but when one considers the short time the plan has been in operation its possibilities appear very great. Painting of buildings, while necessary to their maintenance, is easily neglected and is generally postponed when the owner happens to be short of cash. It is a mistake to neglect the maintenance of a building because damage resulting from such neglect is often irreparable. There is no good reason why an owner should not borrow money for painting a building the same as he borrows when he buys a piano, phonograph or any other useful thing to be paid for on the installment plan.

A Los Angeles painting contractor,

John E. Smith, writes to headquarters of the "Save the Surface Campaign" that the installment plan for painting has benefited his business 100 per cent. He believes it is a great help for two reasons: "First, the overnight painter will not have so much chance to beat the property owner. Second, the property owner can save his home from decay by making monthly payments and not be so hard pushed for money when it can be used in other ways." A phase of the proposition which we have not heretofore seen mentioned is pointed out in the first reason. One of the plagues of the painting business is the "overnight" contractor who gets a few jobs and by substituting materials and slighting the work squeezes out of his contract a few extra dollars. A dishonest painting job is worse than none, and the owner who gets one is prone to judge all painting contractors by it. When painting is done on the installment plan the person, firm or corporation advancing the money is pretty certain to insist that the work be done by a reliable painting contractor and that it shall be up to the standard of specifications. This is a protection which the owner who knows little or nothing about painting should appreciate.

NEW OAKLAND BRICK PLANT

Announcement is made by G. Kendall of the formation of a syndicate of business men of the Eastbay to promote a large brick plant to be known as the Oakland Brick Company. Kendall, who is one of the partners in the California Builders Company, states that the material for the new company's product is to be taken from a clay deposit in a hill located near Hayward. This deposit, he states, is completely composed of high grade clay, the purity of which is declared ideal for the manufacturing of brick. Kendall states that the deposit was discovered by chance while a search was made for rock with which to make a new road way. Kendall states, "We have just completed a survey and test which shows that with this clay we can produce face brick at a much reduced cost. This clay can be quarried exceptionally easy, and is close at hand right here in the Eastbay, just off Foothill boulevard. We have already considerable machinery on the ground and have driven a sixty-foot tunnel in the hillside. We have made a large quantity of brick which are now in the kiln." Kendall states that the affairs of the syndicate are being handled by E. P. Fieher and that temporary offices are located at 1636 Franklin Street, Oakland.

DEVICE FOR KILN LUMBER

Operations of a device for unloading flat-dried kiln-dried lumber from the carriage mechanically, an invention of Matt Egan, superintendent of the Alameda Lumber Company, is being awaited with interest by mill operators of the Klamath Falls district.

Success of the experiment will mean a great saving in the handling of kiln-dried lumber, operators state.

The device, known as an unstacker, is intended for use in unloading lumber which is loaded flat for kiln-drying. Only the stickerman will be required and he can also attend to the operation of the unloader.

The machine, now under construction, consists of an electric hoist and a revolving over-head chain with lugs. The action of the two is such that as each tier is stripped from the top of the load, the hoist automatically raises the load to the correct level for the next lug to take hold.

PRODUCTION OF ASBESTOS IN 1924

The production of asbestos in 1924, as reported by producers to the Bureau of Mines, Department of Commerce, amounted to 300 short tons, valued at \$42,526. These figures comprise 173 short tons of chrysotile asbestos valued at \$33,941, mined in Arizona, California, and Montana, and 127 short tons of amphibole asbestos, valued at \$8,585, mined in Georgia and Maryland.

The imports of unmanufactured asbestos amounted to 183,250 short tons, valued at \$5,602,945.

GETS APPOINTMENT

Capt. Walter G. Tibbitts is the new president of the Alameda city planning commission as the result of a reorganization necessitated by the resignation of Lochiel M. King, former president, resigned from the commission when he was appointed by Mayor Frank Otis to serve as a member of the special board of engineers which is making a survey of Alameda's potential waterfront.

TRADE NOTES

The Bell Columbia Marble Company, which a few months ago acquired outright the holdings of the Bell Marble Company at Columbia, Tuolumne County, is rapidly getting things in shape for operating the property on a large scale. It is expected that sufficient progress will have been made in the preliminary work of installing new and larger equipment and in the erection of necessary buildings within the next few weeks to permit actual quarrying operations to commence.

Frank Ketelhut of Richmond has been named president and general manager of the Gerlach Brick Company operating a plant near Richmond. The company has been reorganized due to the recent death of John C. Gerlach, late president. Alvin Gerlach is secretary of the concern. G. G. Jamieson, O. W. Rhodes and J. H. Plate are directors. C. W. Tress has been appointed plant superintendent.

The first shipment of machinery and equipment for the Table Mountain Clay Products Company plant, near Oroville, has arrived at the plant. The equipment includes a 120-horsepower tractor steam engine. Drilling for water to handle the clay in the brick making process has been started and excavation for the plant is well under way. The company is composed of sixteen Oroville business men.

The Pacific Cabinet Manufacturing Company has consolidated with the East Bay Cabinet Shop and will operate under the name of Pacific Cabinet Manufacturing Company with headquarters at 2227 East Fourteenth St., Oakland. The company will specialize in the manufacture of sounding boxes and phonograph and radio cabinets.

Sterling Lumber Company of San Francisco, operating fourteen yards in California, has taken over the Independent Lumber Company properties in Salinas, according to F. L. Sayre, secretary-treasurer of the Sterling Company. The Independent yard will continue under the management of M. C. Wood and Jos. Garriessere.

The partnership existing under the name of San Joaquin Valley Cement Pipe Company, between S. Y. Mayes, Nettie H. Mayes and C. Balsa, operating plants at Chowchilla, Madera County, at Herndon, Merced County and Livingston, Merced County, has been dissolved, effective August 19.

The Christensen-Andersen Hardware Company of Palo Alto has completed arrangements whereby the company will occupy the store quarters in the new Masonic Temple building to be erected in that city. Increased business warrants larger quarters, members

The McGilvray Stone Company of San Francisco is reported to be planning the reopening of the Sitee stone quarry near Maxwell, Colusa county. Operations will be started in September, it is reported.

J. E. Hackley and E. T. Carr of Marysville and Yuba City have opened a plumbing shop at 224 E St., Marysville.

Trewhitt-Shields Co., construction engineers and contractors of Fresno, have incorporated with a capital stock of \$500,000. The incorporators are W. D. Trewhitt, H. W. Shields, H. R. Lake, R. R. Fisher and E. M. Bell, all of Fresno. The authorized capitalization is divided into 2000 shares of preferred and 3000 shares of common stock, with five shares owned by the incorporators.

Protests have been filed with the Sacramento city commissioners against proposed rehabilitation of the Anderson Planing Mill in the vicinity of Nineteenth and N Streets, Sacramento. The mill, protestants claim, constitutes a permanent menace and has been instrumental in raising insurance rates in the district. The mill was recently destroyed by fire.

Builders' Service & Supply Co., Inc. of Oakland has purchased property at Delaware and West streets, Oakland, formerly occupied by the Monarch Diamond Oil Company and after completion of alterations will move into the new quarters. The concern manufactures heating and refrigerating machinery.

The Austin Western Road Machinery Co. has purchased property, 117 by 275 feet, in Brannan Street near Third, San Francisco, for office, warehouse and shop quarters. The company is one of the largest manufacturers of road construction equipment in the United States.

The Western Asbestos Magnesite Company of San Francisco has leased four thousand feet of floor space at sixteenth and Poplar Streets, Oakland, to serve the East Bay district. The company handles Celotex and will manufacture and distribute building material.

The Sorel Cement Company, Inc., has opened a plant at 400 High Street, Oakland, for the manufacture of building stucco cement. Officers of the concern are: John S. Graham, president; F. A. Kaufman, vice-president and H. F. Wierum, manager.

Negotiations are under way to enlarge the plant of the E. C. Fisher Lumber Company at Oroville, it is announced by E. C. Fisher, president of the concern. The company specializes in mouldings.

Galbraith & Jones, general engineering contractors, announce a dissolution of partnership which was formed in October 1914. The dissolution became effective July 15.

The Metropolitan Redwood Company of San Francisco is now represented in Los Angeles by W. W. Wilkinson. Associated with Wilkinson is R. Reed, formerly with the Albion Lumber Co.

Sacramento Tile and Marble has been incorporated with a capital stock of \$20,000. Directors of the company are F. C. De Camp, John De Camp and S. H. Jones, all of Sacramento.

The Oakland branch of the Royal Floor Company is now located at 354 Hobart street with Ernest E. Cinnamond in charge, succeeding E. C. Wangan who has retired.

Bids will probably be called for Aug. 28th.

PRATT'S CONCRETE MIX

*Clears
of Sand
Pratt*

NOTE:—Bobb'd hair is all you hear r, when you are within gunshot of our fair ladies. Boys talk about short dresses, golf, poker and other important things. Therefore Sandy Pratt, producer of clean sand, hard rock and washed gravel, is repeating below a story that Sandy printed in these columns at a previous date. Read it. You may know "Mrs. Bob Hair."

MRS. BOB Hair lives.

SO BOB Hair gave in.

NEAR SANDY Pratt, President.

AND THE hair was bobbed.

OF THE Pratt Building Material Co.

BUT THE monthly bills.

PRODUCERS OF rock and sand.

FOR MARCELLS, trimming, etc.

AT MARYSVILLE and Sacramento.

GAVE POOR Bob Hair headaches.

PRATT ROCK (NEAR Folsom).

AND SANDY predicts that soon.

AND PRATT CO (Monterey County).

ALL MEN will wear long hair.

ALL IN beautiful California.

AND A lady with long hair.

AND BOB Hair, her husband.

IS NO lady at all.

WAS OLD fashioned.

"I THANK you."

MRS. BOB Hair wanted.

TO BOB her hair.

FRIEND HUSBAND was opposed.

SHE BEGAN to argue.

AND SHE won.

SHE SAID her headaches.

WOULD DISAPPEAR.

IF THE weight of her hair.

AND HER hair net.

COULD BE removed.

FROM HER brain casing.

Miss Rock Candy of Prattrock (near Folsom on the Placerville-Tahoe highway) doing "99 miles per hour" (see Sandy's sign "Prattrock, Sandy Pratt, Mayor, Speed Limit 99 Miles Per Hour, Foods do Your Best"). This "sweet girl" is going to town for a hair cut—her folks just gave her consent.

BAKERSFIELD, Kern Co., Cal.—Until Sept. 4, bids will be received by C. J. Russell, clerk, Vineland School District, to erect two classroom addition to present school. Cert. check 10% payable to district rep. with bid. Plans obtainable from clerk.

Official Proposals

NOTICE TO BIDDERS

(Strauss Trannion Bascule Bridge—City of Stockton)

NOTICE IS HEREBY GIVEN, that sealed proposals are invited to be delivered at the office of the City Clerk of the City of Stockton, in the annex to "The Stockton," up to and including the 8th day of September, 1925, at 5:00 o'clock P. M., for the construction of a single leaf Strauss Trannion Bascule Bridge, together with necessary foundations and approaches at Washington Street, over Mormon Channel, in the City of Stockton, California, according to the plans and specifications therefor, on file in the office of said City Clerk, to which reference is hereby made. All proposals or bids so received will be publicly opened by the City Clerk at 8:00 o'clock P. M., of said day in the Council Chambers. All bids shall be made upon printed forms prepared and furnished by the city.

Copies of the plans and specifications may be obtained from the City Engineer of the City of Stockton, 136 North Hunter Street, Stockton, California, by depositing with said engineer \$15 for each set thereof, said deposit to be returned on those plans and specifications returned to the City Engineer before September 15, 1925.

The contract for the performance of said work and the furnishing of said materials shall be executed within ten (10) days after the award thereof shall have become final, and the performance thereof shall be commenced within ten (10) days after the execution of the contract for the same, and completed within one hundred eighty (180) working days thereafter.

The successful bidder is required to give a bond for the faithful performance of the contract and also a labor and material bond, both in the sum of fifty per cent of the contract price.

All proposals shall be accompanied by a check certified by a responsible bank, payable to the order of the City Auditor, or by coin of the United States for an amount not less than ten per cent (10%) of the aggregate of the proposal. (Bidders' bond will not be accepted.)

In the event that the person, firm or corporation to whom said contract may be awarded, fails, neglects or refuses to enter into contract to perform said work and furnish said materials as hereinabove provided, then the certified check and the amount therein mentioned, or the coin, accompanying the bid of said person, firm or corporation, shall be declared to be forfeited to said city as liquidated damages.

Said contract will be let to the lowest bidder, provided, however, the council may reject any and all bids and in that event or in the event that no bids are made, may re-advertise for bids, or provide for the work to be done by the city or for the supplies to be purchased in the open market, but in no case shall supplies be bought at a price as high as the lowest bid received from a responsible bidder.

A. L. BANKS.

City Clerk of the City of Stockton.

Dated: August 19, 1925.

NOTICE TO CONTRACTORS

NOTICE TO CONTRACTORS

Oroville-Wyandotte Irrigation District

Sealed bids will be received by the Board of Directors of the Oroville-Wyandotte Irrigation District at the office of the Board, Oroville, California, until two o'clock P. M., September 14th, 1925, for the following work:

Reconstruction of South Feather ditch in the vicinity of the Lost Creek Dam in Butte County, California, 30,000 cubic yards of earth, loose and solid rock excavation, 40,000 linear feet of ditch deepening, 10,000 linear feet of ditch widening, 180 linear feet of tunnel excavation, 4000 cubic yards of rubble fill, 1700 square yards of paving, 1800 linear feet of ditch lagging, 100 linear feet of twenty-two inch Machine Banded Redwood pipe, and 100 cubic yards of concrete.

Contractors are to be the lowest responsible bidder. Plans and specifications can be seen at the office of the board, Oroville, California.

W. J. MONRO,

Secretary, Oroville-Wyandotte Irrigation District.

STATE OF CALIFORNIA

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock P. M. on September 21, 1925, at which time they will be publicly opened and read for construction, in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Los Angeles County, between San Fernando and La Canada (VII-L.A.-9-A), about fifteen and two-tenths (15.2) miles in length; to be widened with Portland cement concrete.

Plans may be seen, and forms of

proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineers' offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

NOTICE TO CONTRACTORS

(Maricopa High School District)

Notice is hereby given that sealed bids will be received by C. B. Warner at the office of the high school at Maricopa, Kern Co., California, up to the hour of 1:30 P. M., September 2nd, 1925, for the erection and completion of an eight-room and auditorium high school building for the Maricopa High School District, according to plans and specifications furnished for the same by J. M. Saffell, architect, 924 Nineteenth Street, Bakersfield, Calif. Said building will be figured with frame construction with exterior masonry of Kelstone Plaster, also with hollow tile and plastered for all outside walls as above. Bids will be opened at the office of the high school, Maricopa, Sept. 2nd, 1:30 P. M., 1925.

All bids must be accompanied by a builders' bond or certified check payable to C. B. Warner, Clerk of Trustees of said School District, for the sum of at least ten per cent of the amount of bid, to be forfeited should the successful bidder fail to give a satisfactory bond of fifty per cent of contract price and enter into a contract with the Trustees of the Maricopa High School District within five days after the awarding thereof, should it be required by the Trustees.

All bids must be enclosed in sealed envelopes and addressed to C. B. Warner and marked: "Proposals for Erection of Maricopa High School Building."

The right reserved to reject any and all bids for said work.

C. B. WARNER, Clerk.

R. W. CRUM APPOINTED CHAIRMAN OF CULVERT PIPE INVESTIGATION COMMITTEE

Announcement is made by Chas. M. Upham, Director of the Highway Research Board of the National Research Council, of the commencement of a new investigation by that Board on culvert pipe; and that R. W. Crum, Engineer of Materials and Tests, Iowa State Highway Commission, has been designated Chairman of that investigation. The objects of this study are: to correlate the various tests and experiments on pipe loads and stresses; to set up a standard of comparison of the life of different kinds and classes of culvert pipe; and to determine the most probable conditions of service for which standards should be designed.

Mr. Crum's experience in research work well qualifies him to head this important investigation. After graduation from the Iowa State College in 1907, he was for a time on the Engineer Corps of the Pennsylvania Lines, following which he returned to his alma mater as Associate Professor of Civil Engineering. He remained in this position for twelve years, during which time he was engaged on research work for the Iowa Engineering Experiment Station. Since 1919 he has been Engineer of Materials and Tests with the Iowa State Highway Commission where he has conducted many highway research studies. Mr. Crum is the author of a number of important research papers. He is a member of the American Society of Civil Engineers, the American Society for Testing Materials and the American Concrete Institute, and is active on several research committees of those organizations.

Engineering News Section

BRIDGES

STOCKTON, San Joaquin Co., Cal.—Until Sept. 8, 5 P. M., bids will be rec. by A. L. A Variety of Work on the Same Machine

In addition to business correspondence the modern
office has a large variety of work for the typewriter.

Tabulating, billing (simple and condensed) sten-
o cutting, writing on ruled forms and many other
kinds of office work can all be done on the L. C.
Smith & Bros. typewriter.

The decimal tabulator and the variable line
spacer are part of the inbuilt service of every L. C.
Smith & Bros. machine.

TO ISSUE BONDS

In expectancy of receiving the report of Charles D. Marx, G. B. Hegardt and Charles T. Leeds on Oakland's harbor needs, the Oakland city commissioners are preparing to hold a bond election this fall.

The amount of the proposed bond issue will depend on the harbor expert's survey. It is not believed the issue will be able to take care of the city's storm sewer system. The harbor development program will take precedence on all other demands.

The Clyde Builder's Hoist

Photo shows Clyde single drum reversing builders' hoist working for Krah Construction Co., Chicago, on the new Venetian Bakery building.

The Clyde single drive reversible steam hoist with boiler and elevator sheave is a unit of the Clyde line which has demonstrated repeatedly its ability to more than meet the requirements.

It is built with the usual Clyde thoroughness in detail construction. Cut gears; extra large shafting, turned and ground, asbestos lined brakes and heavy pawls, all contribute to the satisfaction found in the finished product.

When desired, the hoist can be equipped with friction clutch elevator sheaves, instead of jaw clutch. Full details upon request.

KOEHRING DANDIE

Light Mixer

**Four-cylinder
Gasoline
Engine**

FAST! Fast! Fast! Here is a light mixer with a speedy charging skip, liberal drum dimensions and a high speed discharge that will break all your records of putting concrete where it pays you profits!

Just the balanced light weight to haul behind your truck on its rubber tired disc wheels and get from job to job in a big hurry.

Four cylinder, radiator cooled, gasoline engine. Transmission from engine to drum enclosed in oil bath! Double gear drum drive, chilled, beveled gears! Drum rollers fixed to shafts revolving in big bearings!

It's useless to try to give you the smallest idea of what this Dandie represents in superior speed and construction details—but it's *strong, rugged*—it will stand-up for all the punishment you can give it, and *work and work, and work!*

And you have a chance to buy at a price that gives you all the benefit of the economies the Koehring Company effect by big, standardized production! If you had half an idea of what this mixer means in the way of actual value, you would send back the coupon for full detail by next mail!

Koehring Dandie—7 cu. ft. capacity mixed concrete. High speed charging skip, or low charging hopper with hinged steel framed platform which may be folded against mixer for hauling. Discharged from either side of mixer.

4 cylinder gas engine, radiator cooled, or optional two cylinder engine, hopper cooled. Drum drive transmission in oil bath. Maybe equipped with *automatic water measuring tank*, and *Light Duty Hoist*.

**Send Back this
Coupon!**

\$10,000,000 HYDROELECTRIC PROJECT IS COMPLETED

Contemplated construction of a \$20,000,000 hydroelectric plant on the Sandy and Salmon rivers is announced at Portland, Ore., by Herman Kolberg of Los Angeles and Portland, general manager of the Oregon-California hydroelectric company, with offices in the Woodlark Bldg., Portland.

Highlights of the projected enterprise were outlined by Kolberg as follows: The company within two weeks will incorporate with capital of \$20,000,000. Construction will commence within three months upon the first plant, to be located on the Sandy river near Marmot, 38 miles from Portland, and to cost over \$10,000,000. Completion of this plant is anticipated within 18 months. Upon completion of the first plant, construction of a second plant will be started, to be located on the Salmon river near Welch, and upon the completion of that a third plant will be erected on the Salmon river near the Linney creek reservoir, at two to cost an additional \$10,000,000.

LUMBERMEN PLAN REFORESTATION AT MEET

Appointment of a committee to make a survey of the logged-off lands in Grays Harbor and Mason (Washington State) to obtain information relative to reforestation possibilities was the outcome of a meeting of lumbermen of those counties held August 22 at Tacoma. It is the plan of the lumbermen to present all information available before the coming session of the legislature. Norman S. Jacobson and E. T. Allen of the research department of the Western Forestation and Conservation Association of Portland were appointed to make the survey this fall.

The survey will cover capacity of the land to reproduce, type of trees, and soil conditions, and a report is to be made at another conference of the lumbermen before the meeting of the legislature. It is expected that the recommendations of the lumbermen will be perfected at this time.

The Tacoma conference was called by George W. Long, president of the Weyerhaeuser Timber Company, and lumbermen who attended the conference are as follows:

E. J. Murnen, C. H. Chapman and A. F. Firmin of the Weyerhaeuser Company; William Donovan, Jr., of the Donovan-Corkery Timber Company, Aberdeen; Alex. Polson of the Polson Logging Company, Hoquiam; A. W. Callow, Western Lumber Company, Hoquiam; Minot Davis, Clemons Logging Company, Montesano; Peter Schafer, Schafer Bros. Logging Company, Montesano; J. E. Calder, Grays Harbor County Assessor, Montesano, and Mark E. Reed and Sol S. Reed of the Simpson Logging Co., Shelton.

ENLARGE LUMBER SHIP LINE

Authority granted by the Interstate Commerce Commission to the Albion Lumber Company, a Southern Pacific subsidiary, to operate vessels along the Pacific Coast may mean expansion of the line. At present, the Albion company operates but one vessel, the steamer Pasadena. Under its former authority it could run only between Albion and San Francisco. With the authority just granted, permitting the shipping line to operate along the coast wherever business demands, purchase of additional ships is probable, it is stated.

PAVEMENTS IN USE

Results of investigations conducted this year by the New York State Bureau of Municipal Information at Albany relative to the experience of various cities of the country with the construction and maintenance of street pavements show that out of ninety-two leading municipalities reporting, forty-four use only the asphaltic types, eight use asphaltic and brick pavements, nine use the asphaltic types and stone block with asphalt filler and eight use the asphaltic types and Portland cement concrete.

FEDERAL ROAD AID WARNING IS ISSUED

Harvey M. Toy, chairman of the state highway commission, fears that Eastern politics, coupled with a misconception of the purpose back of federal aid, may imperil the present highway policy of the national government.

In a statement issued, Toy said there is every indication the crucial test will come at the next session of congress.

"The West must be united," he declared, "if federal aid for road construction is to be continued."

The statement read in part: "This opinion is shared generally by Western highway builders who have been in close touch with the situation. The time to sound the alarm is now. We must be up and doing or we will lose the funds without which highway construction cannot be continued in many sections west of the Rocky Mountains.

"The West is not concerned with academic discussions of state's rights indulged in by Eastern politicians; it will continue to demand federal aid in the construction of highways as an income to which it is entitled. These funds are asked of the federal government because it owns millions upon millions of acres in western states—mineral lands, national forests, Indian lands, national parks—which are not taxable, from which no revenue comes to the states, but across which they are expected to construct splendid highways for the accommodation and pleasure of eastern tourists, coming westward in ever increasing numbers."

UNITED STATES GYPSUM COMPANY ENJOINS COMPETITORS

The United States Gypsum Co. has obtained from Federal Judge James H. Wilkerson, Chicago, a perpetual injunction against four competing companies, enjoining them from infringing upon its patents involving certain improvements in the manufacture of plaster. The defendant companies are the Bestwall Manufacturing Co., the American Cement Plaster Co., the Beaver Board Co. and the Beaver Products Co. Charles B. Morrison was appointed master in chancery to assess damages which are reported to amount to several million dollars. The original patent, granted to C. W. Utzman, in 1912, has been a cause of continual litigation.

URGES IMPROVEMENTS

Jay B. Nash, head of the Oakland recreation department, following his return to Oakland from a tour of the East during which he inspected playground facilities in the larger cities, declares Oakland's chief need is a municipal swimming pool. Nash believes the entire area from the auditorium south to the estuary should be laid out to meet the recreation needs of the community. It should include playground facilities, a stadium, tennis courts, mile track, grand stand and stables to take care of stock events.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

For the week ending Aug. 1, 114 mills reported to the West Coast Assn. They cut 102,358,276 ft., shipped 128,748,138 ft. and sold 123,593,350 ft. Sales included 1903 cars for rail delivery, 39,039,237 ft. domestic cargo, and 20,447,509 ft. for export while 6,886,584 ft. was consumed locally. The unfilled balance in the rail trade was 4926 cars, in domestic cargo 126,194,672 ft. and in export 87,804,275 ft. One hundred twenty-four Southern Pine mills cut 67,911,941 ft., shipped 72,835,800 ft. and sold 72,002,200 ft. The Redwood cut at 15 mills was 6,985,000 ft., shipments, 6,135,000 ft. and sales 7,376,000 ft. Their whitewood cut was 2,018,000 ft., sales 1,529,000 ft. and shipments 1,169,000 ft. Unfilled orders were on the books for 23,542,000 feet of redwood and 7,609,000 ft. of whitewoods.

The Santa Barbara Daily News, under date of Aug. 28th, carries the following story: The English freighter Salmon-pool docked at Stearns' wharf this morning with 71,000 sacks of cement for Santa Barbara. The ship left Antwerp July 10 with 200,000 sacks of cement for California. When she arrived this morning the boat had on board 116,000 sacks. The first part of the cargo of 85,000 sacks had been unloaded at San Pedro and the last will be left at San Francisco.

Proposed new freight schedules canceling through joint rates on lumber and related articles from Burlington, Oregon, to destinations in Pacific coast territory were ordered suspended by the interstate commerce commission until December 30. Operation of the new schedules would result generally in an increase in the freight, the fairness of which the commission will determine in hearings to be held during the suspension period.

Mayor C. M. Andera of Santa Barbara is quoted as being favorable to steel frame structures. "If I were drafting a new city building ordinance I would compel the use of steel frames," the mayor said. "Had the damaged large structures been of steel they would still be standing."

The Clover Valley Lumber Company has filed a complaint with the State Railroad Commission against The Western Pacific Railroad Company alleging that defendant collected excessive rates for the transportation of two carloads of sand from Marysville to Loyalton, and asking reparation.

The Fresno county supervisors have set October 6 as the date for a \$500,000 bond election to finance the erection of an addition to the present county courthouse and the erection of a tubercular sanitarium, the former to cost \$350,000 and the latter \$150,000.

California has received \$57,000 of the appropriation made by Congress for the purpose of a survey of the public lands according to an announcement by the General Land Office.

Higher import tariff on cement was urged before the United States Tariff Commissioners Thomas O. Marvin and A. P. Dennia, by a group of Southern California cement industry leaders in a public hearing at the Los Angeles Chamber of Commerce. Norman McBeth of the Riverside Portland Cement Company, Charles Lowe of the Monolith Company and J. D. Dart of the California Portland Cement Company appeared. They stated that approximately one-third of cement imported into the United States comes through Los Angeles and therefore that district is particularly affected. Lower wage costs and favorable rates of exchange act to the advantage of foreign cement producers, they said.

As a step in a state-wide study of clay deposits and their value commercially, W. F. Deltrich, associate professor of mining at Stanford University, has secured samples of clay found in the Oroville district. On the completion of the investigation, it is planned to publish the results gleaned from the survey to show where clay of commercial value can be found. The plant of Nelson Lund at Palermo, seven miles south of Oroville, is now operating and the plant of the Table Mountain Clay Products Company is being constructed. Brick, tile, and tile roofing are to be made from local clay deposits.

A tentative plan to start a state-wide movement for more highway construction was outlined at a meeting in Sacramento Aug. 29, attended by officials of the bay counties and several San Joaquin valley counties. The plan is to raise \$20,000,000, to be spent in a five-year period commencing in 1927. Part of the scheme to raise money is taxing machines by weight, making the tax on machines range from \$1 to \$3.

The production of asbestos in 1924, are reported by producers to the Bureau of Mines. Department of Commerce, amounted to 300 short tons, valued at \$42,526. These figures comprise 173 short tons of chrysotile asbestos, valued at \$33,941, mined in Arizona, California and Montana, and 127 short tons of amphibole asbestos, valued at \$8585, mined in Georgia and Maryland.

Cut of lumber by member associations in the four weeks ended August 1 totaled 1,003,739,119 feet, according to the National Lumber Manufacturers' Association's trade barometer. Shipments of lumber for the same period were 1,003,679,359 feet and orders 1,028,742,235 feet.

Fire originating in a hay barn of the Sunset Lumber Company, menaced the million-dollar plant and for a time threatened to spread among the waterfront industries about First and Jackson streets, Oakland. The loss was estimated to be around \$20,000 by the lumber company.

ALONG THE LINE

By resolution adopted by Los Angeles board of public works the office of construction engineer for Mulholland highway, Beverly Blvd. and Chautanga Pass road will be abolished Sept. 1. DeWitt L. Raeburn, member of the engineering firm of Raeburn & Bowen, has held the position since it was created. Economy is the reason given for the action of the board. It is stated in the resolution that its adoption is in no way to be construed as reflecting upon the character or service of Mr. Raeburn.

E. Earl Glass has resigned as executive secretary of Southern California Chapter, Associated General Contractors, effective Sept. 1, to accept a position with the Pacific Coast Sand & Gravel Association with the title of executive manager. Mr. Glass has been secretary of the contractor's association for a number of years. His successor has not been announced, but an appointment will be made within a few days.

Something new in the way of an office has been created by Governor Morley of Colorado by his appointment of John Lehman, of Denver, to serve as inspector of projects submitted for contract. After bids are received and submitted to Governor Morley for signature, the new inspector will check up the work to determine whether acceptance of the low bid is good business for the State.

A third consulting engineer to check engineering data on the proposed Silver Creek project as prepared by Albert Givan, general manager and chief engineer of the Sacramento Municipal Utility District, will be selected shortly. C. E. Grunsky of San Francisco and William Mulholland of Los Angeles have already been named.

William L. Fairbanks, consulting engineer, has been chosen to make a survey of the Redwood City Harbor to gather data necessary to secure Federal funds to finance development work. The data will be submitted to the War Department. Funds to finance the survey were raised by private interests.

J. L. Connor, street paving contractor of Santa Cruz, is named defendant in a suit for \$20,245.05 damages filed against him in the superior court by Ethlyn Ashcraft as a result of an automobile collision.

Jacob M. Born, former building inspector of Martinez, died in that city August 28, following an extended illness. Born was a native of Germany and 47 years old. A widow and one daughter survive.

Supervisors of San Luis Obispo, Kern and Santa Barbara counties, plan highway from San Joaquin valley to coast at approximate cost of \$2,000,000.

ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

NEW MEMBERS

The following are registered among the new members in the Alameda County Builders' Exchange: Blue Diamond Co.—Building Materials; J. A. Bryant—General Contractor; California Bridge & Tunnel Co.—General Contractors; California Steel Co.—Structural Steel; Antone C. Correia—General Contractor; Forkner & Brose—General Contractors; E. R. Fritz—Electrical Contractor; Johnson & Christie—Sheet Metal Contractors; Willis C. Lowe—Architect; Reynolds & Jorud—Excavating and Grading; L. R. Sorensen—Cement Contractor; Stewart Mantel & Tile Co.—Mantels and Tile; Frank J. Thomas—Tile Roofing Contractor; R. O. Torr, Plastering Contractor; Uhl Bros., Inc.—Wall Paper and Paints.

SEEK FUNDS

The Veterans' Memorial Association of Alameda County has requested the Alameda County Supervisors to provide \$400,000 within the next four years to finance erection of veterans' memorial buildings in various sections of the county. Oakland would secure a structure costing \$165,000; Berkeley, \$100,000; Alameda, \$75,000; Hayward, \$25,000; Washington Township, \$10,000; Pleasanton, \$10,000 and Livermore, \$10,000. San Leandro has already made provision for such a building through public subscription.

CERTIFICATES GRANTED

The following applicants were granted architect's certificates by the California State Board of Architecture, Southern Division, at the Aug. 25 meeting: Henry Carlton Newton, 303 San Fernando Bldg.; John P. Pedersen, 1012 Longwood St.; Royal Dana, 921 Van Nuys Bldg., and Frank H. Chantrill, 6030 Hollywood Bldg., all of Los Angeles, and Charles Hay, 1859 Myrtle Ave., Long Beach.

NO WAGE INCREASE LIKELY

That there is little likelihood of increased wages among the building trades in Portland, Ore., and vicinity was the consensus of opinion of Portland contractors who gave their views on the survey report for S. W. Straus & Co., of New York, which holds that the present period of rising wages in the building industry throughout the nation is at an end.

PLUMBERS TO PICNIC

The annual picnic of the San Francisco Master Plumbers' Association will be held this month, probably at Congress Springs. Definite plans will be announced in the near future. Abe Newmark is chairman of the entertainment committee.

FATHER DIES

Rev. W. H. Ratcliff, a resident of Berkeley for thirty years and over fifteen years one of the officiating clergy of the Church of the Advent in San Francisco, died in Berkeley Aug. 31. The Rev. Ratcliff was the father of W. H. Ratcliff Jr., Berkeley architect.

Sacramento Builders Reorganize And Outline Policies For Future

The Builders' Institute, formerly the Sacramento Builders' Exchange, is now located at 1508 J Street, Sacramento, having undergone a reorganization that included a change from the old quarters to a new downstairs location and a change in the name. Henceforth the builders of Sacramento will seek unity among themselves with the purpose of serving the building public in a better way and becoming of more service to the building trades.

Formal opening of the reorganized exchange will take place this month. The officers of the association are: Howard K. Johnson, president; W. J. Clifford, vice president; L. M. Chapman, treasurer, and A. W. Palm, secretary.

Discussing the object and aims of the Builders' Institute, President Johnson said:

"The building business, one of the largest of the industries, is one of the most backward from the point of organization and co-operation of all the great businesses in this nation. The producer of material used in the building business has fortunately made fair progress in his thought of co-operation. He has been compelled to seek co-operation, not alone as a protection to himself, but as a protection to the consumer.

"The user of the materials of the producer has been more reluctant in accepting the idea of co-operation, mainly, from a selfish point of view. He has had the tendency to think himself a little kingdom which could function and prosper without the aid and council of the others of his great industry.

"He has begun to see the fallacy of such thought and is beginning to accept the idea that co-operation has enlightened him to his possibilities and that it has brought about a better feeling and relation between him and his source of livelihood, the public.

"The producer and the user have begun to appreciate that through their combined co-operative spirit they are better able to serve the ultimate consumer. Such a combined co-operative spirit is made possible in the city of

Sacramento through the organization of the Builders' Institute.

Protection For Public

"The Builders' Institute of Sacramento, with the objective in view of service to the building public, is formed to secure greater development, knowledge and efficiency in the conduct of the building industry. As one step toward such an accomplishment it is the ambition to join in one organization all reputable persons, firms and corporations engaged in contracting, manufacturing, merchandising, or other business connected with the building industry of Sacramento.

"The object is to make a membership in the Builders' Institute a reasonable assurance to the public of the skill, honesty, responsibility and reliability of its members, by requiring that those admitted to membership shall have established an honorable reputation on these fundamental points, and by making continuance in this membership depend upon fair dealings between members and between members and the public.

"As another step toward securing greater development, knowledge and efficiency in the conduct of the building business, the Builders' Institute will seek to accomplish through the following field of activity:

"First, educational, to foster and to organize the proper educational and informational facilities for those engaged in building and construction; to aid in the development of better building regulations, and to hold conferences and to bring before its members and the public problems and accomplishments in building and construction.

"Second, research, to conduct and to aid systematic and economic research and surveys relative to building and constructing, and to provide and distribute to its members and the public the result of such research and survey.

"Third, contact, to make possible convenient business contact between the members of the institute by operating an exchange where all members may meet daily."

STATE BOARD GRANTS EIGHT CERTIFICATES

The State Board of Architecture at its regular monthly meeting granted the following certificates to practice architecture in this state: F. Frederic Amandes, 1609 Virginia St., Berkeley; Anthony J. Horstmann, 1299 Arguello Blvd., San Francisco; Horbert O. Alden, Sharon Bldg., San Francisco; Harry William De Haven, 437 Forum Bldg., Sacramento; Mrs. Gertrude Comfort Morrow, 301 Lenox Ave., Oakland; J. Kendall Masten, 3954 Washington St., San Francisco; John Ebersson, 212 W. Superior St., Chicago, Ill.; William H. Weatherwax, 4005 California St., San Francisco.

NEW EXCHANGE MEMBERS

The following firms have been admitted to membership in the San Francisco Builders' Exchange: Wm. A. Aschen, heating contractor, 2612 Peralta Ave., Oakland; Umbsen, Kerner & Elert, real estate operators, 30 Montgomery street and Industrial Construction Co., 815 Bryant street, San Francisco. The following applications are being considered by the Exchange: Bishopric Mfg. Co. of Calif.; American LaFrance Fire Engine Co. of California; Blue Diamond Co.; John C. Shipp Co.; Benj. Vincent; McWilliams-Marosky Co.; Ray Cook Marble Co.

SAN FRANCISCO BUILDING

San Francisco building operations for the month of August, 1925, represent an expenditure of approximately \$3,840,076, according to figures compiled by John F. Hogan, chief inspector of buildings of the Department of Public Works. The August total falls \$1,262,911 below those for the month of July of this year and \$148,300 as compared with those of the month of July, 1924.

During the past month 939 permits were issued. Of these 488 covered alterations, additions and repairs to standing structures involving an expenditure of \$358,328. The balance of the operations went into new construction.

Construction carried on by the municipality for work at the Galileo High School, included in the month's activities, represents an expenditure of \$151,824.

Following is a complete and segregated report as compiled from the records of the Department of Public Works:

Class	No. of Permits	Est Cost
A	1	\$ 115,000
B	1	150,000
C	22	529,850
Frames	425	2,417,274
Alterations	488	358,328
Harbor Bldgs.	1	17,800
Public Bldgs.	1	151,824
TOTAL	939	\$3,840,076

WHAT'S IN A NAME

A well-known Chicago lawyer tried to register a trade-mark, "Limestone Brand," for a medicine. The examiner of trade-marks refused to accept it because the medicine contained no limestone. The lawyer then wrote a letter to the examiner and some of his remarks were as follows:

"Ivory Soap" contains no ivory, Gold Dust Washing Powder is not made of gold dust; Old Crow Whiskey is not distilled from crows, and there is no bull in Bull Durham. There is no milk in Milk of Magnesia, milkweed, or in cocoanuts, no cream in Cream of Tartar, cold cream or chocolate creams. White Rock is water, and there is no pork in pig iron. Apple Butter is not butter, all the butter is taken out of buttermilk, and there is none in buttermilk or buttercups, and the flies in a dairy are not butterflies.

And permit us to add—that there really is not any Mule in Mule-Hide.—Tuff Stuff, the Lehon Co., Chicago.

SKELLENGER ASSOCIATED WITH MICHEL & PFEFFER

Mr. F. H. Skellenger has become associated with the Michel & Pfeffer Iron Works, Harrison and Tenth Sts., San Francisco, to accept the management of the Fence Department. Mr. Skellenger has been associated with the construction industry in San Francisco for many years and will prove a valuable addition to the Michel & Pfeffer sales staff.

With special trained and thoroughly experienced crews, Mr. Skellenger will handle the all-purpose Page Protection Fence, manufactured by the Page Steel & Wire Company of Bridgeport, Conn., and for which Michel & Pfeffer are the sole distributors in Central and Northern California. The fence is adapted for use as a protection unit for small and large gardens, lawns, tennis grounds, sport fields, estates, institutions, factory yards and interior department panels.

California Homes Resist Earthquakes Says Loan Head

"Out of 1,000 houses on which we had loans," says the secretary of the Santa Barbara Mutual Building and Loan Association, "only 150 were damaged in the recent earthquake. At least those are all that have reported damage in reply to our circular of inquiry, and it is reasonable to suppose that every householder sustaining loss would report under such conditions."

"Virtually all, if not literally all, of the thousand were of frame construction, whether sided or stuccoed. Most of the instances of damage are slight and usually relate to the chimney and fireplace. The shock generally broke chimneys off at or near the roof line and the falling bricks or stones sometimes did considerable damage. About the only other serious damage suffered by frame buildings was due to frail foundations or old and rotted mudsills. If a frame house was not anchored to the foundation or if the latter consisted of nothing but blocks it was sometimes jolted rather hard when it hit the ground, but at that there were only one or two collapses. Five or ten dollars was frequently the total of the damage sustained by frame residences and \$100 was rather exceptional. Not a house on our list was damaged more than its remaining margin of loan value—so our people are having no trouble in financing repairs."

When asked what the lessons of the disaster were, the building and loan man replied:

"The first is that frame constructed buildings, such as constitute probably 90 per cent of our California detached residences, are ideal for resisting the shaking and twisting strains of an earthquake. The type of residence that is the one we should have chosen had we given study to the question. Frame residences do not break up or collapse and they do not throw missiles of any kind to the ground, barring the customary chimney or a slate or tile roof. The danger of injury inside or outside of them during a quake is almost nil. Our shake came early in the morning when most of our citizens were in their residences instead of in office and commercial and industrial buildings of different construction. That explains the small casualty list. The residences stood up but most of the business structures sustained injuries that would have meant an enormous number of fatalities and wounds if they had been occupied. Another lesson is that if chimneys are retained at all they must be bound up in a unit with the frame of the house and constructed of the

best materials. A third lesson is that it pays to build well, use plenty of nails and brace thoroughly. As a rule chimneys here were separate from the structure, except as they were united to it by the wire netting of stucco houses where the stucco also covered the chimneys. Houses that were diagonally sheathed, had the joists reasonably near together, plenty of bracing, good nailing and other features of what every carpenter and contractor knows as good construction suffered little or no injury. People can live in such houses in any earthquake zone and be free from worry. Nothing equals lumber for residences when you are considering earthquake risks, whether to life and limb or to property."

A careful examination of store and hotel buildings of frame or ordinary construction, showed that straight wooden structures sustained negligible damage. Stucco buildings stood nearly as well, the stucco rarely falling, and sometimes not showing any cracks. Stone and brick veneering was usually ripped off the frame structure, which always stood up, usually intact. In the Californian hotel the plaster on ceilings and partition walls was generally uncracked in the outside rooms that had their walls of brick turn off. In the case of the stucco Neal hotel, where the stucco did fall off to a considerable degree, the underpinning was plainly weak and the general structure not strong enough for the weight and nature of the building, regardless of earthquakes. Nevertheless this building did not collapse, though badly shaken.

Expert opinion is that whatever material is used, whether the building be large or small, the structure should be a unit. If it hangs together, with some degree of elasticity but without impact or thrust between its parts, it will stand up. But when part of it oscillates one way and another part another—as in the case of a frame inner structure and a brick covering wall—failure is certain. The ordinary frame building is a structural unit and hence well adapted to serve shocks. Even if it should fail the failure would not be one of general disintegration with a large number of detached members falling in a destructive and chaotic manner.

California people feel that in view of recent earthquakes in Montana, Wyoming, Illinois, Virginia, New England and Quebec, and cyclones in many regions, people generally should be interested in learning from their experiences of the Santa Barbara disaster.

Union Wage Rates During 1924

The Bureau of Labor Statistics of the U. S. Department of Labor has issued a report on union scales of wages and hours of labor as of May, 1924. Summaries of this report appeared in the September and December, 1924 numbers of Monthly Labor Review. The publication shows wage rates for 894,313 organized wage earners in 66 important industrial cities.

The hourly rate of wages in all trades collectively was higher than in any preceding year, being 8.3 per cent higher than in May, 1923, and more

than 2½ times the rate in 1913. Hour decreased 0.5 per cent between 1922 and 1924 and 6.1 per cent in the same period.

The bulletin contains a general index of rates and hours for all trades combined for each year from 1907 to 1924 and like index numbers for each individual trade. In addition there is a general table showing regular rates, overtime and overtime rates for each locality and each trade or subdivision for 1924 in comparison with like figures for 1923.

TRADE NOTES

Bridge Fever Strikes Oakland— Lake Merritt Structure Proposed

The most artistic and unique bridge in the world, for Lake Merritt.

A structure that not only will add to the beauty of the lake, but will fill the pressing need for relief of traffic on the main arteries, between East Oakland and the downtown business area. A "viadquodrome" designed by one of the foremost engineers in the world.

These are the visions of Oakland business men today following an enthusiastic meeting when Joseph Baermann Strauss, internationally famous bridge builder, who planned the \$21,000,000 Golden Gate bridge, pictured the possibilities of uniting East Oakland and Lakeside Park.

The viadquodrome, 90 feet in width and 1711 feet long, with removable grandstands to accommodate 20,000 people, spanning the lake about 1200 feet north of Twelfth street dam, and parallel with it, can be built for \$1,500,000, he said.

From the west side of the lake it would take the traffic flow from Lakeside drive, Nineteenth, Oak and Lake streets. The plans would have the structure span the lake in a straight line, to the foot of East Eighteenth St., the point of focus for Athol avenue, Lakeshore boulevard, First avenue and Second avenue, near the spot now marked by the East shore boat landing.

The plans show the viadquodrome of reinforced concrete, arching across the lake, is center span 25 feet above the

water line, sufficient to allow yachts to pass beneath.

It rises in a graceful slope from a park approach on the west shore and from its center the grade is gradual to the opposite side.

The electrollers which would adorn the structure are designed in keeping with the neckline of lights which blazed about the lake for the first time last night.

A roadway, 60 feet in width capable of accommodating six traffic lanes; two sidewalks each 15 feet wide, are planned for the imposing observation driveway.

From a spot about 200 feet from the west shore, a bridge sidewalk extending in a northwesterly direction will connect with Adams point.

Long projected, the first details of the proposed structure were made known by F. M. Ray, president of the Uptown Association.

Strauss was introduced and told of his plans.

Business and professional men, most of them civic leaders, spoke of the possibilities seen, both from utilitarian and artistic standpoints.

It was decided to name a committee of 15 to devise ways and means to raise the necessary funds, the suggestion being made to float a bond issue for the \$1,500,000 at the same time the voters of the city are asked to authorize floatation of bonds for harbor development.

To Display Hayward Made Bricks

E. P. Fisher, representing the syndicate who are the owners of the Oakland Brick Co., Oakland's latest new industry, of which announcement has recently been made, states that within the next two weeks several thousand face brick and fire brick, made from the clay deposit owned by the company near Hayward, will be on exhibition in Oakland. M. G. Kendall of the California Builders Co. heads the syndicate.

The company announces it has already had a considerable number of brick burned and the quality of the clay tested in every known way, and are gratified to find that both the face brick and the fire brick made from their clay equal in good qualities any brick that can be bought on the market in the Eastbay.

Fisher, whose offices are at 1636

Franklin St., Oakland, states that it will take some little time before the brick plant will be actually operating, but that all the financing has been arranged for, and there is available for this new industry over \$100,000.

M. S. Kendall in commenting on the new industry said: "The hill which is composed of this clay is located near Foothill Boulevard, about five miles from the center of Oakland, and according to George D. Louderback, geological expert of the University of California, covers about twenty acres, and rises to a height of approximately 150 feet, and was caused by volcanic action. So far a tunnel has been driven practically through the hill, from which it has been shown that the entire hill is composed of the clay which is necessary for the making of brick."

NEW ZEALAND CONTRACTOR SEEKS ROAD BUILDING EDUCATION

Determined to learn road building by actually participating in it, A. A. Natrass, contractor of Taihapi, New Zealand, has been spending some time in California working on state highway projects as a common laborer. Natrass has been traveling about the state observing methods in use on state highway construction. Whenever a particular job interested him, he secured employment, and studied California practices by actually participating in the building of the highway, placing the pavement, or whatever else may have been under way. Upon visiting the Sacramento headquarters, he declared California the best place in the world to study modern highway construction. Natrass is the second New Zealander to make a study of California state highways in recent months.

SAFETY INSPECTIONS SHOW BIG INCREASE

That the safety department of the Industrial Accident Commission is showing greater activity than at any other period since its organization is indicated by the report of the department for the fiscal year 1924-1925, which has just been completed. A total of 15,768 inspections were made by the department during the fiscal year as compared with a total of 10,332 inspections made during the fiscal year 1923-1924, which is an increase of 53 per cent and is the greatest number of inspection made in any one fiscal year in the history of the commission. By divisions the number of inspections were as follows: Mining, 2007; construction, 3773; elevator, 4733; boiler, 2686; mechanical, 2009; electrical, 458; lumber, 905.

Effective September 15, E. S. Jenison, former sales manager for the Goulds Manufacturing Company of Seneca Falls, N. Y., will become associated with the Smith-Booth-Usher Company of San Francisco and Los Angeles as vice-president and resident partner in San Francisco. Mr. Jenison has had a wide experience in the construction field and will prove a valuable addition to the Smith-Booth-Usher forces. For two years Mr. Jenison was associated with the Otto Gas Engine Works in Porto Rico, one year with Henion & Hubbell of Chicago, three years with the Goulds Manufacturing Company with the Canadian Fairbanks Moree Company at Montreal as manager of the pump, engine and electrical departments, five years manager of the Goulds Manufacturing Company's Philadelphia branch and five years as general sales manager of the same company at Seneca Falls, N. Y. He is a member of the Engineer's Club of New York, the Manufacturers' Club, Philadelphia and the Owasco Country Club, Auburn, N. Y.

Clyde L. Nave and M. W. Sefholm, operating the Marlin Thor Electric Shop, 528 San Anselmo Ave., San Anselmo, announce dissolution by mutual consent. M. W. Sefholm will continue the business operating under the same firm name.

Universal Machinery Manufacturing Company, capitalized at \$100,000 with the principal place of business as Sacramento, has been incorporated. Directors are: J. J. Holland, G. W. Glibson, H. A. Woodward and H. W. Funke.

Construction has been started in Porterville on a plant for L. L. Warren and Robert Baird, Jr., who will specialize in electrical repair and pump work. The plant is being erected at G and Olive streets.

Mangels Brothers, contractors and builders, formerly located at 4732 Mission street, announce the removal of offices to 353 West Portal Ave., San Francisco.

The Seaboard Lumber & Logging Co., Santa Barbara, has incorporated for \$100,000. Yoet Linn Lumber Co., Sherman, is also noted among the incorporations.

Solano Iron Works, Third and Allston Way, Berkeley, contemplates erection of three corrugated iron plant buildings at Parker and Ninth streets, Berkeley, at a cost of \$20,000.

Don O'Hair of the P. E. O'Hair Company, San Francisco, expects to leave in a month for Eastern cities. He will visit principal supply centers in the East and Middle West.

The California and Oregon Lumber mill will start construction at once on a \$25,000 lumber shed at the foot of Kirkham street, Oakland.

Leland Green, manufacturers' representative, has moved from the Wells Fargo Bldg. to the Call Bldg., San Francisco.

LOS ANGELES, Cal.—Architect E. M.
 Frazier, 707 Insurance Exchange Bldg.,
 has completed plans for 4-story and
 basement brick store and apartment
 building on Western Ave. between 2nd
 and 3rd Sts., for Frank H. Brooks, 244
 S. Western Ave.; stores and lobby on
 1st floor with apartments above; press,
 brick and cast stone, composition roof,
 plate glass, gas radiators, cement, pine
 and hardwood floors, tiled baths and
 drainboards, wall beds, 2 automatic
 electric elevators, pine trim, refrig-
 erators.

LOS ANGELES, Cal.—Arthur C. Le
 Brun & Co., 5656 Hollywood Blvd., is
 preparing working plans for five-story
 and basement, 135-room, 56-apt. apart-
 ment building with basement and part
 of first floor as garage to house 70 cars
 on Hayworth Ave. near Fountain Ave.
 for E. G. Niemann Investments, Inc.;
 80x200 ft., reinforced concrete basement
 garage, ramps, brick walls, structural
 steel, old rose brick facing, cast stone
 trim, tile and composition roofs, hard-
 wood, linoleum and linoleum floors, gum
 and pine trim, tile baths and drain-
 boards, marble work built-in refrig-
 erator, 1 automatic elevator, radio
 equipment, ornamental iron, incinerator,
 gas steam radiators, fire escapes.

LOS ANGELES, Cal.—Arthur C. Le
 Brun & Co., 5656 Hollywood Blvd., have
 completed plans for four-story and
 basement, 100-room, 63-apartment
 building on Wilton Ave. near Frank-
 lin Ave. for E. G. Niemann Invest-
 ments, Inc.; 138x60 feet, structural
 steel, brick walls, brick facing, terra
 cotta and art stone trim, composition
 roof, hardwood floors, mahogany and
 pine trim, tile baths and drainboards,
 wall beds, electric refrigerating sys-
 tem, 1 automatic elevator, ornamental
 iron, fire escapes, incinerator, steam
 heating, marble work.

LOS ANGELES, Cal.—Roy L. Jones
 and Dick M. Ward, 1555 N Western
 Ave., are preparing wkg. plans for 14-
 unit, 50-rm. bungalow court on Har-
 vard Blvd. nr. Adams St., for Louis
 Tobias, 950 S Harvard Blvd.; fr. and
 stucco, tilt and comp. fr., hwd. flrs.,
 pine trim, wall beds, tile baths and
 drainboards, gas radi., aut. water htr.,
 wtr. htr., 13 garages. Day work by
 owner.

BONDS

SAUSALITO, Marin Co., Cal.—Sausa-
 lito School District votes bonds of
 \$95,000 to finance erection of 8-class-
 room and auditorium grammar school
 in Caledonia street.

ALAMEDA, Alameda Co., Cal.—Sept.
 22 is date set to vote bonds of \$375,000
 to finance purchase of additional
 grounds and additional reinforcing of
 gymnasium and the erection of addi-
 tional school units at the Alameda
 High School now under construction in
 Central Ave., bet. Oak and Walnut
 streets.

DOWNEY, Los Angeles Co., Cal.—
 Downey Union High School District
 will vote on \$85,000 school bond issue
 Sept. 25th to be used to erect 2 addi-
 tional buildings at high school site,
 Downey. This bond issue failed to pass
 at election July 24th.

Craftsmanship is the priceless ingredient sought by every architect for his client. It is more than an ideal with us and with the workmen who are a part of us—it is an obligation and a tradition over forty years old.

That is why you will find Quandt craftsmen wherever fine work and quality workmanship are insisted upon.

Co-operation for the economy of quality.

In speaking on the State Fair before the Rotary Club members today, W. I. Elliott, chairman of the State Fair Chamber of Commerce Committee said the business district of Sacramento will be decorated in an entirely new manner while the Fair is in progress.

Harry Digges said the decoration of streets will serve to attract to Sacramento to thousands of the people coming from Eastern and Middle Western states to attend the San Francisco Golden Jubilee celebration.

"This is the first time San Francisco has invited Easterners to the coast since the 1915 fair," Digges said. "Thousands of these people will be passing through Sacramento and decorated streets will attract them here for the fair." The sum of \$1,400 is being raised among the merchants to decorate J and K Streets from Second to Sixteenth, and along the business streets in Oak Park. Charles Paine, secretary of the state agricultural society, told club members the fair this year is the most talked of and the most actively boosted fair in twenty years. He stressed the importance of the horse show, one of the principal features of the fair. Charles B. Ellis, banker, said the labor unions of the city are preparing to hold the biggest Labor Day celebration ever seen in Sacramento during the fair.

These words, made famous by song are going to be carried out by Rotarians during the State Fair if a committee of ten women follow instructions.

Thursday, September 10th, has been set aside as Rotary Day at the fair where the Rotarians expect to entertain some 1500 or more guests.

A committee of ten women, headed by Mrs. Frank McNally, has been appointed to see that enough cakes are baked by wives of Rotarians for the occasion.

Those who are on the committee besides Mrs. McNally are: Mrs. Frank Casey, Mrs. Luke Peart, Mrs. Fred Weil, Mrs. Gail Brinkman, Mrs. Ralph Carter, Mrs. William Burgess, Mrs. Chris Jones, Mrs. Noel Burge and Mrs. Andy Willi.—From Sacramento Bee.

SANDY PRATT will eat.
"A PIECE of Rotary cake."
AT THE State Fair.
AS PER the above.
BUT THERE is another attraction.
AT NINTH and K Streets.
IN DOWNTOWN Sacramento.
FOR CHIN-Beretta Optical Company.
HAVE A show window.
FULL OF bathing girls.
WITH SANDY'S clean sand.
FROM THE American River.
UNDER THE girls' feet.
AND HAROLD Chin, Manager.
OF THIS progressive firm.
HAS A window sign.
TELLING THE world.
ABOUT "SANDY'S clean sand."
OTHER ATTRACTIONS on K Street.
WILL BE the display.
OF BEAUTIFUL "calves."
AND PRETTY "chickens."
WEARING SHORT dresses.
AND NO feathers.
NO "ROAD" hogs will be allowed.
EITHER AT the State Fair
OR AT Ninth and K Streets.
SO SANDY Pratt, President,
OF THE Pratt Building Material Co.
CENTRAL OFFICE—San Francisco.
WITH SAND and rock plants.
AT MARYSVILLE, Sacramento.
PRATTCO (MONTEREY County).
AND PRATTROCK (near Folsom).
SUGGESTS YOU visit the Fair.
AND THE big display.
OF "CALVES," "chickens," sand.
AND BATHING girls.
AT HAROLD Chin's optical emporium.
NINTH AND K Streets, Sacramento.
YOU WILL need glasses.
TO SEE the sights.
"I THANK you."

Mrs. Hold Stein leaving the Fair grounds in Sacramento for 9th and K Streets to see the display of "calves" and short dresses. Her calf is missing and she will look over the display of "calves" at 9th and K Streets to see if they resemble her child, which may be hiding behind the sign "Sandy Pratt's washed, clean sand."

Official Proposals

NOTICE TO CONTRACTORS

(Daniel Webster School—Oakland)

Office of the Secretary of the Board of Education of the City of Oakland.

Notice is hereby given that the Board of Education of the City of Oakland and of the Oakland School District of Alameda County, hereby calls for sealed proposals to be delivered to the Secretary of said Board, Room 211, City Hall, Oakland, California, until Tuesday, the 15th day of September, 1925, at 9:45 A. M., at which time said bids will be opened, for the erection and completion of the Daniel Webster School Building Additions, of the Oakland School District, located on the West Side of 81st Avenue, between Plymouth and Olive Streets, in the City of Oakland, County of Alameda, State of California. These bids shall be presented in accordance with plans and specifications for said building on file in the office of the Secretary of the Board of Education, City Hall, and in the office of the Superintendent of Buildings, Room 115, 532 16th Street, Oakland, California.

Separate bids will be received for:
(1) General Work.
(2) Heating, Ventilating and Plumbing Work.

(3) Electrical Work.
On a deposit of Twenty-five (\$25.00) Dollars, complete sets of plans and specifications may be had by any bidder on application to the Superintendent of Buildings at his office hereinbefore mentioned, and in each case shall be returned within ten (10) days after securing same, to the Superintendent of Buildings. If the plans and specifications are not returned within said time, or if mutilated, the said deposit shall be retained by the said School District as agreed and liquidated damages for said mutilation or detention.

Bids must be made on proposals obtained at the office of the Superintendent of Buildings, and be signed by the bidder and accompanied by a certified check, certified to by some responsible bank or banker, and made payable to the Board of Education of the City of Oakland and of Oakland School District, to be retained by said School District as agreed and liquidated damages should the party or parties fail to enter into the contract after the award, or to give bonds required for the faithful performance of the contract, or any bond required by law. The amount of said check shall not exceed Five Thousand (\$5,000.00) Dollars, but for all bids of less than Fifty Thousand (\$50,000.00) Dollars, said check shall be for at least ten (10%) percent of the amount of the bid. Each bidder shall execute the affidavit accompanying the proposal, obtained from the Superintendent of Buildings.

Bids will be opened by the Board of said District on Tuesday, the 15th day of September, 1925, at 9:45 A. M., in the Board Room, 211, second floor of the City Hall, in said City of Oakland. The Board reserves the right to reject any and all bids or any or all items of such bids.

JOHN W. EDMOND,
Secretary of the Board of Education of Oakland, California.

NOTICE TO BIDDERS

(Reno, Nevada—Converse Lock-Joint Pipe)

Sealed bids will be received by the Executive Manager of the Nevada Transcontinental Highways Exposition for the following:

1050 lineal feet, 8-inch diameter Converse lock-joint pipe, f. o. b.

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

Reno, Nevada.

960 lineal feet, 6-inch diameter Converse Lock-joint pipe, f. o. b. Reno, Nevada.

Bids will be filed with F. F. Small, Executive Manager, City Hall, Reno, Nevada on or before five o'clock p. m. of Tuesday, September 8th, 1925. Right is reserved to reject any or all bids.

Reno, Nevada, August 31, 1925.

NEVADA TRANSCONTINENTAL HIGHWAYS EXPOSITION.

NOTICE TO BIDDERS

(South San Joaquin and Oakdale Irrigation Districts—Joint Storage Works)

Notice is hereby given that sealed proposals will be received at the office of the South San Joaquin Irrigation District in Manteca, California, until eleven o'clock A. M., on the 22nd day of September, 1925, for the furnishing of the Outlet Gates, Spillway Gates, Needle Valves, and other equipment for the Melones Dam, including the following approximate items:

- 1 Cast Iron outlet gates with stems and hoists.
- 9 Riveted steel drum type spillway gates.
- 1 Turbine driven centrifugal pump.
- 4 Needle type outlet valves.
- 18 Butterfly valves.
- 9 Needle type control valves.
- 960 ft. Copper seals.
- 75 tons Reinforcing steel.
- 10 tons Structural steel.
- 160 ft. Riveted Steel pipe.

Plans and specifications for said material can be seen at the office of the South San Joaquin Irrigation District at Manteca, California, and at the office of the Oakdale Irrigation District at Oakdale, California, and copies hereof will be furnished upon application to the Secretary of the Board of Directors of either district when accompanied by a deposit of \$20.00 to be repaid to bidders and to all others upon return of the plans and specifications in good and acceptable condition not later than the day set for opening bids.

The Boards of Directors of said districts will be in session at the office of the South San Joaquin Irrigation

District in Manteca, California, at eleven o'clock A. M., on the 22nd day of September, 1925, and will open all proposals received in response to this notice.

The contract will be let to the lowest responsible bidder, but the Boards reserve the right to reject any and all bids.

Bidders may submit bids upon any or all of the schedules, but no schedule will be subdivided.

Each proposal must be accompanied by a certified check for five (5) per cent of the amount of the schedules bid upon, payable to the order of the South San Joaquin Irrigation District as a guarantee that the bidder will, if successful, execute a satisfactory contract and furnish a bond in the sum of not less than twenty-five (25) per cent of the amount of his bid for the faithful performance of the work in accordance with the plans and specifications; said Bond to be approved by said Boards.

The proposal forms bound with the specifications must be properly filled out by the bidder, and the plans and specifications, including the proposal, must be submitted intact with the bid in a sealed envelope addressed to the Boards of Directors of the South San Joaquin and of the Oakdale Irrigation Districts and marked to indicate that it is a proposal for Outlet Gates and other equipment for the Melones Dam. Done in pursuance of an order of the Boards of Directors of the South San Joaquin and of the Oakdale Irrigation Districts this 24th day of August, 1925.

S. L. STEELE,
Secretary of the Board of Directors of the South San Joaquin Irrigation District.

M. P. KEARNEY,
Secretary of the Board of Directors of the Oakdale Irrigation District.

NOTICE TO BIDDERS

(Exhibit Building—Reno, Nevada)

Sealed proposals will be received by the Nevada Building Commission of the State of Nevada at the Governor's office, Carson City, Nevada, until 11:00 o'clock A. M., September 15, 1925, for construction of an Exhibit Building at Reno, Washoe County, State of Nevada. Such sealed proposals as are received will be publicly opened and read at the hour of 11:00 o'clock on said date.

All proposals shall be made on blank form of proposal furnished by the Commission, shall be enclosed and sealed in an envelope which is addressed to the Nevada Building Commission, Carson City, Nevada, and endorsed "Proposals for construction of Nevada Exhibit Building at Reno, Nevada."

All bids shall give, both in words and figures, the price proposed.

All bids must be signed by the bidder, with his address.

The work to be done will consist of the construction of an Exhibit Building at Reno, Washoe County, Nevada—the same to be done and completed in a manner satisfactory to the architects and in accordance with the specifications, drawings and contract on file at the office of Architect F. J. DeLongchamps, Gazette Building, Reno, Nevada, where plans may be examined and forms of contracts, specifications, and pertaining documents may be examined.

A complete copy of the plans, drawings, and specifications may be obtained from said architect, but, in each case, a cash deposit of ten dollars will be required. Said deposit will be refunded when the plans are returned intact and in good condition, provided they are returned within thirty days after the opening of the bids.

The right is reserved to reject any

and all proposals, or to accept the proposal deemed best for the interests of the State of Nevada.

Work in said building must be completed on or before June 1, 1926.

Every bid shall be accompanied by a certified check of the bidder in an amount equal to five per cent of the amount of his bid—said amount to be forfeited to the State of Nevada should the bidder to whom the contract is awarded fail to enter into the contract in accordance with his bid and give the bond required within ten days after notice of such award. The checks of the unsuccessful bidders shall be returned immediately after the contract is awarded and the bond given. Each bid must also be accompanied by a certificate from a surety company duly authorized to do business in this state, stating that such surety company will provide said bidder with a bond as is required in and in accordance with the provisions of said specifications conditioned for the faithful performance of the provisions of the contract and specifications.

F. J. DE LONGCHAMPS,
GEO. A. FERRIS & SON, Architects.

NOTICE TO CONTRACTORS

(Painting—Alameda County—Highland Hospital)

Office of the Clerk of the Board of Supervisors, Alameda County, California.

Sealed bids will be received by the Clerk of the Board of Supervisors of Alameda County, at his office until **Monday, September 28th, 1925 at 10:30 o'clock A. M.** (the day when said bids will be opened and the contract awarded.) For the erection and completion of exterior painting for Highland Hospital of Alameda County at 14th Avenue and Vallecito Place, Oakland, California.

Complete plans and specifications for said work are on file in the office of the County Clerk in the Hall of Records Building, City of Oakland, California, where copies may be obtained by depositing with the County Clerk, the sum of one Hundred (\$100) Dollars. Contractors will be restricted as to the length of time they may retain these plans and specifications to Twelve (12) days.

Contractors failing to return said plans and specifications within said time limit will forfeit their deposits to the County of Alameda. The entire amount of the deposit will be returned to contractors returning said plans and specifications in good condition within said time limit.

Each bid must be accompanied by a check for at least ten per cent. of the total amount of the bid or proposal certified to by some responsible bank, and made payable to Geo. E. Gross, Clerk of the Board, to be forfeited to the County of Alameda as agreed and liquidated damages should the party or parties to whom the contract shall be awarded fail to enter into the con-

tract after the award or to give the bond required by the Board for the faithful performance of the Contract. The Board reserves the right to reject any or all bids.

GEO. E. GROSS,
Clerk of the Board of Supervisors of Alameda County.
Dated, August 31, 1925.

NOTICE TO CONTRACTORS

General Contract—Sacramento Memorial Auditorium, Sacramento, Calif.

Ad. No. 126

Sealed bids will be received by the undersigned for the City Council of the City of Sacramento at the office of the City Clerk in the Sacramento City Hall, 1017 Street between 9th and 10th Streets, between 8:15 and 9:15 o'clock P. M. on Thursday, September 17th, 1925, for the furnishing of all labor, equipment, and materials necessary for the General Contract in connection with the erection of the Sacramento Memorial Auditorium.

All such proposals must comply with the requirements of the City ordinances applicable thereto, and the City Charter of the City of Sacramento, effective June 30th, 1921, and bidders are hereby cautioned that any bid which fails to comply therewith cannot be considered.

Bids must be submitted upon printed proposal and affidavit form, supplied by the City Clerk without charge to the prospective bidders and enclosed in an envelope marked "Sealed Proposal for the General Contract, Memorial Auditorium, Sacramento, California."

At the same time with the execution of the contract for said work, successful bidder will be required to furnish a contract bond for faithful performance of the work, in the sum of 50 per cent of the amount of his contract in addition to which Contractor will also execute a labor and material bond in sum not less than 50 per cent of amount of contract.

A certified check made payable to the City Controller of the City of Sacramento, as prescribed in Section 256 of the said Charter, for ten per cent (10%) of the aggregate of the proposal must accompany each bid.

The right to reject any and all bids is reserved to the City Council by provisions of said Charter.

Plans and specifications must be returned to the Architect on or before date bids are opened.

H. G. DENTON,
City Clerk of the City of Sacramento.

NOTICE TO CONTRACTORS

Oroville-Wyandotte Irrigation District

Sealed bids will be received by the Board of Directors of the Oroville-Wyandotte Irrigation District at the office of the Board, Oroville, California, until 10 o'clock A. M., September 14th, 1925, for the following work:

Reconstruction of South Feather Ditch in the vicinity of the Lost Creek

Dam in Butte County, California, 30,000 cubic yards of earth, loose and solid rock excavation; 40,000 lineal feet of ditch deepening; 10,000 lineal feet of ditch widening; 180 lineal feet of tunnel excavation; 4000 cubic yards of rubble wall; 1700 square yards of paving; 1800 lineal feet of ditch lagging; 100 lineal feet of twenty-two inch Machine Banded Redwood pipe; and 100 cubic yards of concrete.

Contract will be let to the lowest responsible bidder. Plans and specifications can be seen at the office of the board, Oroville, California.

W. J. MONRO,
Secretary, Oroville-Wyandotte Irrigation District.

MISCELLANEOUS BUILDING CONSTRUCTION

(Continued from Page 17)

SAN FRANCISCO.—Pacific Tel. and Tel. Co. has purchased property adjoining present 26-story structure in New Montgomery street. The site has frontage of 117-ft. in Natoma St. running through 160-ft. to Minna St. and is improved with a two story structure. No improvements are contemplated at present. The purchase has been made for further protection of the present large investment.

A Variety of Work on the Same Machine

In addition to business correspondence the modern office has a large variety of work for the typewriter.

Tabulating, billing (simple and condensed) stenographic cutting, writing on ruled forms and many other kinds of office work can all be done on the L. C. Smith & Bros. typewriter.

The decimal tabulator and the variable line spacer are part of the inbuilt service of every L. C. Smith & Bros. machine.

Typewriters Rented

SACRAMENTO, Cal.—Building per-
 mits issued during August totaled
 \$655,454 bringing the first eight month
 total for the present year to \$7,539,175.
 The month's activity represented an in-
 crease of \$167,478 more than the Aug-
 ust, 1924 total, but was \$25,473 below the
 total for July, 1925. The total sum ex-
 pended for building improvements thus
 far in 1925 represent an increase of
 \$1,154,355.17 over the total expended
 during the same time in 1924. The 1924
 figure was \$5,384,820.33.

OAKLAND, Cal.—City Building In-
 spector A. S. Holmes reports issuance
 of 1238 permits during month of Aug-
 ust for improvements valued at \$3,245,-
 419. During the month 356 permits
 were issued for one-story dwellings,
 costing \$1,021,035. The largest single
 project included in the month's activi-
 ties covered a 6-story concrete and
 steel hospital costing \$700,000. A per-
 mit was also issued for a one-story
 concrete and steel theatre and store
 building costing \$132,000.

ALAMEDA, Cal.—Building expendi-
 tures for the month of August aggre-
 gated an expenditure of \$138,995, of
 which 28 permits were for new struc-
 tures costing \$108,500 and 78 altera-
 tions, additions and repairs valued at
 \$30,494.

FRESNO, Cal.—With building per-
 mits for August aggregating \$136,205,
 Fresno showed a gain of more than
 \$22,000 over the month of July, bring-
 ing the total for the year to date to
 \$2,236,773. New building amounted to
 \$97,680, as compared with \$75,595 for
 July, and permits for \$38,525 in altera-
 tions and repairs were issued in Aug-
 ust as against an aggregate of \$26,747
 in July.

PALO ALTO, Cal.—August building
 totaled 56 permits for improvements to
 cost \$190,887. This sum exceeds the
 record for the corresponding month
 last year when the total was \$189,735.
 In July of this year the high point of
 the year so far was reached with \$258,-
 964. Home building continued to lead
 all activities. During the past month
 fifteen permits were issued for resi-
 dences costing \$93,400.

SAN MATEO, Cal.—Building opera-
 tions for August, 1925, totaled \$150,446.
 Home building is the feature of the
 construction program.

TULARE, Cal.—Building permits for
 month of August totaled \$34,070
 doubling the total for July and exceed-
 ing by nearly \$30,000 the figure of
 August of last year.

BURLINGAME, Cal.—August build-
 ing permits represented an expendi-
 ture of \$210,050. Home building is the
 most active construction.

KOEHRING DANDIE

Light Mixer

**Four-cylinder
Gasoline
Engine**

FAST! Fast! Fast! Here is a light mixer with a speedy charging skip, liberal drum dimensions and a high speed discharge that will break all your records of putting concrete where it pays you profits!

Just the balanced light weight to haul behind your truck on its rubber tired disc wheels and get from job to job in a big hurry.

Four cylinder, radiator cooled, gasoline engine. Transmission from engine to drum enclosed in oil bath! Double gear drum drive, chilled, beveled gears! Drum rollers fixed to shafts revolving in big bearings!

It's useless to try to give you the smallest idea of what this Dandie represents in superior speed and construction details—but it's *strong, rugged*—it will stand-up for all the punishment you can give it, and *work and work, and work!*

And you have a chance to buy at a price that gives you all the benefit of the economies the Koehring Company effect by big, standardized production! If you had half an idea of what this mixer means in the way of actual value, you would send back the coupon for full detail by next mail!

Koehring Dandie — 7 cu. ft. capacity mixed concrete. High speed charging skip, or low charging hopper with hinged steel framed platform which may be folded against mixer for hauling. Discharged from either side of mixer.

4 cylinder gas engine, radiator cooled, or optional two cylinder engine, hopper cooled. Drum drive transmission in oil bath. Maybe equipped with *automatic water measuring tank*, and *Light Duty Hoist*.

**Send Back this
Coupon!**

HEAVY MILL CONSTRUCTION

Any building material, say the engineers of the National Lumber Manufacturers Association, is entitled to be judged on its results when used according to the best principles and practice. In connection with the Association's recent publication of a series of plates giving details of heavy mill construction, these engineers point out many mistakes in such construction. Use of the plates which are issued for free distribution to the building trades and professions will, it is believed, insure the proper utilization of wood in heavy mill construction. For example, it is a rather common thing to put steel caps on top of wooden columns. It is stated that this is an error, because in a hot fire the cap will fall before the column will crash. A concrete cap has been designed for topping columns under load that will not fail before the column itself. This cap has been patented, but the ownership of the patent has been assigned to the public. Although there has never been a heavier demand for any of the construction series than this, the National Lumber Manufacturers Association, Washington, D. C., still has a few copies of the first edition available for the use of those who are interested in correct mill construction.

Big Future Seen For Asbestos Deposits in State of California

Although the western states, particularly California, possess extensive deposits of asbestos of all grades, many convenient to rail transportation, virtually all the crude asbestos used in American manufacturing last year was imported, a report of the United States Department of Commerce received by the department of mines and mining of the Sacramento Chamber of Commerce indicates.

This report shows that a total of 300 short tons of asbestos, valued at \$42,526, was produced in the United States in 1924. This total comprised 173 short tons of chrysotile asbestos valued at \$33,941, mined in Arizona, California and Montana and 127 short tons of amphibole asbestos valued at \$8,585 mined in Georgia and Maryland. Against this small production, there were 183,250 short tons of asbestos, valued at \$3,602,945, imported into this country in 1924. (It is pointed out by the Sacramento mining department that this amount could in all probability have been produced in Calaveras County alone.)

"The future of asbestos mining in California is dependent largely upon

the development of uses in quantity for the short-fiber mill grades," stated Walter W. Bradley, deputy state mineralogist. "There are apparently large resources of such material that can be made available. Besides magnesite, stucco and flooring, it can be utilized in steam-pipe covering, composition fireproof shingles and roofing paper. It is also being tried out as a filler with asphalt in street pavement surfacing. For some of these purposes, the amphibole variety is also serviceable.

"Some spinning-grade fiber has also been found in this state, notably in Nevada, Calaveras and Monterey Counties, but the commercial production to date has been small. Other counties with possibilities for yielding good-quality fiber, though short, include Fresno, Lake, Napa, San Benito, Shasta, Siskiyou and Trinity. There are extensive serpentine areas in the Coast Ranges, in the Klamath Mountains, and in several sections of the Sierra Nevada Mountains, which are within the range of possible asbestos producers, as chrysotile is a fibrous form of serpentine."

CANADA INVITES AMERICAN ROAD BUILDERS TO CONVENTION

In connection with its great convention to be held at Quebec, Sept. 22, 23 and 24, the Canadian Good Roads Association, largest organization of the kind in the Dominion, has extended to the Executive Committee of the American Road Builders' Association an invitation to meet in Quebec on those dates and attend the convention as guests of the Canadian organization. Representatives of the Road Board of Great Britain will be present and the practice in highway construction, both in America and the British Isles, will be brought prominently before the convention by experts.

Canada is confronted with the same problems in the way of Federal aid to the states as is the United States, as well as the same construction problems, and is undertaking road improvement programs as important, in proportion, as those now under way in this country. Results already achieved through Federal aid in both countries will be reviewed, with suggestions for future work in this direction. One of the most important subjects—important to both countries—to be considered also, is that of equitable taxation for highway construction and maintenance. The value of the traffic census will be discussed, as will the dust problem, the different systems of maintenance and the various types of road pavements. Winter roads and colonization roads, as well as other subjects peculiar to Canada's great improvement program, likewise are to be considered.

BLUE STAIN DOES NOT AFFECT DURABILITY OF LUMBER, IS REPORT

Blue Stain, in and of itself, is not a defect, says the Blue Stain Committee of the National Lumber Manufacturers Association. It is not an early stage of decay but merely an indication of the presence in the sapwood of a fungus which does not materially affect the strength or durability of wood for ordinary commercial purposes. For purposes where lumber is to be covered up or painted, and where the use of sapwood is permissible, there is no reason for discriminating against blue stained lumber.

Blue stain is frequently accepted in rough lumber, lath scantling and plank and some of the larger sizes of dimensions. More could well be used in the manufacture of sash, doors, millwork and other products where the discoloration is to be painted or otherwise hidden from view. By refusing to accept blue stained lumber for such purposes, lumber users are encouraging waste.

The lumber industry is anxious to do everything within its power to encourage a closer utilization of forest products but it must depend upon the users of lumber for a full measure of co-operation. By recognizing that blue stain affects lumber only in its appearance, and by accepting blue stained lumber for uses where appearance is not important or, when it is important, where it can be painted or stained, architects and builders will be doing their share to reduce one of the important present economic wastes in lumber distribution.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

The quantity of gypsum mined in 1924 was 5,024,629 short tons, an increase of 183,181 tons, or 3.7%, over 1923, according to a statement made public by the bureau of mines, department of commerce. The value of sales of both crude and calcined gypsum was \$42,734,507, an increase of \$7,836,352, or 22%; 3,568,569 tons was sold calcined and 982,103 tons in crude form, chiefly for use in Portland cement but including 22,298 tons sold as agricultural gypsum. The figures are based on reports submitted by 72 operators of gypsum mines to the mineral resources division of the United States geological survey before the transfer of that division to the bureau of mines.

The Likely Lumber Company has consummated a timber sale contract of Modoc National Forest officials, involving approximately five and one-quarter million feet of yellow pine and one-half million feet of white fir. The contract covers a five-year period and the timber will be cut in conjunction with private holding of the company, which amounts to approximately twenty million feet, mostly yellow pine. The company has approximately two million feet of lumber from this season's run on hand at present, part of it being in the mill yard and the balance at the railroad yards at Likely.

William Coyne, for fifty-two years in the lumber business and for the past twenty-five years manager of the Sterling Lumber Company of Redding has retired to spend the balance of his days in ease. Coyne's career as a lumber dealer began in Virginia City, Nev., in the early seventies. For years he was foreman in that city during the bonanza days of Lonkey & Smith. For several years he was employed in the Terry & Friend yards in Sacramento.

E. N. Bryan, formerly officer engineer with the state division of water rights, has been appointed deputy chief of the division by W. F. McClure, director of the department of public works. Bryan follows to the position formerly occupied by Edward Hyatt Jr., who was made chief of the division following the resignation from that position eighteen months ago of Major H. A. Kluegel.

Gustave A. Wendt, general contractor of Sacramento, died in that city Sept. 3, following an illness of several months. He was 74 years of age and was stricken last June with a stroke of paralysis and since that time his health failed rapidly. Wendt was a native of Germany.

Ralph Z. McCoy has been appointed a deputy building inspector in the Oakland City Building Permit Department and Milton P. Kitchel as assistant architectural engineer. The men were selected from the civil service list.

John P. Black, of Santa Margarita, has been appointed county surveyor of San Luis Obispo county, filling the unexpired term of William J. Black, deceased.

The Success in vocational training which the plastering contractors began in 1922, with a night school class at Cass Technical High School, Detroit, and which blossomed in 1924 into day classes for bricklaying, plastering and art tile setting will result in classes in plumbing, carpentry, roofing and others of the 21 basic building trades being added to the apprentice school if present plans go through. On June 17 this year the first graduates of the bricklaying and plastering classes received "Certificates of Accomplishment" at the first annual commencement of the Detroit Continuation and Trade Schools. Twenty apprentice plasterers thus became full-fledged journeymen. These graduates have obtained excellent jobs and some of them are now holding positions as foremen and superintendents.

Twenty-three homes costing \$106,160 were included among ninety-four building permits issued in Stockton for the month of August, 1925. The expenditure for the month was \$220,360, according to City Building Inspector A. C. Horner. There were forty-six permits for \$64,710 in non-residential construction and thirty-seven other permits represented \$49,140 in additions, alterations and repairs. Five permits were for signs costing \$410. Among the larger permits were one for a \$27,000 residence and one for a \$35,000 service station and garage.

The Blue Diamond Material Company has completed development of a mammoth new gypsum deposit located on the peak of a high desert mountain thirty miles southwest of Las Vegas, Nevada. The project involved an expenditure of more than 1,000,000; construction of more than 100 miles of railway on the great American desert and the building of a little town known as Blue Diamond. The gypsum rock will be mined and shipped to Los Angeles for manufacture at the company's plant.

Permits were issued for 350 new buildings in Berkeley during the month of August. The structure represent an expenditure of \$904,407. For alterations and repairs, 108 permits were issued, the improvements totaling \$25,349, bringing the total operations for the month to 458 permits with an aggregate valuation of \$929,956.

John C. F. Stagg, who for 25 years was in the wholesale and retail paint business in San Jose, died in that city September 3. Stagg was born in Du Quoin, Ill., 62 years ago. He has been retired for the past year since suffering a stroke a year ago. He was at that time manager of the Continental Paint Co. of San Jose.

William Carmichael, Daly City plumber, has petitioned the Federal court to be adjudged a voluntary bankrupt. He lists his liabilities at \$10,107.15 with assets of \$7114. Most of his claims the petition avers, are owing to San Francisco mercantile firms.

MAKING STRONGER CONCRETE

Water is an important ingredient in concrete. Experiments just completed at the Bureau of Standards, Department of Commerce, show that this is just as true with new quick-hardening high-alumina cements as with Portland cement.

The bureau finds it important to select sand and gravel in proper size gradation since less water is required to make the concrete workable and a greater strength results. The old rule, to use the least amount of water which will make the concrete workable, is found to hold with the new high-alumina cement. In one experiment a decrease of 1 per cent of water was found to increase the strength as much as 26 per cent.

The research is part of the program of the materials laboratories of the bureau upon the useful properties of materials and how they may be enhanced.

A gravel concrete made with the new quick-hardening high-alumina cement generally develops as high a strength in 24 hours as a similarly proportioned Portland cement concrete would develop in 28 days. The quick-hardening feature is notably valuable where ground rentals are high, equipment elaborate, or construction difficult, or whenever delays in waiting for the concrete to attain its strength would be costly.

DO BIG BUSINESS

A total of \$986,646 was turned into the U. S. Treasury from the National Forests of California during the fiscal year ending June 30, 1925, according to statement by the San Francisco headquarters of the United States Forest Service. These receipts accrued from sales of Government timber, grazing fees, special use permits and miscellaneous business.

Under existing laws, 25 per cent of these receipts, or \$246,160, will be returned to the State for road and school purposes. In additional 10 per cent, or \$98,464, will be available for use by the Forest Service for road and trail work in the National Forests.

This percentage of receipts returned to the State is an interesting contrast to some of the European countries which have Crown or National Forests. In Sweden, for example, only 3 1/10 per cent of the Crown Forest receipts are returned to the local communities.

In addition to the 10 per cent fund for roads and trails, the Federal Government will also expend, this fiscal year, the sum of \$1,600,000 on National Forest road construction and development work in California.

STATE TIMBER FIRE LOSS IS SLIGHT

Timber losses from fire in California from January 1 to August 21 on areas over which the state has protective jurisdiction amounted to \$2085, as compared to \$343,056 during the same period last year, according to a summary issued by M. B. Pratt, state forester.

The total damage this year, including brush, grain and grass fires, which have predominated in numbers and extent, was \$190,162, as compared to a total of \$447,856 for the same period in 1924, the summary shows.

A total of 652 acres of timber have been burned over so far this year, while at this same time last season the total was 37,989 acres.

The area of brush land burned over since January 1 is given as \$141, as compared to 22,377 acres last year.

ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

GRAVEL ROCK AND SAND DEALERS PUT INTO EFFECT PROGRESSIVE BUSINESS METHOD

A turn in the right direction has been taken by the Gravel Rock and Sand dealers of San Francisco in putting into effect, on the first of next month, a standard of weighing their materials and selling it on a tonnage basis.

All previous methods of selling this material are being abolished for the reason that no uniform method could be arrived at such as was necessary to give the buyer a standard material at a fair price and the dealer a fair sale return.

After many experiments and consultations with interested parties, the conclusion has been reached that the only correct and fair basis is to sell by weight and with that end in view, considerable expense has been incurred by the local dealers to install accurate scales of the type registered beam design that they may supply the trade with standard materials as to quantity, quality and service together with a definite medium of exchange. This is welcomed by the buyers and public at large.

Some years ago this was adopted by other large cities in California and Eastern states, and San Francisco is now following closely the correct lines of progress. While it is a fact that our sister cities across the bay, and also Southern California feared that such departure was drastic, it only needed the actual practice of a few days to prove that it was the correct step and endorsement followed profusely. This is what the San Francisco dealers are endeavoring to do for the local trade and the immediate support of the public is anticipated.

NO FUNDS FOR LAW

Plans of the Oakland Merchants Exchange for the drafting and adoption of a unified building code to be used by all Eastbay cities received a severe setback when the city council was informed by Leon Gray, city attorney, that the board had no right to appropriate funds to aid in the work.

Gray's decision came after an appeal by W. F. Breuer, who said that \$2000 already had been spent in the work of drawing up a revised code, and that if the city would advance money to cover that cost the plan would soon be ready to submit for approval.

City Attorney Gray advised the members of the council that they had no authority to make such an appropriation, and that they could not regulate their legislative power to any other body.

PAINTERS PROTEST

Protests against the employment of other than union painters who are members of the Vallejo painters' local No. 376, on painting parking marks in the city street, has been filed with the Vallejo City Council by the Solano County Building Trades Council. The communication was signed by L. O. Warner, Secretary-treasurer. Upon resolution of Commissioner Brew the communication was ordered filed. Brew declared that the men employed on the painting work were regular city employees.

American Plan Cuts Building Costs

By E. W. Olin, Secretary, East Bay Industrial Association in East Bay Builder

According to the statement of prominent contractors the American Plan of operation has caused a reduction of building costs from 15 to 25 per cent because of the elimination of closed shop rules and restrictions.

Similar benefits are enjoyed in other communities operating under the American Plan, is the conclusion drawn by the National Association of Manufacturers of New York from a close analysis of school building costs from 62 representative cities.

The average cost per cubic foot for 27 closed union cities was 40 cents, while 35 cities operating under the American Plan reported an average of 29 cents per cubic foot. It costs the taxpayers, therefore, 38 per cent more to erect schools under union conditions than the American Plan. Oakland's unit cost is 20 cents—one-half the average cost of closed union cities.

This great saving in construction cost to the taxpayers at a time when taxation has become such a burden, is a matter of deepest concern. The American Plan has conferred a most welcome benefit on the East Bay cities.

That the American Plan is largely responsible for the unprecedented prosperity in this field is the conclusion drawn from a comparison of the volume of building permits covering the period of closed shop and American Plan years as shown in the following statistics:

LEAGUE APPOINTS COMMITTEES

The following committees of the California Sanitation Development League have been announced:

Advisory Board, Henry Morris, J. H. Pinkerton and Albert Wilson.

Finance Committee—Neil O'Hair, Alex Coleman, Henry Morris, J. H. Pinkerton, T. F. Leary, C. W. Weld and M. E. Wangenheim.

Membership Committee—Ross M. Clark, Wm. J. Forster, W. Herbert Graham, V. E. Howard, W. P. Goss, H. E. Oliphant and N. George Weinholz.

T. E. B. Relations Committee—Francis J. Baker, Harry Newman and Frank J. Kilmm.

Advertising Committee—Joseph Ahlback, W. J. Robertson, L. J. Waldear, W. J. Lysaght, H. M. Friesley and Miss Jackson.

Education Committee—C. N. Gilley, Burr Eastwood, M. W. Wuesthoff, Neil O'Hair, Carl T. Doell, R. B. Wolcott, H. P. Wilson, W. H. Lunsmann, Ben F. Blair, M. E. Greenberg and Frank J. Kilmm.

Luncheon Committee—Francis J. Baker, H. M. Friesley, Ben F. Blair, N. W. Farlow, J. J. McLeod, Jackson Noble and M. E. Wangenheim.

East Bay Relations Committee—H. P. Sheridan, W. H. Nice, George Stoddard, Jackson Noble, C. W. Abbott, J. H. Jevons and M. H. Finzel.

Press Committee—Fred White, Jos. R. Whalen, L. J. Waldear and H. H. Marquis.

Legislative Committee—Herbert Gra-

Year	Value of Permits
1917—Closed Shop	\$ 4,442,520
1918—Closed Shop	5,382,159
1919—Closed Shop	7,134,572
1920—Closed Shop	9,489,886

1921—Strike, Closed Shop

1st 6 months..... 15,791,616

1922—American Plan..... 24,468,233

1923—American Plan..... 27,628,175

1924—American Plan..... 31,223,485

1925—American Plan estimated..... 36,000,000

Records back to 1907 show that two years, 1912 and 1913, in which the value of building permits reached the \$9,000,000 mark.

The remarkable feature attending this building program is that more than \$100,000,000 of building construction has been completed in Oakland alone without a strike or labor disturbance of any kind, except of a minor nature. This has reflected itself in the confidence of the investors that the labor conditions have been cleared of the many harassing union rules and restrictions which formerly was responsible for countless strikes and disputes.

Under the American Plan the owner is assured that his building will be erected without delays from strikes, the contractor's burden of union interference has been removed and the workmen themselves enjoy steady employment at wages on a par with any similar community in the country.

ham, Frank C. Brodie, Geo. Y. Morton and Harry L. Allison.

Golf Committee—Norman Farlow, V. E. Howard and A. S. Lamond.

BUILDERS TO ENTERTAIN

A surprise entertainment followed by a banquet will be held by the Richmond Builders' Exchange, September 25, according to an announcement of E. H. Higgins, president of the organization. In charge of the entertainment will be the lumber dealers and millmen. Roy Eakle of the Tilden Lumber company and H. J. Caplan of the W. P. Fuller Glass Company will head the committee in charge of the banquet. The entertainment features will be put on under supervision of L. B. Kirby of the Henry Cowell Lime and Cement company.

EXCHANGE FOR BERKELEY

Plans for the organization of a builders' exchange in Berkeley have received the endorsement of the Berkeley Chamber of Commerce.

In endorsing the proposed exchange the chamber acted on the request of E. A. Mitchell of the E. T. Tenney, Lester W. Hink, Roy Barrett of the Bay Cities Mortgage and Finance company, A. Sagers, president of the Alameda County Master Plasterers' Association.

Betterment of construction of cheaper buildings is one of the aims of the proposed organization, which, it is declared, will be made a center for architects, builders and artisans with permanent exhibits and lectures to raise standards of construction.

TRADE NOTES

Day Labor System in California Hard Hit by Breed Bill Passage

By E. Earl Glass, Secretary, Southern California Chapter, Associated General Contractors

Hayward Building Material Company has been incorporated and will maintain offices in Hayward. The company is capitalized at \$25,000 and has the following directors: Thos. B. Russell, Jr., J. A. Casson, K. F. Casson, C. S. Russell and William Blackman, all of Hayward.

Newark California Housing Company of Newark, Calif., has filed articles of incorporation. The company is capitalized at \$10,000 and has the following directors: Robin A. H. Morse of Alameda, Manuel J. Jacobs and H. A. Zeckendorf of San Francisco.

Glenn Kennedy has been transferred from the salesroom of the Standard Sanitary Manufacturing Company, San Francisco, to the promotion department of the Cincinnati office. M. Iverson has been added to the San Francisco salesrooms.

Diamond Match Company is preparing to establish a lumber yard at Robbins, a townsite in the Sutter Basin, Yolo County. It is said that C. Givans, now in charge of the yards at Dunnigan, will be installed as manager.

The West Coast Porcelain Manufacturers, Millbrae, has moved the San Francisco office from the Wells Fargo Bldg. to the Universal Exhibits, Monadnock Bldg.

Benjamin W. Berg and Claire M. Alexander have formed a partnership and will operate in Redwood City under the trade name of Redwood Sheet Metal and Furnace Company.

PLANS OUTLINED FOR BAY SHORE UNDERPASS

Details made public by the bridge department of the California Highway Commission indicate the under pass on the Bay Shore Highway, plans for which have been submitted to the state railroad commission, will be the largest structure of its kind on the state highway system.

The proposed subway will carry the Bay Shore Highway under the two main line tracks and six additional tracks of the Southern Pacific near the city of South San Francisco. It will be constructed of steel and concrete and will be 150 feet long, with an overhead clearance of fourteen feet. The subway will have a clear roadway width of forty feet, and in addition an eight foot sidewalk for pedestrians.

It will be so constructed that it may be widened in the future as traffic increases to an ultimate width of eight feet of roadway.

The preliminary drawings have been completed by the commission's bridge engineers and work has started on the detail plans.

The highway commission has filed an application with the railroad commission for an order authorizing the construction of the grade separation and the assessment of the cost against the state and the railroad. Final estimates of the cost have not been made but it is expected to run into six figures.

For three successive State legislative sessions, the general contractors of California have worked together in an effort to obtain a statute that will require strict accounting on public work conducted by officials with their own forces. The first attempt was a bill introduced in 1921 by Senator Breed, which passed both houses and was then "pocket vetoed" by a former Governor's failure to sign the bill. Governor Friend W. Richardson was elected soon afterward on an economy and efficiency platform.

The Breed Bill was introduced again at the 1923 Legislature but a strong lobby against the bill forced its supporters to drop the penalty clause to assure its passage. The amended bill was signed and has been almost a dead letter on the statute books for two years. It was believed that public officials would observe the law without enforcement provisions but this was not the case and a concerted effort was made to bring well organized forces to bear upon the campaign when the next session convened at Sacramento.

Under the leadership of Lynn S. Atkinson, the various organizations of the construction industry were brought together in the southern part of the State last year in a new body known as the Construction Industries Joint Committee. The movement soon attracted state-wide attention to the day labor question and the moral and financial support of the construction industry of the state was assured. The plan and program of the organization was fully detailed in the Constructor of September, 1924, and is well worth study by those who would achieve similar results in legislative lines. The sole purpose of the committee is the defense of the general contract method and the exposure of the waste of day labor in the construction of public works as a protection to the taxpayers and the industry of the State. The committee has accomplished much in attracting attention to the practice of letting work to others than general contractors but its greatest feat is the passage of the complete Breed Law which the Governor signed May 15th and becomes one of the most beneficial laws of this State on August first.

The Contractors Association of Northern California co-operated with the Southern California Chapter of the Associated General Contractors of America, to effect this creditable achievement, both working through the Construction Industries Joint Committee, which has a very real showing of strength with its paid membership of other groups such as general and sub-contractors organizations, surety bond associations, builders' exchanges and others. Inasmuch as representation is on a basis of one member for each \$1000 membership, this indicates a very real interest and substantial support of the issue. The unanimity of purpose and concentration of forces made the result certain and that it has been so well done reflects much credit

to every member of the organization. They have rendered a great public service and earned the rare title "Co-Operators," by making the Breed Day Labor Bill and law in California.

The Breed Day Labor Law is here-with printed in full.

"Section 1. It shall be the duty of the state highway engineer, the state engineer, the state architect, and of every county engineer, county surveyor, city and county engineer, county highway engineer, road commissioner, city engineer, commissioner of public works, superintendent of streets, harbor engineer, flood control engineer, the engineer of any board or commission of state, the engineer of any board or commission of any city or city and county, and the engineer of any reclamation, irrigation or other district, political sub-division or agency of the state directing, supervising or superintending the construction, or in charge of engineering work for or in connection with the construction of any bridge, road, street, highway, ditch, canal, dam, tunnel, excavation, building or structure within the state by day's labor or force account, except maintenance work, work occasioned by emergency and work costing less than five thousand dollars, to keep an accurate account of the cost of such work; to prepare and file in his office, prior to the commencement of the work, full, complete and accurate plans and specifications, and an estimate of the cost thereof, except by law requiring the preparation and filing of such plans, specifications and estimates of cost by some other officer, or in some other office, and within sixty days from the completion of any such work to prepare and file in the office of the county clerk or the county in which the work is performed, or if any such reclamation, irrigation or other district maintains an office, then in the office of his own such district instead of the office of the county clerk, a certificate in writing verified by him in the same manner as complaint in civil actions, setting forth the estimate of cost, names of bidders with prices bid, if bids there be, change in adopted or approved plans and specifications, that the work performed has or has not been in accordance with such plans and specifications, a list of any publicly owned equipment used in the work, and an itemized statement of the actual cost of all labor, materials, rentals, repairs, compensation and other insurance, transportation of labor, equipment and materials, engineering or architectural services including the services of public employees in connecting with such work, and any and all cost entering into the work performed, including a reasonable amount for depreciation of publicly-owned equipment used in the work and the cost of repairs thereon while so used.

"Sec. 2. Every such public officer or public employee mentioned in Section 1 of this act who wilfully violates any of the provisions of this act is guilty of a misdemeanor."

1924 LUMBER CUT

The National Lumber Manufacturers Association estimates the 1924 cut of lumber at thirty-seven billion feet, of

which nearly twenty-two billion feet was used in building, three and a half billion feet for ties, two and half billion exported, and the balance utilized industrially.

Day Labor System in California Had Hit by Breed Bill Passage

By E. Earl Glas, Secretary, Southern California Chapter, Associated General Contractors

For three successive State legislative sessions, the general contractors of California have worked together in an effort to obtain statute that will require strict accounting on public work conducted by officials with their own forces. The first attempt was a bill introduced in 1917 by Senator Breed, which passed both houses and was then "pocket vetoed" by a former Governor's failure to sign the bill. Governor Friend W. Richardson was elected soon afterward on an economy and efficiency platform.

The Breed Bill was introduced again at the 1923 Legislature but a strong lobby against it bill forced its supporters to drop the penalty clause to assure its passage. The amended bill was signed and has been almost a dead letter on the statute books for two years. It was believed that public officials would observe the law without enforcement provisions but this was not the case and a concerted effort was made to bring all organized forces to bear upon the campaign when the next session convened at Sacramento.

Under the leadership of Lynn S. Atkinson, the various organizations of the construction industry were brought together in the southern part of the State last year in a new body known as the Construction Industries Joint Committee. The movement soon attracted state-wide attention to the day labor question and the moral and financial support of the construction industry of the state was assured. The plan and program of the organization was fully detailed in the Constructor of September, 1924, and is well worth study by those who would achieve similar results in legislative lines. The sole purpose of the committee is the defense of the general contract method and the exposure of the waste of day labor in the construction of public works as a pre-emption to the taxpayers and the industry of the State. The committee has accomplished much in attracting attention to the practice of letting work to others than general contractors built greatest feat is the passage of the complete Breed Law which the Governor signed May 15th and becomes one of the most beneficial laws of this State on August first.

The Contractors Association of Northern California co-operated with the Southern California Chapter of the Associated General Contractors of America, to effect this creditable achievement, with working through the Construction Industries Joint Committee, which has a very real showing of strength with its paid membership of other groups such as general and sub-contractor organizations, surety bond associations, builders' exchanges and others. As much as representation is on a basis of one member for each \$1000 membership, this indicates a very real interest and substantial support of the issue. The unanimity of purpose and concentration of forces made the result certain and that it has been so well one reflects much credit

to every member of the organization. They have rendered a great public service and earned the rare title "Co-Operators," by making the Breed Day Labor Bill and law in California.

The Breed Day Labor Law is here-with printed in full:

"Section 1. It shall be the duty of the state highway engineer, the state engineer, the state architect, and of every county engineer, county surveyor, city and county engineer, county highway engineer, road commissioner, city engineer, commissioner of public works, superintendent of streets, harbor engineer, flood control engineer, the engineer of any board or commission of state, the engineer of any board or commission of any city or city and county, and the engineer of any reclamation, irrigation or other district, political sub-division or agency of the state directing, supervising or superintending the construction, or in charge of engineering work for or in connection with the construction of any bridge, road, street, highway, ditch, canal, dam, tunnel, excavation, building or structure within the state by day's labor or force account, except maintenance work, work occasioned by emergency and work costing less than five thousand dollars, to keep an accurate account of the cost of such work; to prepare and file in his office, prior to the commencement of the work, full, complete and accurate plans and specifications, and an estimate of the cost thereof, except by law requiring the preparation and filing of such plans, specifications and estimates of cost by some other officer, or in some other office, and within sixty days from the completion of any such work to prepare and file in the office of the county clerk or the county in which the work is performed, or if any such reclamation, irrigation or other district maintains an office, then in the office of his own such district instead of the office of the county clerk, a certificate in writing verified by him in the same manner as complaint in civil actions, setting forth the estimate of cost, names of bidders with prices bid, if bids there be, change in adopted or approved plans and specifications, that the work performed has or has not been in accordance with such plans and specifications, a list of any publicly owned equipment used in the work, and an itemized statement of the actual cost of all labor, materials, rentals, repairs, compensation and other insurance, transportation of labor, equipment and materials, engineering or architectural services including the services of public employees in connection with such work, and any and all cost entering into the work performed, including a reasonable amount for depreciation of publicly-owned equipment used in the work and the cost of repairs thereon while so used.

"Sec. 2. Every such public officer or public employee mentioned in Section 1 of this act who willfully violates any of the provisions of this act is guilty of a misdemeanor."

1924 LUMBER CUT

The National Lumber Manufacturers Association estimates the 1924 cut of lumber at thirty-seven billion feet, of

which nearly twenty-two billion feet was used in building, three and a half billion feet for ties, two and half billion exported, and the balance utilized industrially.

Craftsmanship is the priceless
ingredient sought by every archi-
tect for his client. It is more than
an ideal with us and with the
workmen who are a part of us—
it is an obligation and a tradition
over forty years old.

That is why you will find
Quandt craftsmen wherever fine
work and quality workmanship are
insisted upon.

Co-operation for the economy of
quality.

LIME SALES DURING YEAR 1924

Sales of lime by manufacturers in the United States in 1924 amounted to 4,072,000 short tons, valued at \$39,596,423 f. o. b. kilns, according to a compilation of reports of producers made by the Bureau of Mines, Department of Commerce. These figures show a reduction in quantity of less than 1 per cent and in value of about 1 per cent from the 1923 figures of 4,076,243 tons and \$39,993,652. The average value per ton at the kilns in 1924 was \$9.72, compared with \$9.81 in 1923.

Lime sold for building and construction amounted to 2,169,700 tons and valued at \$23,011,935, an increase of about 2 per cent in both quantity and value. Lime sold for chemical uses amounted to 1,653,964 tons valued at \$14,719,974, a decrease of 3 per cent in quantity and 6 per cent in value. Lime sold for agricultural purposes amounted to 248,336 tons valued at \$1,864,514, an increase of 3 per cent in quantity and 2 per cent in value.

The sales of hydrated lime in 1924, included in the above total, were 1,316,664 tons valued at \$13,199,846, an increase of 7 per cent in quantity and 8 per cent in value. About 78 per cent of the hydrated lime sold—1,029,384 tons valued at \$10,420,151—was for construction work. This was an increase of 12 per cent in quantity over 1923. Hydrated lime for chemical uses (158,870 tons valued at \$1,618,873) and for agricultural purposes (128,410 tons valued at \$1,160,822) both showed decreased sales as compared with 1923.

Although lime is manufactured in 40 of the states and in the territories of Hawaii and Porto Rico, over 98 per cent of the production comes from 22 states.

SAFETY INSPECTIONS

Elevators are watched more closely than anything else by the safety engineers of the Industrial Accident Commission, according to a report by the commission showing that 4733 elevator inspections were made during the fiscal year of 1924-25.

During the year a total of 16,768 inspections were made, as against a total of 10,932 inspections during the fiscal year of 1923-24. This is an increase of 53 per cent and represents the greatest number of inspections made in any one fiscal year in the commission's history.

By divisions the inspections numbered as follows: Mining, 2007; construction, 3775; elevator, 4733; boiler, 2685; mechanical, 2009; electrical, 456, and lumber 905.

\$15,000,000 Merger is Reported

Negotiations are now well under way for the merger of the Hall-Scott Motors, Inc., of Berkeley with the J. G. Brill Interests, railroad, street car and motor stage builders of Philadelphia and the Fageol Motors Company of Oakland, has been reported. The proposed merger is a \$15,000,000 deal and is said to depend on the decision of directors of the Fageol Motors Co.

If the merger goes through it probably will mean either that the Hall-Scott plant at Fifth and Snyder streets will leave Berkeley or else will be enlarged as the principal Pacific coast plant of the new combination. The Hall-Scott company now occupies a plant of 12 buildings and employs 550 in the factory and 50 in the offices with an annual payroll of \$800,000.

The corporation produces Hall-Scott air and marine motors, Ruckstell four-speed axles for Fords and Fageol bus engines. Aside from land and buildings it represents an investment of more than \$800,000. It is generally understood that the Ruckstell four-speed

axles are soon to be manufactured in the East under the more direct supervision of Ford factory men. For this reason, it is understood, that the Hall-Scott company would welcome a merger which would result in them manufacturing another standardized part.

It is pretty generally known among West Berkeley manufacturers that for some years the Hall-Scott people have been experimenting with an electric locomotive with dynamos driven by gasoline engines. This locomotive is said to have been perfected and may account for the interest which the Brill interests are taking in the Berkeley plant.

It is generally understood that negotiations between the Brill and Hall-Scott Motors, Inc., have proceeded further than those with the Fageol Motors company. S. M. Curwen, representing the Brill interests, has been in the East Bay for several days and has been in consultation with Col. E. J. Hall and L. S. Scott of the Berkeley concern.

OF SKYVILLE.

DECIDED THE prizes.

THAT SANDY Pratt won.

"I THANK you."

Sandy Pratt's Rocky Mountain sheep or goat (winner of first prize at the State Fair at Sacramento). His home is at Prattrock (near Folsom) and he eats crushed rock. The Elks, Masons, Odd Fellows, Knights of Columbus and Shriners want to buy him from Sandy for the candidates to ride when they join these secret orders. Sandy's "rock crusher" is not for sale.

**LOS ANGELES BUILDING IN AUGUST
TOTALS \$10,221,257**

Los Angeles building total for August, 1925, is less than that for July and smaller than for any August since 1921. During the month the city building department issued 3943 permits with an estimated valuation of \$10,221,257, as compared with 3480 permits with an estimated valuation of \$11,298,896 for July and 385 permits with an estimated valuation of \$13,893,095 for August, 1924.

Class A construction for August was slightly more than for July, permits being issued for eight such structures estimated to cost \$1,573,100. Class C construction amounted to 11,612,238 for 65 buildings and Class D, all-frame construction, aggregated \$5,445,923 for 2406 buildings.

For eight months of the current year Los Angeles' building total is ahead of that for the corresponding period last year, although the margin has been reduced to approximately \$375,000.

Housing operations for August, 1925, were represented by 1219 permits for dwellings and apartments estimated to cost \$5,749,226, or 34.9 per cent of all permits and 56.2 per cent of the valuation for the entire month. Accommodations will be provided by these buildings for 1338 families.

Permits were issued during August for 32 apartment houses estimated to cost \$1,172,400 and containing 425 apartments. Permits were also issued for three hotels estimated to cost \$605,000. One of these is to be a \$500,000 fireproof building. Hotels are not included in the housing statistics prepared by the city building department. Some apartment house and hotel building has perhaps been discouraged by hotel and apartment house owners complaining of over-building, but many persons are taking advantage of the present opportune time to build, believing that the surplus accommodations will be absorbed within a reasonable time.

TO BACK BUILDING BILL

An omnibus public building bill providing for the expenditure of \$100,000,000 or more in the national capital and in cities all over the country will be supported by President Coolidge in congress this winter, probably as one of the principal features of his legislative program. Mr. Coolidge favors putting all the building appropriations in a single bill because of the difficulty in getting congressmen to support a bill providing buildings for the District of Columbia.

Official Proposals

NOTICE TO BIDDERS

(Pumps—James Irrigation District)

Public notice is hereby given that the Board of Directors of the James Irrigation District of Fresno county, California, have called and do hereby call for bids on the following:

Twelve (12) Vertical deep well pumps, turbine type, top head drive, to be installed in 12 inch wells, 50 ft. column, 15 ft. suction, range of lift 40 to 50 feet, equipped with 12 vertical, hollow shaft, automatic start motors, 15 h. p. 3-phase, 60 cycle, 220 volt, 1800 r. p. m., 40 deg. temperature rise, with entry and starting switch, according to plans and specifications on file in the office of said Board in the City of San Joaquin, Fresno, county, California.

Separate bids should be submitted as follows:

1. F. O. B. San Joaquin, California.
2. Installed at points of location designated by the District Engineer.
The Board will receive sealed proposals for furnishing the above material until the hour of 10:30 o'clock a. m., September 21st, 1925, at which time all proposals will be opened by said Board at its aforementioned office.

Proposals should be addressed to the Board of Directors of James Irrigation District, San Joaquin, Fresno county, California, and plainly marked "Bids on Pumps."

The Board reserves the right to reject any or all bids.

The successful bidder will be required to furnish a bond, with good and sufficient sureties, to be approved by said Board, payable to said District, for 25% of the purchase price, conditioned upon the performance of the pumps furnished according to the efficiency curve submitted by the manufacturers of same.

Dated September 3, 1925.

PETER RUSCONI, President.

E. McD. KELLER, Director.

R. J. HALE, Director.

Constituting the Board of Directors James Irrigation District.

Attest:

A. F. C. GREENE,

Secretary of said Board.

STATE OF CALIFORNIA

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock p. m. on October 5, 1925, at which time they will be publicly opened and read, for construction, in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows: Glenn County, a reinforced concrete girder bridge, 21 feet wide, across Walker Creek about 1 mile east of Willows (III-Gle-45-A), consisting of five (5) twenty-seven (27) foot spans on concrete piers.

Sonoma County, a reinforced concrete girder bridge, 30 feet wide, across Willow Brook about 2 miles north of Petaluma (IV-Son-1-C), consisting of one 34-foot and two 40-foot spans on concrete pile bents.

Plans may be seen, and forms of proposals, bonds, contract and specifications may be obtained at the said office and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineers' offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno,

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

HARVEL M. TOY,

LOUIS EVERDING,

N. T. EDWARDS,

California Highway Commission.

R. M. MORTON,

State Highway Engineer.

W. F. MIXON, Secretary.

Dated: September 8, 1925.

NOTICE TO CONTRACTORS

(Hillside School—City of Berkeley)

Sealed bids will be received by the Board of Education of the City of Berkeley and of Berkeley School District of Alameda County, at its office located at 2133 Allston Way, Berkeley, California, until Tuesday, the 20th day of September, 1925, at four o'clock P. M., at which time said bids will be opened for the erection and completion of a new school building for said school district to be known as the Hillside School building and to be located at Le Roy Avenue and Buena Vista Avenue in the City of Berkeley, California.

Separate bids will be received for:

1. Concrete and excavation P. M.
2. Hollow tile, brick and stone;
3. Carpenter work;

QUANTITY SURVEYOR

Valuation Engineer

ARTHUR PRIDDLE

693 Mission Street, at Third St.

San Francisco, Calif.

General Listing Bureau

Architect's Preliminary Estimates

4. Slate and tar and gravel roof;
5. Lath and plaster;
6. Sheet metal;
7. Plumbing;
8. Electric work;
9. Painting;
10. Heating.

Plans and specifications for said work are on file at the office of W. H. Rallich, Jr., Architect for said Board of Education, Mercantile Trust Company Building, corner of Shattuck Avenue and Center Street, Berkeley, California.

On deposit of Ten (\$10.00) Dollars, said plans and specifications may be had by any prospective bidder for any one of the branches of the work above listed. These plans and specifications may be retained for a period of five days.

If the plans and specifications are not returned to the Architect within the time above specified, or are returned in a mutilated or damaged condition, the deposit will be forfeited and will be immediately used for the purchase of a new set of blue prints and specifications.

Bids must be made on proposals obtained at the office of the Architect, and be signed by the bidder and accompanied by a certified check, certified to by some responsible bank or banker, and made payable to Berkeley School District of Alameda County, to be retained by the said School District as agreed and liquidated damages should the party or parties to whom the contract should be awarded fail to enter into the contract after the award, or to give bonds required for the faithful performance of the contract, or any bond required by law. The amount of said check shall be for at least ten (10%) per cent of the total amount of the bid.

Bids will be opened by the Board of said District on the 29th day of September, 1925, at 1 o'clock P. M. in the office of the secretary of said Board of Education, 2133 Allston Way, Berkeley, California.

The Board reserves the right to reject any and all bids or any or all items of such bids.

GEO. S. MOUSER,

Secretary of the Board of Education of the City of Berkeley and of Berkeley School District of Alameda County, State of California.

NOTICE TO BIDDERS

(Painting—Bakersfield)

PURSUANT to order of the Council of the City of Bakersfield, Notice is hereby given:

That bids will be received at the office of the City Clerk until five o'clock P. M. September 15, 1925, the same to be opened at the regular meeting of the Council at eight o'clock P. M. of said date, for painting the exterior of the City Hall according to specifications on file in the office of the City Clerk, to which reference is hereby made and by such reference are made a part of this notice.

All bids must be accompanied by a certified check in the sum of ten per cent of the contract price.

The City Council reserves the right to reject any and all bids.

Dated: September 1, 1925.

V. VAN RIPER,

City Clerk and ex-Officio Clerk of the Council of the City of Bakersfield, California.

SANTA ROSA BUILDING

Twenty-four buildin permits were issued in Santa Rosa during the month of August. The total expenditure for the month was \$30,340, according to W. B. Simpson, city building inspector.

Engineering News Section

BRIDGES

LOS ANGELES, Cal.—Until 2 P. M., Sept. 28, bids will be rec. by county for wooden bridge, 196 ft. in length, on Anaheim Rd. over San Gabriel River. Structure will consist of two 60-ft. Howe truss spans and two 38-ft. A frame approach spans. Plans obtainable from Road Dept., 1101 Hall of Records, on deposit of \$5, to be refunded. Cert. or cash, chk. or bond, 10%.

FRESNO, Fresno Co., Cal.—Until 2 p. m., Sept. 18, bids will be rec. by supervisors to const. rein. conc. bridge on Temperance Ave., involv. approx. 40.14 cu. yds. reinf. conc. Cert. check 10%. Plans obtainable from clerk, D. M. Barnwell, clerk.

FRESNO, Fresno Co., Cal.—Until 2 p. m., Sept. 18, bids will be rec. by county to const. reinf. conc. cuvy. on Del Rey Ave., involv. approx. 38.04 cu. yds. reinf. conc. Cert. check 10%. Plans obtainable from D. M. Barnwell, clerk.

SAN JOAQUIN, Fresno Co., Cal.—Until Sept. 21, 10:30 A. M. bids will be rec. by A. F. C. Greene, Sect'y., James Irrigation District, to fur. and install twelve vert. deep well pumps, turbine type, top head drive, to be installed in 12-in. wells, 50 ft. column, 15 ft. suction, range of lift 40 to 50 ft. equipped with 12 vertical hollow shaft, automatic start motors, 15 H. P., 3-phase, 60-cycle, 220-volt, 1800 r. p. m. 40 deg. temperature rise with entry and starting switch. Bids to be (1) f. o. b. San Joaquin and (2) installed at points of location ordered by district. See call for bids under official proposal section in this issue.

EUREKA, Humboldt Co., Cal.—Until Sept. 15, bids will be rec. by John Griffith, city Sup't. of Public Works, 524 D St., to fur. and del. 400 lin. ft. 6-in. Class B c. l. pipe for Eureka Water Dept. Bid to be f. o. b. Eureka.

OAKLAND, Cal.—Following bids received by East Bay Municipal Utility District for construction of works in connection with Mokelumne River water project:

Plan No. 1

Smith Bros., Inc., 412 Second St., Marysville, Lafayette Tunnel, \$1,191,822; Walnut Creek Tunnel, \$161,740; 190,000 ft. conc. pipe, \$3,644,655; whether lead or cement joints not specified in bid; extra work at cost plus 20%. Total bid \$4,908,217. Bidder would not accept Schedule No. 2 alone but would accept either Schedule No. 1 or No. 5 alone.

T. E. Connolly, Sheldon Bldg., San Francisco, Walnut Creek tunnel, \$152,906; extra work at cost plus 10%.

Twohy Bros., Sharon Bldg., San Francisco, Lafayette Tunnel, \$1,220,134; Walnut Creek tunnel, \$169,634; Walnut Creek Power House, \$23,468; three 25 M. G. D. pump units, \$54,075; two 25 M. G. D. pump units, \$36,067; 190,000 ft. D. R. steel pipe, \$4,442,871; 190,000 ft. welded steel pipe, \$2,451,271; 85,000 ft. T. R. steel pipe, \$2,308,710; 85,000 welded steel pipe, \$2,432,930; 89,000 ft. T. R. steel pipe, \$2,262,393; 89,000 ft. welded steel pipe, \$1,712,973; 78,000 ft. D. R. steel pipe, \$2,029,604; 78,000 ft. welded steel pipe, \$1,633,702; Lancha Plana Tunnel, \$721,610; Lancha Plana Dam, \$3,223,914. Extra work at cost plus 15. Total \$16,773,165 if riveted steel pipe is used and \$14,655,863 if electric welded steel pipe is used. On Schedules 5, 6, 7 and 8, under Plan No. 1, if all four schedules are awarded, the following reductions will be made: For riveted pipe, \$320,000; for welded pipe, \$240,000. On Schedules 5, 6, 7 and 8, Plan No. 1, if it is permitted to dip and wrap the pipe in Hermastic, instead of enameling and wrapping as required by specifications, a reduction of \$140 per ft. of pipe will be made. If all four Schedules (5, 6, 7 and 8) are awarded and the use of Hermastic is allowed instead of enameling and wrapping, the sum total of bids for the four schedules (5, 6, 7 and 8) will be reduced \$620,000.

Chas. and Geo. K. Thompson, Los Angeles, 89,000 ft. T. R. steel pipe,

\$2,636,700; 89,000 ft. welded steel pipe, \$2,012,700; 78,000 ft. D. R. steel pipe, \$2,032,540; 78,000 ft. welded steel pipe, \$1,863,200; Lancha Plana tunnel, \$624,045. No bid on extra work. Total \$9,228,985.

L. S. Atkinson, Los Angeles, Lancha Plana Dam, \$3,081,378. Extra work cost plus 15%.

Winston Bros., Minneapolis, Minn., Lancha Plana Tunnel, \$908,969; Lancha Plana Dam, \$3,375,061. Extra work at cost plus 25%. Total \$4,284,030.

Cuy F. Atkinson and W. E. Kier Construction Co., Los Angeles, Lancha Plana Dam, \$3,341,802; extra work cost plus 15%.

A Variety of Work on the Same Machine

In addition to business correspondence the modern office has a large variety of work for the typewriter.

Tabulating, billing (simple and condensed) sten-cii cutting, writing on ruled forms and many other kinds of office work can all be done on the L. C. Smith & Bros. typewriter.

The decimal tabulator and the variable line spacer are part of the inbuilt service of every L. C. Smith & Bros. machine.

Typewriters Rented

Hoists that Qualify

Three Clyde Hoists, a one drum steam and two double drum steam, handled all the material used in the construction of the new Arlington Hotel, at Hot Springs, Arkansas. They have lived up to the usual Clyde standard, by handling the work to the entire satisfaction of their owners.

CLYDE

Mr. G. H. Burden; of Ault & Burden, general contractors, writes: "We are glad to furnish photo of the Arlington Hotel with our best wishes and take this occasion to express our complete satisfaction with the three Clyde Hoists used on this operation.

"This equipment has not given us at any time the least trouble and has met every demand made upon it. We wish to assure you of our high regard for the equipment secured from your good company and the genuine quality involved."

YOU'LL TAKE PRIDE IN YOUR CLYDE!

KOEHRING DANDIE

Light Mixer

**Four-cylinder
Gasoline
Engine**

FAST! Fast! Fast! Here is a light mixer with a speedy charging skip, liberal drum dimensions and a high speed discharge that will break all your records of putting concrete where it pays you profits!

Just the balanced light weight to haul behind your truck on its rubber tired disc wheels and get from job to job in a big hurry.

Four cylinder, radiator cooled, gasoline engine. Transmission from engine to drum enclosed in oil bath! Double gear drum drive, chilled, beveled gears! Drum rollers fixed to shafts revolving in big bearings!

It's useless to try to give you the smallest idea of what this Dandie represents in superior speed and construction details—but it's *strong, rugged*—it will stand-up for all the punishment you can give it, and *work and work, and work!*

And you have a chance to buy at a price that gives you all the benefit of the economies the Koehring Company effect by big, standardized production! If you had half an idea of what this mixer means in the way of actual value, you would send back the coupon for full detail by next mail!

Koehring Dandie — 7 cu. ft. capacity mixed concrete. High speed charging skip, or low charging hopper with hinged steel framed platform which may be folded against mixer for hauling. Discharged from either side of mixer.

4 cylinder gas engine, radiator cooled, or optional two cylinder engine, hopper cooled. Drum drive transmission in oil bath. Maybe equipped with *automatic water measuring tank*, and *Light Duty Hoist*.

**Send Back this
Coupon!**

WORLD-CIRCLING ROAD MILEAGE ADDED LAST YEAR

Twenty-three thousand miles of highways were built to grade or surfaced on the State systems in 1924, according to information collected by the Bureau of Public Roads of the United States Department of Agriculture from the various State highway departments. More than 17,000 miles were surfaced. The surfaced mileage constructed by types was as follows: Sand-clay, 1355; gravel, 7660; waterbound macadam, 467; surface-treated macadam, 1000; bituminous macadam, 997; sheet asphalt, 120; bituminous concrete, 584; cement concrete, 4850; brick and other block pavements, 164.

The bureau estimates that at the end of 1923 there were surfaced roads in the State systems totaling 111,400 miles. Adding the mileage in 1924, after making allowance for the fact that a portion of the new work consisted of the resurfacing of old roads, it is indicated that approximately half of the 251,610 miles embraced in the State systems were surfaced at the beginning of the present year. These figures represent work done under State supervision, including Federal-aid work, but do not include county or local work off the main State systems. Progress in 1925 should be at least as great as in 1924 according to the best information available.

Community Conference Board A Success

The Community Conference Board of Rochester recently made public a report of the progress it has made in stabilizing conditions and in reducing seasonal unemployment in the building trades.

The Board was organized in 1921 at the suggestion of George Eastman, chairman of the Eastman Kodak Company. It consists of two representatives of the chamber of commerce, two building contractors, three representatives of the building trades unions and one each from the city planning commission, the real estate board, the local society of architects and the Rochester association. There are also two representatives of municipal government—the fire marshal and the superintendent of school buildings.

The Board meets once a month. It acts as a fact-finding body and works largely through newspaper publicity. An employment survey is made out monthly from questionnaires sent to

the employers who employ approximately 80 per cent of the construction labor in the city. Following are some of the definite advantages of the work of such a Board to any community:

1. It helps to provide steady all year employment for trade workers.
2. It enables the contractor to reduce his overhead by furnishing continuous work.
3. It aids the architect by at least partially cutting down seasonal peaks in his office.
4. It helps the merchants by providing steady work to some of their customers; a steady worker is a steady buyer.
5. By stabilizing conditions, it tends to attract apprentices to the industry and helps to keep good mechanics in the community.
6. It helps to avert labor troubles. Rochester has had no serious period of unrest in the building industry since 1921, the year the Community Conference Board was formed.

DOMESTIC VS. FOREIGN CEMENT ON THE PACIFIC COAST

Foreign portland cement has recently been entering Pacific coast ports in large quantities. Thirty years ago, when the editor was engaged in construction work on Puget Sound, domestic portland cement was available there, for there were no local cement mills. Aided by a protective tariff, the output of cement on the Pacific coast has reached a large volume. In spite of the fact that wage rates are 150 per cent higher than they were 30 years ago, portland cement is selling on the Pacific coast at as low a price as it sold 30 years ago. At San Francisco, for example, domestic cement sells at about \$2.70 per bbl., and the wages of concrete workers and building laborers are \$5 a day. Belgian and Swedish cements are selling there at about \$2.35 per bbl.

Were it not for the existence of the Pacific coast cement mills, of course the foreign producers would be demanding a much higher price. The question that now confronts Pacific coast engineers is whether they would specify American cement to the exclusion of foreign cement.

Those who believe in the protective principle will probably favor excluding foreign cements so long as domestic cement prices are reasonable. In view of the fact that domestic cement producers are selling cement at a price that is remarkably low, considering the great rise in rates of wages, there is strong reason for continuing to favor the domestic cements even though the price may temporarily be slightly higher than that of foreign cements.—Engineering and Contracting.

Rav B. Cox, secretary-manager of the Bull-In Fixture Co., Berkeley, announces the company will install a veneering press. Two cars of veneering panel stock have been received from Seattle.

BUILDING ACTIVITIES CONTINUE BRISK, IS LABOR REPORT

San Francisco, Oakland, Berkeley and San Jose continue to lead California cities in building activities, according to the industrial employment survey report of the Department of Labor for August.

The extensive volume of building in these cities has resulted in a shortage of bricklayers, skilled laborers, plumbers, first class carpenters, plasterers and sheet metal workers, but this condition was believed only temporary and not of serious nature.

Industrial activity likewise was "well maintained in practically all lines" in the San Francisco district, embracing Oakland, San Leandro, Berkeley, Alameda, Richmond, Pittsburg, Crockett, Napa, Vallejo and South San Francisco, the report showed.

Virtually all manufacturing plants were reported operating at capacity.

With the bay district continuing its extensive building activities, San Jose featured with an unusual rate that has resulted in the employment of between 3000 and 4000 workers there. Plenty of mechanics are reported available there due to the heavy influx from other localities.

Building activities are likewise reported brisk in Los Angeles and vicinity, but Stockton, Fresno and some other of the interior cities are reported as having "not a great deal of activity at this time" in building lines.

Bakersfield and Taft are reported "busy" while far-southern and far-northern communities are "about as usual."

30-MILE TUNNEL PROPOSED

The Cascade Tunnel Association has been formed by citizens of Seattle, Wash., with a view to effecting with national, state and railroad financing, the boring of a tunnel 30 miles long, linking the eastern and western halves of the state.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

California civil service commission, Forum Bldg., Sacramento, announces examinations for civil engineering positions as follows, applications to close Oct. 1: Junior engineering aid, grade 1, rank A, \$105 a month, rank B, \$110 to \$130; civil engineering aid, grade 2, \$135 to \$165; junior civil engineer, grade 3, \$170 to \$230; assistant civil engineer, grade 4, \$235 to \$280. Examinations are also announced for civil engineering draftsmen as follows, applications to close Oct. 1: Junior draftsman, grade 1, \$130; assistant civil engineering draftsman, grade 2, \$135 to \$165; civil engineering draftsman, grade 3, \$170 to \$230; senior engineering draftsman, grade 4, \$235 to \$280.

The U. S. civil service commission announces examinations for engineer, salary \$3800 a year; associate engineer, salary \$3000, and assistant engineer, salary \$2400, applications to close Oct. 20. Advancement may be expected in pay up to \$5000 for engineer, \$3600 for associate engineer and \$3000 for assistant engineer. An examination for assistant mechanical engineer, salary \$2400 to \$3000 a year, is also announced, applications to close Oct. 10. The engineer positions to be filled are in the electrical department, bureau of mines and construction and repair bureau, navy department; mechanical engineer in office of supervising architect.

Rents in Los Angeles are between 161 and 170 per cent higher than the pre-war level, according to a survey of housing conditions over the United States, which has just been completed by the National Industrial Conference Board. Rents in other cities are showing a slight decline, it is reported. The Pacific Coast apartment and small house rents are holding up to last year's level closer than anywhere and with the exception of Riverside no decreases are reported in this State. Riverside rents fell from 21 to 30 per cent from March to July of this year, the greatest decrease noted anywhere in the country.

Nathan L. Miller, former governor of New York, and Myran C. Taylor have been elected directors and members of the finance committee of the United States Steel corporation. The elections fill two vacancies on the board of directors, one resulting from the recent death of R. V. Lindabury and one that previously existed. Elbert H. Gary, chairman of the corporation, also announced that Mr. Miller would succeed the late Mr. Lindabury as general counsel for the corporation.

W. F. Howlett and Walter Sayers, operating under the firm name of East Lake Hardware Company at 3401 E-Fourteenth street, Oakland, have dissolved partnership.

Albert E. Smith, 2708 Grove street, Berkeley, will operate under the trade name of Superior Floor Company with headquarters in Berkeley.

Plant of Simpson Bros. Lime & Sand Company, on the B street levee, Sacramento, suffered a slight fire loss, Sept. 13.

A number of the larger cities throughout the country are once more reporting that certain of the trades are beginning the pernicious practice of snowballing wages. This is particularly true in the case of the plasterers. An excellent opportunity was afforded this craft to take this questionable means of increasing the weekly pay when the men returned to work after having been on strike in certain sections. Contractors are urged to take a firm stand on this issue and refrain from paying bonuses to any craft. The practice of offering higher wages than the going rate never did and never will produce more mechanics. The only thing that it does is to increase the cost of building, upset conditions in the industry generally and engender a spirit of unrest not only in the ranks of the craft affected but all along the line.

A study of costs and methods and building construction in all parts of the country will be started this month by five groups of contractors representing the Associated General Contractors of America. Attention will be directed to both private and public building programs in principal cities and to methods of financing new construction with a view to eliminating certain practices which the contractors feel result in inflated rents. They will investigate construction work by governmental units without use of competitive contracts. Each of the five groups will have a separate itinerary, one going from Chicago to Denver and then to Salt Lake City, Spokane, Seattle, Portland, San Francisco, Los Angeles and El Paso.

Unfilled orders of the United States Steel Corporation on August 31, totaled 3,512,803 tons, a decrease of 26,664 tons compared with the end of the preceding month. The decrease in unfilled tonnage at the end of August is the smallest reported by the corporation since orders began to fall off last month. The total, however, now is the lowest since October, a year ago, when orders on the company's books stood at 3,525,270 tons. The statement was about in line with Wall Street's expectations, which had ranged from estimates of a 50,000-ton decrease to hints of a slight increase.

A total of 2,251,041,772 feet of lumber was moved by water for the north-west during the first half of 1925, which is eleven million feet less than for the same period of 1924. Eight hundred million is credited to California, 735 million to the Atlantic coast, 661 million went foreign—Japan taking 276 million, Australia 88 million and Great Britain and the continent 91 million feet.

Under an ordinance presented to the Sacramento city council a change would be made in the zoning ordinance to prohibit planing mills or sawmills in light industrial zones. The ordinance is intended to prevent the reconstruction of a recently destroyed planing mill on N street, between Nineteenth and Twentieth streets.

ALONG THE LINE

Daniel W. Mead of Madison, Wisconsin and R. E. McDonnell of Kansas City and Los Angeles, have been selected to review the report of Albert Givan, general manager and chief engineer, on the proposed Silver Creek water and power project for the Sacramento Municipal Utility District. The work of these two engineers will augment that of William Mulholland of Los Angeles and C. E. Grunsky of San Francisco, who previously were chosen by the directors of the district. The review will embrace the water supply available at Silver Creek and the costs of operating the power plant. It has been estimated unofficially that these will run about \$11,000,000. The initial plans provide for establishing a power plant, with the development of water to come later.

Colonel Thomas H. Jackson, engineer of the Ninth Corps Area, announces he will open a school of engineering in the State Armory, Fourteenth and Mission streets, San Francisco, on October 20. The course will be divided into seven periods of one month each and will be open to officers of the National Guard and reserve. Similar schools are to be opened in all army areas of the country.

The Jasper-Stacy Co. of San Francisco has filed articles of incorporation in San Jose. The company is capitalized at \$250,000 and will engage in a general engineering and construction business. Directors are J. P. Lilienthal, Oscar W. Jasper Jr., and N. T. Stacy, the two former residents of San Francisco and the latter residing at San Mateo.

Architects Morrow and Garren, De Young Building, San Francisco, have dissolved partnership. Mr. Garren will operate independently with offices at 1606 De Young Building, while Mr. Morrow will become associated with Gertrude Comfort Morrow, operating under the firm name of Morrow and Morrow with offices at 1605 De Young Building.

City of Oakland contemplates \$9,960,000 bond issue to finance improvements to the outer and inner harbor and the Brooklyn Basin. A committee of engineers will submit a report on the proposed improvements shortly. This committee consists of G. B. Haggard of Oakland, C. T. Leeds of Los Angeles and Prof. Charles Marx of Stanford University.

Prof. Aristotile R. Ambrosini, architect and sculptor, has opened offices at 1105 Bush street, San Francisco. Mr. Ambrosini maintains a branch office and studio in Carrara, Italy.

Henry C. Nelson, retired contractor and builder, died at his home in Alameda, Sept. 9. Nelson was a native of Maine.

Construction Lessons of S. B. 'Quake Reviewed by L. A. Architect

At a recent meeting of the Architects' League of Hollywood, Calif., Robert B. Stacy-Judd, read a report of observations made at Santa Barbara a few hours after the earthquake of June 29, 1925, in which he made constructive recommendations for the most effective use of various kinds of materials to resist seismic forces. His conclusions received the unanimous endorsement of the Architects' League. The paper is published herewith in full.—EDITOR.

On June 29th I spent the night in a town a few miles north of Santa Barbara and the following morning at 6:45 A. M. the three-story hotel building in which I stayed commenced to sway rhythmically. The swaying motion was perfectly regular like the swinging of a pendulum and I counted eight motions.

At two minutes to 7 A. M. a lesser quake took place, but no damage was done in the town or immediate vicinity. Later I learned the Arlington Hotel in Santa Barbara had collapsed, but could gather no further particulars whatever. This meagre information led me to believe serious conditions must exist other than the sole collapse of the Arlington Hotel, so I hastened with all speed to Santa Barbara and was fortunate in arriving prior to the more rigid restrictions being imposed.

For a considerable distance to the north of Santa Barbara the quake had created considerable damage to brick buildings and stone rubble structures. I noticed that in practically every instance brick chimneys were destroyed. The first destruction of note was a church erected on a hill alongside the highway. Practically half the structure had collapsed, including the tower.

As we drew near Santa Barbara demolition was more complete. For miles the highway had cracked and opened up and the fill on either side of the concrete highway had dropped, and at the same time parted from the highway, leaving a crevice from 6 to 15 inches in width. An embankment cut, in one instance, had shaken so much of the upper soil onto the highway that passage was obstructed.

Whilst driving along I noticed distinct steps had been formed in the concrete highway with, at this point, an indication of crushing, whilst further south a distinct gap approximately six to eight inches wide had formed across the concrete highway. This would indicate an earth movement from the south to the north as well as an earth shrinkage.

At various times during my progress towards Santa Barbara a considerable number of shocks were felt, and at 11 A. M. a severe quake was felt in Santa Barbara.

I visited the Samarkand hotel and investigation showed to a marked degree the severity of the quake and many freakish results. One of the most interesting conditions I noted throughout the whole of my observations was a brick flue running through the Samarkand hotel. So far as I remember this flue was approximately four feet by four feet square and probably twelve feet in height above roof level. Two distinct lateral breaks had occurred and the first section above the lower break was twisted to an angle,

yet leaving it square on the axis. The top portion was again twisted to an angle double of that below. I assumed by the result that a compound twisting motion had caused this. The tall Persian vases situated in the beautiful Samarkand Gardens were cast down and broken and thrown across the surface of the ground. This would indicate a jerking motion of the earth greatly different from the easy swaying motion I had experienced north of Santa Barbara.

I then visited the downtown areas and noted some peculiar results of the quake. As an instance, the entire front of the Californian Hotel had dropped into the street and left the wooden floor joist ends of several floors suspended without bearing. This is interesting from the fact that the flooring was completely supporting the joists and plaster ceiling below.

Upon investigating the Arlington Hotel I found the brick veneer had dropped from the framing in sheets and there was a deplorable lack of proper brick ties. The right wing of the main entrance which had reinforced concrete floors had collapsed and by the cursory inspection I was able to make I wondered how these slabs had performed the work for which they should have been designed, irrespective of earthquake conditions.

Upon examination of the many brick store buildings on State street, all of which had collapsed, I found very poor brickwork and in most cases a total absence of brick ties. In cases where brick walls were other than veneer a distressing absence of bond told its own story. Generally speaking, the construction work in the stricken area was deplorable. Reinforced concrete work badly executed, poorly mixed, poor sand, lack of good gravel, lack of cement, too rapid drying, in fact a total lack of proper supervision, mixture and materials in the main was responsible for 90 per cent of the loss. The Granada Theatre on State street is a reinforced concrete structure consisting of lobby and stores and the theatre in rear with six stories of offices above. Little material damage was noticeable. Slight cracks appeared in the plaster, but the main beams and structure generally stood the shock remarkably well. The front of the building was brick veneer, laid in cement with terra cotta trim. This speaks volumes for good structural design and execution, as this building stands in the heart of what, to all appearances, was a vital disturbance centre. En passant I may mention some of the hollow tile partitions in the office floors were demolished. I will diagnose this condition later.

Opposite the theatre is the San Marcos building, a reinforced concrete skeleton structure with reinforced

concrete filler walls. The reason for the total collapse of a portion of this building was obvious. I examined samples of concrete under a microscope and found that the sand employed was too fine and a large number of interstices led me to believe either the mix was too dry or excessive evaporation had taken place before setting. The sand I found to be very poor and far too fine to be of practical use. I would also judge insufficient cement had been used.

On the opposite side of State street is the post office building. This structure is of solid brickwork apparently laid five stretcher courses on one header course, properly bonded and laid in cement mortar. Plastered face and terra cotta trim.

This building stood the shock remarkably well, practically no damage was done. Upon examination a sample under the microscope which I took from a small opening, I found very good cement mortar had been used and its adhesive qualities were so excellent that a portion of brick came away with the sample. This is how good brickwork should act when laid in cement mortar. This building was erected under Federal supervision and shows conclusively how a well resigned structure properly executed will stand earth tremors.

As a complete vindication of brick structures correctly executed, I now take the Library building as an example of all that is opposite. This building is known in Santa Barbara as a Class C building. It is of brick walls and open joist construction, and due to its deplorable execution suffered badly. The walls facing toward the post office had completely collapsed.

Examining the mortar, I found same to be a lime mix which would easily leave the brick under ordinary strain conditions although had all rules of lime mortar brickwork been adhered to, much better binding conditions would have existed, yet I do not recommend lime mortar under any condition for earthquake areas.

Bonding was the usual five stretcher to one header course.

Upon examination of the mortar used in laying up the brickwork in this building, I found the mix too fine as to sand and by the large interstices and the powdery condition I concluded the absorption was so excessive that the setting process had never been completed.

Summary

The conclusions I have drawn from my investigation are these:

1. That all building superintendents be licensed by a board of architects.
2. That all city building inspectors be licensed by a board of architects.
3. The condemning of brickwork in

Pacific Coast Building in August

Following are the official, August, 1935, construction figures reported by building department executives from 30 cities in the seven Pacific Coast States comprised in the Pacific Coast Section of the National Monthly Building Survey of S. W. Straus & Co.:

CALIFORNIA:	August, 1935	August, 1934	July, 1935
Alameda	\$ 138,994	\$ 145,619	\$ 187,997
Alhambra	202,083	308,960	136,660
Anaheim	29,080	34,965	121,845
Bakersfield	86,320	62,626	292,416
Berkeley	929,956	901,903	848,193
Beverly Hills	907,150	484,191	644,430
Burbank	231,125	110,480	146,154
Burlingame	210,050	267,733	146,580
Colton	33,375	10,550	8,060
Coronado	41,125	63,920	62,350
Culver City	43,215	96,675	85,665
Emeryville	7,400	76,863	7,200

earthquake zones is deplorable, as I have shown that good brickwork properly bonded and laid in cement mortar in shovelled method is one of the best materials for wall constructions. The bricks must be thoroughly soaked for 24 hours before using and great care to be taken that when weather jointing is used same to be weathered in the true sense, not upside down as is so frequently seen. Further, that brickwork should not be specified four courses to the foot, as this makes too wide a joint. Mortar joints should not exceed one-half inch wide; three-eighths is preferable. Bonding should be given first consideration and instruction as to laying strictly adhered to. Metal brick ties, when used, should be corrugated.

For walls, where brick veneer and hollow tile backing are used, the hollow tiles should be made to sizes to conform with four courses of brickwork with three-eighths joints, so that at every two courses of tiles a galvanized corrugated iron tie can be placed perfectly true and straight at the course level. At the same time bonding tiles should be provided to allow eight-inch headers full bedding.

Walls erected under the above conditions will withstand considerable earth shocks.

4. That it is absolutely essential all steel in reinforced concrete must be correctly placed and spaced. That the mix be made strictly according to established formulas. That thorough mixing be insisted upon. That sound hard rock or gravel and clean sharp sand free from loam or other impurities be used. That great care be taken to insure the moisture being retained in the matrix during the setting period and final drying retarded as much as possible.

5. That in the case of concrete slabs resting on brick or hollow tile walls being used, same shall have a uniform bearing of not less than eight inches, and be properly tied into all walls, either with the reinforcing rods, if used, being extended or other anchor means provided for.

6. That hollow tile walls and screen walls can be made perfectly safe if set in cement mortar with the addition of a few rods. Interlocking tiles are much to be preferred. In all cases where reinforced skeleton frame structures are contemplated rods should be firmly secured in columns and run horizontally between bays every three feet high allowing for openings. All ties to be thoroughly soaked 24 hours before using.

7. That it is essential cross bracing be employed in all cases of reinforced concrete and steel skeleton frame structures where possible.

8. That the area of all footings should be slightly wider than usually allowed by existing by-laws and to have rods running the entire length firmly secured at all angles.

9. That in Class C construction all wooden floor joists bear directly on wooden plates securely anchored to brick or hollow tile walls. Also all wooden partitions be properly tied to exterior walls.—S. W. Builder and Contractor.

R. W. Bartram, the oldest living member of the Builders' Exchange of Alameda County, recently returned from an extended automobile trip through the Middle West and Western States. He visited Arizona, New Mexico, Texas, Oklahoma, Kansas, Missouri, Illinois, South Dakota, Idaho, Wyoming, Montana and Oregon.

Craftsmanship is the priceless ingredient sought by every architect for his client. It is more than an ideal with us and with the workmen who are a part of us—it is an obligation and a tradition over forty years old.

That is why you will find Quandt craftsmen wherever fine work and quality workmanship are insisted upon.

Co-operation for the economy of quality.

 mech. vent. sys., ornam. plas., provi-
 sions for pipe organ; \$300,000.

MISCELLANEOUS BUILDING
CONSTRUCTION

RENO, Nevada—Site for proposed
 "San Francisco" building at Transcon-
 tinental Highway Exposition has been
 selected by Assistant City Engineer
 Glick of San Francisco. It is expected
 the structure will cost \$25,000.

PORTLAND, Ore.—Arch. C. A.
 Houghtaling, 326 Stark St., is prepar-
 ing prel. plans for a \$200,000 amuse-
 ment structure to be erected for J.
 Harry De Honey of Seattle. The struc-
 ture will be erected at 21st and Wash-
 ington Sts., and will contain dance
 floor 80 by 150 ft., in addition to
 quarters for a theater, six stores, etc.
 Fireproof construction.

Geo. W. Carter, Sheriff,
 Leonard F. Dozier, Office Deputy,
 A. Norwood, Deputy,
 Susanville, Lassen Co., Calif.
 Dear Peacekeepers:

BEN ALI Shriners of Sacramento.

AND SUPERIOR California.

WILL BE in Susanville.

ON SATURDAY, September 26th.

TO INITIATE natives.

OF YOUR high mountains.

AND DEEP canyons.

AND SANDY Pratt, President.

OF THE Pratt Building Material Co.

CENTRAL OFFICE—San Francisco.

HAS THE contract.

TO FURNISH the "hot sands."

FOR THE poor candidates.

TO WALK over.

POTENTATE DR. Howard Cameron.

AWARDED THE contract.

TO SANDY Pratt.

BECAUSE THE potentate.

WANTED HARD, sharp sand.

AND SANDY Pratt.

WILL BE in Susanville.

WITH A large carload.

OF AMERICAN River sand.

FROM SACRAMENTO.

OR A mammoth carload.

OF WHITE Marysville sand.

FROM THE Yuba River.

NOW SANDY's sand.

IS SO clean and good.

THAT SOME of your natives.

MIGHT "TAKE" a little.

IF YOU or your deputies.

WERE NOT looking.

AND SAY, George.

ARE YOU wearing.

ON YOUR auto windshields.

SANDY'S FAMOUS signs.

THAT YOU ordered.

READING "SPEED Limit.

NINETY-NINE MILES Per Hour.

FORDS DO Your Best."

SANDY WILL call on you.

ON SATURDAY, September 26th.

AND LOOK for the signs.

THE ORIGINALS of which.

ARE LOCATED.

AT PRATTROCK (near Folsom).

WHERE SANDY crushes rock.

ALSO AT the three sand plants.

AT SACRAMENTO, Marysville.

AND PRATTTO (Monterey County).

"I THANK you."

Outside of producing sand, rock and
 gravel, one of the best things Sandy
 does is to dance and after Sandy de-
 livers the "hot sand" to the Shriners at
 Susanville, Sandy will step out at the
 Shriners' ball.

Official Proposals

NOTICE TO CONTRACTORS

(Nurses' Pavilion—County of San Mateo)

Notice is hereby given that sealed estimates will be received by the Board of Supervisors of San Mateo County, California, up to Monday, the 5th day of October, 1925, at 12 o'clock, A. M. for the erection of a two-story and basement building known as a Nurses' Pavilion and will be located on the property of the San Mateo Community Hospital now located at Beresford in San Mateo County, California, and in accordance with the plans and specifications as submitted by Will H. Toepke, Architect, and as filed with the Clerk of the Board of Supervisors, on September 8th, 1925, to which bidders are referred.

The estimates for the following work on the Nurses' Pavilion will be received as follows and must be in strict accordance with the plans and specifications as filed.

Estimates on the General Work will be submitted as follows:

Estimate No. 1: On the frame building using wood lath on interior.

Estimate No. 2: Will state the additional cost if wooden interior lath is changed to metal lath.

Estimate No. 3: Will state the additional cost in case the exterior frame is changed to reinforced concrete using wooden lath on interior.

Estimate No. 4: Will state the additional amount in case the wooden lath is changed to metal lath on building as called for in estimate No. 2.

Estimate on Electric Wiring.

Estimate on Hot Water Heating.

Estimate on Plumbing, Sewering, etc.

Bidders submitting estimates will be required to submit with their proposal a certified check or certificate of deposit on some responsible Bank or Trust Company in the sum of ten percent per bid.

The said check or certificate of deposit will be made payable to the County Treasurer of the County of San Mateo, and will be held as security that the bidder will enter into a written contract with the Board of Supervisors of the County of San Mateo, if awarded the contract within ten (10) days, from the date of award. In the event of a breach in the terms under which this check is held, the said check or certificate of deposit will be cashed and the proceeds thereof placed to the credit of the building fund of said County of San Mateo.

The successful bidder will further be required to give a bond from a satisfactory surety company in the sum of fifty (50%) per cent of his contract price, conditional for the faithful performance of his contract within the time limited, and to further insure the payment of all claims for labor and material furnished on the work.

The successful bidder will also be required to protect the County against liability arising under the Workmen's Compensation Act and against any and every contingency under which the County might be held liable during the progress of the work connected with the contracts on said hospital building.

The contract will provide for the retention of twenty-five per cent of the contract price for thirty-five (35) days after the completion of the work, and the filing of the notice of completion thereof.

Sealed estimates should be filed with the Clerk of the Board of Supervisors. The said Board of Supervisors of the said County hereby reserves the right to reject any or all bids.

Plans and specifications can be secured at the Architects' office at Room 714, New Call Building, 72 New Montgomery Street, San Francisco, Calif.

By order of the Board of Supervisors, Dated September 8th, 1925.

ELIZABETH M. KNESE, Clerk.

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

STATE OF CALIFORNIA

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock P. M., on October 19, 1925, at which time they will be publicly opened and read for construction, in accordance with the specifications therefor, to which special reference is made of portions of State Highway, as follows:

Santa Barbara County, between Summerland and Montecito (V-S-B-2-3), about one and four-tenths (1.4) miles in length; to be graded and surfaced with crushed gravel or stone.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the office of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineers' offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all

bids or to accept the bid deemed for the best interest of the State.

HARVEY M. TOY,
LOUIS EVERDING,
N. T. EDWARDS,
California Highway Commission.
R. M. MORTON,
State Highway Engineer.
W. F. MIXON, Secretary.

Dated: September 14, 1925.

MISCELLANEOUS BUILDING CONSTRUCTION

(Continued from Page 14)

RENO, Nevada.—J. C. Dillard, 813 So. Virginia Street, Reno, Nevada, at \$196,944 awarded contract for two-story and mezzanine exhibition building to be erected at Exposition Grounds, Reno. Other bids submitted were: Campbell Construction Co., \$195,777; Roush & Belz, 209,961; Schuler & McDonald, 209,973; McClintock Marshall Const. Co., 214,000.

The above figures (bid No. 2) were for a two-story and mezzanine stucco building with terra cotta trim and composition roofing.

LOS ANGELES, Cal.—Gilmore Oil Co., 2423 E 38th St., will build reinf. conc. fire wall, 330x280 ft., around oil reservoir at 809 S Seaside Ave., Los Angeles Harbor; \$75,000.

FLORISTON, Nevada.—Jos. Rirsch, Nevada sportsman, has purchased old Burkhalter mill property between old Floriston and plans early construction of a modern resort on the site. Rirsch, for the past few years, has been connected with the firm of Dinkelspiel Company of San Francisco.

BUSINESS OPPORTUNITIES

HOT SPRINGS, Arkansas.—R. B. Haughton, 236 Central Ave., Hot Springs, Ark., desires to get in touch with California contractor who would erect a "good-sized" apartment building in that city, the structure to contain all conveniences installed in the apartment structures referred to as the "California type."

LUMBER WASTE DEPLORED

Court injunctions to prevent the lumber industry from wasting and over-using the forests was proposed by James H. Allen of St. Louis, grand snark of the Hoo Hoos, at a recent meeting in Spokane, Wn.

A forest conservation board, with police powers, to require of manufacturers that for five years they reduce their average output 35 per cent was another suggestion of Allen, who said he was giving speakers "something to pull apart."

"Cannot the lumber industry, alone, without another law added to the statutes, create reforms that will bring about forest perpetuation?" he asked. "Is not standing timber a part of real estate? Until the tree is cut from the stump it is not a commodity. Can there be commodity price fixing before the commodity exists?"

A Variety of Work on the Same Machine

In addition to business correspondence the modern office has a large variety of work for the typewriter.

Tabulating, billing (simple and condensed) stenographic cutting, writing on ruled forms and many other kinds of office work can all be done on the L. C. Smith & Bros. typewriter.

The decimal tabulator and the variable line spacer are part of the inbuilt service of every L. C. Smith & Bros. machine.

Typewriters Rented

KOEHRING DANDIE Light Mixer

**Four-cylinder
Gasoline
Engine**

FAST! Fast! Fast! Here is a light mixer with a speedy charging skip, liberal drum dimensions and a high speed discharge that will break all your records of putting concrete where it pays you profits!

Just the balanced light weight to haul behind your truck on its rubber tired disc wheels and get from job to job in a big hurry.

Four cylinder, radiator cooled, gasoline engine. Transmission from engine to drum enclosed in oil bath! Double gear drum drive, chilled, beveled gears! Drum rollers fixed to shafts revolving in big bearings!

It's useless to try to give you the smallest idea of what this Dandie represents in superior speed and construction details—but it's *strong, rugged*—it will stand-up for all the punishment you can give it, and *work and work, and work!*

And you have a chance to buy at a price that gives you all the benefit of the economies the Koehring Company effect by big, standardized production! If you had half an idea of what this mixer means in the way of actual value, you would send back the coupon for full detail by next mail!

Koehring Dandie—7 cu. ft. capacity mixed concrete. High speed charging skip, or low charging hopper with hinged steel framed platform which may be folded against mixer for hauling. Discharged from either side of mixer.

4 cylinder gas engine, radiator cooled, or optional two cylinder engine, hopper cooled. Drum drive transmission in oil bath. May be equipped with *automatic water measuring tank*, and *Light Duty Hoist*.

**Send Back this
Coupon!**

BETTER LIEN LAWS

Mechanics lien laws go far back in our legislative history. They rest on a sound basis, the desire to insure to the laborer the reward for his labor. But in most of our states they have been extended to the dealers in construction materials, and in actual operation the abuses to the law are conceivably greater than the benefits. Particularly is this true for the small owner of a home who hires a builder to put up his house, only to find out after the builder has been paid that the contract has been used to get credit from the supply houses and that he, the owner, has to pay these debts that the builder evades. It is the only field of commerce where the ultimate consumer is responsible for the cost of the raw material to the manufacturer. Not only are the laws bad but they differ in the states. This in itself is a minor evil but if there is a good standard for the law, the state should all follow it. The evil now is to be investigated by a committee of the Department of Commerce and a uniform law recommended. If this law can provide better protection for the owner than those now a force it will be well worth the attention of the legislatures next winter. —Engineering News-Records.

New Concern Takes Over Ione Quarry

C. E. Miller, representative of the Ione Quarries Company, composed of Sacramento and San Francisco business men, announces the company has taken over a quarry in the Buena Vista section, Amador County, which has produced great quantities of rock. The company has the use of a fully equipped stone yard, saws and planners.

The yard represents an outlay of from \$50,000 to \$75,000. Crushers and other machinery are at the company's disposal at various places but it is announced as the intention of the Ione Quarries Company to own and install its own machinery.

The earth is used as pigment for the manufacture of paint, either the white or red. The white stone is used for the manufacture of glass. Both the white and the red stone, when crushed or pulverized are used for the manufacture of pottery, tiling and all products of that class. The white stone also is used for firebrick.

The rock from this quarry has been used in many of the state buildings in California and others, including among others the Sacramento post office, the California National Bank of Sacramento, and John Breuners' Furniture Company of Sacramento.

Seattle Construction Council Will Entertain Building Officials

The delegates attending the second annual convention of the Pacific Coast Building Superintendents and Inspectors, which will be held in Seattle, September 28-29 and 30 and attended by representatives from many coast cities, will be entertained by the Seattle Construction Council, a subsidiary of the Seattle Chapter of the Associated General Contractors of America. This announcement was made when it was stated that Arthur Gerbel had been named acting chairman of the entertainment committee of the council. Gerbel will name the other members of the committee at once and plans for the entertainment of the visiting officials are to be announced as soon as completed if such plans will

bear the light of "pitiless publicity." Gerbel assures the building fraternity that everything possible will be done to show the delegates an enjoyable time while in Seattle and possibly while in Vancouver, B. C.

It is expected that approximately fifty officials will attend the Seattle convention. The business end of the meetings will be arranged by City Superintendent of Buildings Robert Proctor who states that the majority of those present will probably be from California. The 1924 convention was held in Oakland, California.

The principal objective of the coast building officials is to obtain support of a movement looking toward the adoption of a uniform building code for cities of the Pacific Coast.

Cement Experts at Standards Meet

An advisory committee of technical experts on Portland cement consisting of representatives of the United States Bureau of Standards, the Portland Cement Association, and the American Society of Civil Engineers met Sept. 10 at the Bureau of Standards to review the work recently accomplished in the co-operative research now being undertaken by these groups.

Among the most noteworthy results reported at the conference may be mentioned the exacting experimentation which has led to an acceptance of the findings of the Geophysical Laboratory of Washington on the exact chemical and physical nature of the primary compounds of Portland cement. This view differs in some respects from that held by many European investigators. The American view, in general, holds that Portland cement exists in the $\text{CaO} \cdot \text{Al}_2\text{O}_3 \cdot 3\text{SiO}_2$ system in the field $2\text{CaO} \cdot \text{SiO}_2$ - $3\text{CaO} \cdot \text{SiO}_2$ - $3\text{CaO} \cdot \text{Al}_2\text{O}_3$, these compounds being the principal constituents of the cement, while some European writers believe that the com-

pound $3\text{CaO} \cdot \text{Al}_2\text{O}_3 \cdot 2\text{SiO}_2$ is the principal hydraulic constituent. Others are convinced that there exists a solid solution of $\text{CaO} \cdot 2\text{CaO} \cdot \text{SiO}_2$.

Every effort is being made to concentrate on the fundamental problems of the constitution of Portland cement and the exact influence of each constituent. While studies on hydration and setting are under way, it is held important that these be not investigated exhaustively until reliable principles on constitution have been established. The studies on setting will be made with the products of rigidly controlled composition. By this means, basic laws of composition and behavior in use should be established. For some time the work will be of more interest and use to the producer than to the consumer of cement.

The research staff consists of nine specialists in physical chemistry, spectrography and engineering, who have been studying the fundamental problems of Portland cement during the past fifteen months.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

Milton Birnbaum, H. S. Batchelder and G. P. Childers will operate from 1047 Mission street, San Francisco, under the trade name of Standard Electric Sign Company.

A. A. Courtney, sales manager of the Pacific Portland Cement Company, was a recent speaker at the Rotarians meeting in Lodi. Courtney spoke on the manufacture of cement from the quarry to the finished product.

The next meeting of the American Construction Council will be held in New York from the 18th to 21st of November. Discussion will be centered around problems affecting the building industry in general.

Security Housing Corp. of Los Angeles, capitalized at \$2,000,000 has filed articles of incorporation in Oakland. Directors of the company are: H. H. Braly, A. H. Braly, C. B. Hooper, G. G. Griffin, E. H. Hoff, M. D. Silberberg, and L. D. Willis, all of Los Angeles.

Complaint has been filed with the Federal trade commission against the Jones Hardwood Lumber Co. of San Francisco, contending that the firm sells hardwood lumber under the name and designation of "Philippine mahogany" which "in truth and in fact" is not mahogany wood.

A contract to be entered into between the city of Santa Cruz and Lloyd Bowman, county surveyor, whereby the latter agrees to take over all engineering work in preparing plans, specifications, etc., for street work for 7½ per cent of the contract price. The contract runs from the date of signature, until the first Monday in July, 1927.

Lake county supervisors, at a recent session, affirmed their action of some weeks ago determining not to join the Golden Gate bridge district. Lake County originally signified its intention of becoming part of the district which will finance the bridge. The Supervisors later rescinded their action.

John A. Beemer has resigned as chief engineer for the Walker River Irrigation District in the state of Nevada to accept the position of chief engineer of the Montague Irrigation District in Siskiyou County, Calif. The latter district contemplates an expenditure of \$1,075,000 for irrigation works.

In Cleveland, September 28 to October 2, will be held the fourteenth annual safety congress. The speakers will be many and the attendance is expected to be large. In the last twelve years the National Safety Council has spent more than \$2,000,000. There are 3100 persons serving voluntarily on committees. The various locals of the council have conducted more than twenty-five special safety schools in which more than 20,000 persons were registered last year. More than twenty-five of these units have had safety instructions and activities inaugurated in public and parochial schools.

After twenty-three years of active service as Turlock agent of the Modesto Lumber Company, Charles Klein has been replaced by J. S. Webb, who took over the position Sept. 14. Webb was formerly with the Valley Lumber Company at Fresno and has had sixteen years experience in the lumber business.

Preparation of a new plumbing ordinance for Fresno is now under way and will be submitted to the Master Plumbers' Association of that city for study and recommendations as soon as completed, according to an announcement of A. M. Jensen, city commissioner of public works. The present ordinance, Jensen says, is obsolete and in need of revision.

Signs that the United States is experiencing its greatest expansion through building operations are given in reports of construction activity throughout the country to the commerce department. Contracts now awarded indicate the 1925 record will exceed by more than a billion dollars the \$5,000,000,700 building year of 1924.

The Clay Products Sales Company announces the opening of a new exhibit and material yard at 4111 East Fourteenth street, Oakland, under the supervision of L. Hanson, district representative. The company handles a complete line of face brick, common brick, fire brick, mantel brick and flue lining. San Francisco offices are maintained at the Universal Exhibits, McInnocks Building.

With a roar that could be heard for miles, a landslide Sept. 17 destroyed a nearly completed tunnel being constructed on the new line of the Southern Pacific of Mexico, twenty miles south of Tepic, Nayarit, Mexico. The slide occurred at night, when no workmen were on duty, otherwise hundreds probably would have lost their lives. It is estimated that six million tons of dirt and rock moved in the slide.

Collection of nearly \$1,000,000 in gasoline taxes by the state depends on the verdict in the Richfield Oil Company suit now pending before the State Supreme Court. It was announced recently at the office of State Controller Ray L. Riley. The law says no tax is required on gasoline contracted for prior to May 13, 1923, but the state has questioned validity of contracts of certain type used by the Richfield and other oil companies. The other firms involved have stipulated they will abide by the court ruling in the Richfield case.

The General Electric Co., largest manufacturers of electrical supplies in the world, will immediately erect a large distributing center warehouse and office building in Los Angeles. It is announced through the engineering department of the Austin Company of California, which is preparing plans. Cost of the project, which will be located at the intersection of Santa Fe Avenue and Fifty-second Street, will be \$1,000,000. The site comprises five acres.

After November 1, 1925, quotations of price lists on structural steel on a price-per-ton basis will be discontinued by the Structural Steel Board of Trade, Inc. This is considered a forerunner of correction of practice of quoting prices on structural steel on a pre-ton basis. The steel trade, it is stated in Dows Service Building Reports, has drifted into a practice of quoting prices from crude sketches in advance of finished plans or without the aid of any plans, resulting in over-estimation of price which in turn finally leads to higher costs of construction.

A sale of approximately two million feet of timber has just been made by the United States Forest Service to the Davis Creek Lumber Company, operating a sawmill in the Warner Mountains just above Goose Lake Valley. The timber is approximately eighty per cent yellow pine and twenty per cent white fir and incense cedar. Part of the timber will be cut during the present season and the balance early next Spring.

A California genius has devised a way to get rid of discarded automobile tires and to make money out of doing it. Everybody has noticed that an old tire burns with a thick black smoke. It is proposed to catch this smoke, collect the black particles of it and use them for paint. They are, it is said, exactly the same as the particles of carbon black, now made rather expensively from natural gas and in common use as a pigment, for example, in making printers' ink.

The Bureau of Labor Statistics of the United States Department of Labor has again revised its publication of labor legislation of the United States. All of the labor laws enacted by the various states, except those pertaining to workmen's compensation, are incorporated in the publication. In addition to the laws themselves many court decisions relative to the various acts are also found. The volume contains a vast amount of information on many questions pertaining to labor matters and a copy should be in the possession of every association executive. Copies may be secured from the Superintendent of Documents, Government Printing Office, Washington, D. C., at a cost of \$1.60 each.

The threatened strike of journeymen plumbers in St. Louis failed to materialize on September 1st following an announcement made by one of the officials of the United Association of Plumbers and Steamfitters to the effect that a strike would not be sanctioned by the international and in the event of a cessation of work union plumbers would be brought in to take the places of the strikers. The present agreement carries a wage rate of \$12.00 a day and runs until February 3, 1926. The threatened strike was for the purpose of gaining an increase of \$2 a day.

Supporting the Southern Pacific program for expansion in Southern Oregon as compared with plans of the Oregon trunk line for similar development, 14 Klamath Falls lumber companies have issued a lengthy statement explaining their stand. The lumbermen doubted whether there would be sufficient business to warrant two new lines being constructed through the Southern Oregon territory, and expressed belief that it is "for the good of the entire territory" that the Southern Pacific program be supported.

California Highway Commission To Heed Requests of Supervisors

Requests and suggestions of the Board of Supervisors of the several counties are given careful consideration by the California Highway Commission and are complied with whenever possible. State Highway Engineer R. M. Morton told a gathering of County officials on Supervisors' Day at the State Fair. The Supervisors, he said, are the official spokesmen of the counties regarding highway matters and through them the commission has direct contact with the people.

The mutual confidence existing between the commission and the fifty-eight county boards, the state highway engineer suggested, has resulted in numerous cooperative projects for construction and maintenance of sections of the state highway system, where local as well as state traffic is to be benefited. He expressed the hope that present friendly relations may be continued.

State Law Overlooked

"Cooperation also, may be extended to local projects," continued Mr. Morton. "Cities and counties of the state generally have overlooked provisions of the state law authorizing the commission to assist in planning local street and road improvements by making surveys or by acting as consulting engineer on construction projects.

"When requested to do so, the commission will gladly assist local communities in solving engineering problems of this nature. There is a great field here for cooperative effort in the interest of the public.

Laboratory Gets Facts

"The counties are urged to avail themselves of information compiled by the commission's testing and research laboratory. We are constantly learning new facts about road building in California, which is yours for the asking. Just now we are undertaking the examination of 5,000 culverts in all parts of the state, to determine the lasting qualities of various types and brands under varying conditions of soil and climate.

"Recently completed research work includes studies of concrete curing, which may make advisable cutting in half the curing time; studies of soils and their fitness as subbases for pavements; effect of alkali on concrete and prevention methods, and other important investigations which, if heeded, should enable the counties, if heeded, to build better highways.

Maintenance Begins Jan. 1st

"The three bond acts provided for maintenance by the state only after construction is completed. We realize now that completion of the system is years ahead. A change in the law, to provide for maintenance of all traversable state highways, was recommended in our last Biennial report, and approved by the legislature and the governor. Plans are now being made for undertaking state maintenance next January, when we will begin taking over the uncompleted state highways."

Recent Cooperative Projects

Recent cooperative projects mentioned by Mr. Morton included those in the following counties:

Del Norte—\$8000 advanced for maintenance Redwood Highway; site granted for maintenance station.

Humboldt—\$50,000 toward cost of Van Duzen bridge.

Mendocino—Three miles graded on Navarro River Highway.

Sonoma—Purchase of rights of way for reconstruction; bridges.

Monterey—Agreement to grade section of Coalinga lateral; assistance King City bridge.

San Benito—Construction of section near Hollister.

San Luis Obispo—Funds for bridges; Pismo line change.

Santa Barbara—Purchase of rights of way, widening work.

Andreas lateral; purchase of valuable rights of way for reconstruction.

Solano—Cooperation construction section Rio Vista lateral.

Yolo—Cooperation widening work near Davis; \$9000 toward subway.

Colusa—Cooperation construction section Tahoe-Ukiah lateral, west of Williams.

Glenn—Rights of way, Orland-Chico lateral.

Tehama—Repair bridge; \$2,500 for maintenance work.

Siskiyou—Rights of way, Pacific Highway.

Modoc—Cooperation grading and surfacing, Alturas to east; loan of equipment for snow removal.

Lassen—Building of ten bridges; loan of equipment for snow removal; grading section south of Constantia; rights of way.

Plumas—\$2,500 toward maintenance near Chester.

Butte—Rights of way, Chico-Orland lateral; \$10,000 toward paving on same route.

Yuba—Widening Parks Bar bridge.

Placer—Rights of way, Auburn-state fire trunk highway.

El Dorado—Rights of way.

Amador—Contribution of \$10,000 by citizens grading section Alpine highway.

San Francisco—\$500,000 for work on Bay Shore Highway.

STOCK SALES OF LUMBER COMPANY IS QUESTIONED

R. W. McComb wants to make cigar boxes by the million, he told E. J. Walther, chief deputy Corporation Commissioner during a hearing to determine if McComb's company, the R. W. McComb Lumber Company, had violated a permit given to it by the corporation department.

McComb believes there are many millions of cigars waiting to be housed in boxes made of California timber. Sometime ago he obtained a permit to sell \$25,000 worth of stock of his company after convincing the department that his plan was feasible. Later Deputy Commissioner McMenamin received reports that the permit was being violated. It was claimed the stock was being sold to others than the persons McComb represented were willing to join him in his enterprise and that promises of payment were being received instead of all cash for stock, contrary to the provisions of the permit.

It developed at the hearing that McComb was deeply interested in the organization of the Warfield Cafeteria which failed in San Francisco sometime ago and that he was also connected with the World Film Company, whose plans to establish a school for embryo movie stars in the Berkeley hills flattened out. McComb declared that, despite failure in some cases, he has met with pronounced success in Texas as a trader in live-stock, leases and lumber.

After taking the testimony of several witnesses the hearing was closed and the case taken under advisement.

R. M. MORTON
State Highway Engineer

Ventura—Bridges on Coast Boulevard.

Los Angeles—Construction of bridges on Coast Boulevard; condemnation of expensive rights of way.

Orange—Rights of way; bridges on Coast Boulevard.

San Diego—Construction of San Mateo and San Onofre bridges.

Imperial—Rights of way.

San Bernardino—Payment of \$35,000 as part of cost of section of highway and reconstruction of county-built pavement.

Kern—Financing Cottonwood Creek bridge; loan of equipment; grading of sections of state highway through desert.

Fresno—Grading promised on Coalinga lateral.

Madera—\$10,000 toward Chowchilla River Bridge.

San Joaquin—Paving section of San

ALONG THE LINE

Edward E. Haskell has been appointed city engineer of Santa Barbara.

Louis R. Swenson, associated with the Robinson Electric Company of Fresno, has been appointed a member of the Fresno Civil Service Commission, succeeding Floyd C. Lynn, resigned.

Lloyd S. Howard and Wm. E. Mac of Oakland and Roscoe C. Wilkins of Concord, have formed a partnership and will operate under the firm name of Quality Roofing Company in the East Bay District.

The Central Development Association of Los Angeles has petitioned the State Railroad Commission to order again the construction of the fifty-million-dollar union railroad station and terminal in Los Angeles.

Harold S. Wheeler, president of the Far West Lumber Co., Tacoma, is retiring from business and will make Los Angeles his home, he having already started construction on a residence in the southern city.

J. L. Moyer, chief cost and estimating engineer, Los Angeles city engineering department, announces that the board of public works has ordered that no estimates of the cost of improving streets are to be made public prior to receiving bids.

Consulting Engineers A. L. Sonder-
ecker of Los Angeles, George Hinckley of Redlands and J. B. Lippincott of Los Angeles have been chosen as a board of engineers to represent Riverside, San Bernardino and Orange counties respectively to advise with the state engineer regarding a survey and development of the water resources of the Santa Ana river.

The legality of Berkeley's city manager form of government and even the election of the mayor and city council are threatened by a test case filed in the State Supreme Court for the purpose of establishing the validity of the Long Beach municipal courts. Berkeley is one of 19 California cities that will be thrown into a political turmoil should the court decide that the State Legislature since 1913 has had no right to ratify certain city charter amendments. The legal point raised in the Long Beach case is whether a charter change can be voted by the people during a session of the State Legislature and presented to that same session for ratification. It is the contention of the Los Angeles Bar Association, which has brought a friendly suit against the City of Long Beach in the Supreme Court that the Constitutional amendment reads "next session of the Legislature" and cannot mean a session then in progress.

TRADE NOTES

Arthur White will operate from 90 Golden Gate Avenue, San Francisco, under the trade name of White Lighting Fixture Studio.

National Fence Co. of San Francisco, capitalized at \$50,000 has been incorporated with directors as follows: H. S. Boule, W. Sheehan, G. G. Taylor, Alma Buncke and M. Diggs.

Hind Building Company of San Francisco, capitalized at \$100,000, has been incorporated. Directors are: W. G. Hind, A. E. Hind, H. W. Hind, Nell M. Forest and Van Della Hind.

H. L. Hayden, 3127 Beverly Ave., Oakland, and A. B. Chapman, 5029 Grove St., Berkeley, will operate in the East Bay district under the trade name of Hayden Construction Company.

Chas. W. Dietrich, 1333 Derby St., Berkeley, and Kenneth P. Lawrence, 6309 Locksley Ave., Oakland, have formed partnership and will operate in the East Bay district under the trade name of Harbor Lumber Company.

Rhodes Jamieson Co., of Alameda has been incorporated with a capital stock of \$2,000,000. Incorporators are: A. G. Rhodes, Oakland; G. G. Jamieson, Oakland; A. I. Markwell, Oakland; R. C. Wilcox, Berkeley and A. B. Curry, Oakland. The company specializes in the sale of building materials.

Sierra Manufacturing Company, capitalized at \$500,000, plans erection of \$200,000 plant in Sacramento for manufacture of stoves, ranges, hot plates, water heaters and cooking and heating appliances operated by oil. Geo. W. Peltier, president of the Farmers and Mechanics Bank of Sacramento, is president of the concern.

The G and M Concrete Company, 4th and Oak Streets, Oakland, formerly in the concrete contracting business, has entered the building material field, handling cement sand, rock, calators and specializing on "That Good Mix". R. Marvin Greathouse is president and Ray H. Montague, vice-president and treasurer of the company.

J. V. Jerholdt, representing the Endurite Products Company, is in Chicago in connection with the plan of the company to establish roof and metal paint manufacturing plants in various cities. The company's main plant is in Modesto. New plants are contemplated for Fresno, Los Angeles and several Northern California points.

The California Art Tile Company is completing construction of a two-story hollow tile office and plant structure at Twenty-seventh street and Main avenue, Richmond. In addition to the main building a number of kilns and stacks will be erected, the total cost of the improvements running between \$25,000 and \$30,000. The plant will permit the manufacture of 40,000 square feet of art tile a month while heretofore the production was restricted to 20,000 square feet. Directors and officers of the company are: J. W. Hislop, president; W. A. Hislop, first vice-president; C. E. Cummings, second vice-president; A. P. Myers, secretary; L. J. Hislop, treasurer.

The California Steel Products Company has purchased four and one-half acres north of the Western Pacific and Southern Pacific Railroads between Sixty-sixth and Sixty-eighth avenues, Oakland, plans early erection of a plant for the manufacture of refrigerating equipment, pipes and boilers.

The Bakersfield Rock & Gravel Company will start construction of its 1000-ton rock, sand and gravel plant about October 1, according to announcement made by C. F. Smith, secretary of the company. The building of the plant entails an expenditure of \$100,000. The plant will be equipped with the most modern machinery and will be one of the finest in California. Fred C. Macomber of Taft, who has been in the rock and sand business for a number of years, is president of the company, and J. B. Dowd is vice-president.

Los Angeles' building total for September, 1925, will run between nine and ten million dollars if the ratio for the first half of the month is maintained. Up to and including the 15th the city building department issued 1875 permits with an estimated valuation of \$4,929,856. For the corresponding period in August, 1925, the number of permits was 1830 and the estimated valuation was \$5,533,770, while for the first fifteen days of September, 1924, the number of permits was 2277 and the estimated valuation was \$7,533,802. For the current year up to and including Sept. 15 Los Angeles' building total was \$109,625,466 as compared with \$111,960,517 for the corresponding period last year. Minor building operations now make up most of the city's total, and it is probable this situation will continue throughout the remainder of the year, a temporary slowing up of big building projects being apparent.

The British Columbia Electric Railway announces early construction of a \$30,000,000 power project on the Bridge river, 135 miles north of Vancouver, B. C. The Bridge river site is on the Pacific Great Eastern railway. The first unit of the plant is estimated to cost \$13,000,000. The project would furnish 60,000 horse power and take five years to complete. Addition to this company's power plant at Stave lake, 43 miles east of Vancouver, costing \$3,720,000 was recently completed.

A total of 95,000 men are at present employed in the logging camps and sawmills of Oregon, Washington and Idaho, as compared with 91,700 men on May 1 of this year, and 97,000 men one year ago, according to a survey just completed by headquarters of the U. L. organization at Portland, Ore. The number of men at present employed in this work will undoubtedly be increased somewhat during the next month when more logging sides are started, the report stated, although this condition will prevail only until the first heavy fall of snow closes high altitude camps on the coast, and cold weather prevents lumber cutting at sawmills east of the Cascades.

Here is how Berkeley's hill district has been rebuilt in the two years since the fire.

	Permits	Est. cost
Residences	285	\$1,515,338
Apartments	45	781,340
Fraternity		
Sorority houses	9	214,350
Fire repairs	23	27,646
Pacific School		
of Religion	3	201,000
Total	365	\$2,869,721

ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

Stockton Builders Adopt Code of Ethics

Aiming to make known their code of ethics, the Stockton Builders' Exchange has issued a small pamphlet in which the objects and aims of the organization are stated. The exchange's code of ethics is listed below:

To take pride and believe in our business which renders an essential service to the public, whose high regard we should at all times strive to achieve and retain;

To sell and install the highest quality of material, believing this to be a fundamental requirement of modern business;

Superior Service

To so conduct every transaction that the public will recognize and appreciate the superior service of the members of this exchange and know that the Emblem stands for the best in workmanship and material;

To place foremost among our business activities an interest in our organization, believing we can accomplish through our collective efforts and co-operation what no member could do alone;

To believe in our exchange as the very heart of our trade existence; that it is business insurance at insignificant cost; that it is the means by which our craft may place itself on record toward the accomplishment of its ideals; that it is the one thing above all others we can least afford to neglect;

Elevate Industry

To strive ever through co-operation to bring about the elevation of our industry by the correction of abuses and unethical practices in our business;

To solemnly pledge ourselves to support the exchange and attend its meetings, since we are benefited by it only as we give to it;

To extend our helpful guidance to the public so that its purchases may afford to it the utmost efficiency, comfort and satisfaction for the amount it may wish to invest, rather than strive for the mere accomplishment of sale, always remembering that a satisfied customer is our best asset;

Co-operation Stressed

To endeavor to co-operate at all times with our fellow members for the advancement of our craft in every possible way, and to be willing to exchange our viewpoints freely whenever it is for the common good, keeping in mind that whatever is good for one is good for all;

To regard our civic obligations as important responsibilities meriting our thoughtful consideration as individuals, institutions and as a trade organization; doing our part in a manner befitting our position in the mercantile world;

Finally, to make every transaction a practical application of the Golden Rule, fulfilling each obligation to those from whom we buy to those to whom we sell and to those with whom we compete.

QUANTITY SURVEYS

Every contractor knows the hard work of putting in a bid on a job. There is no easy trail to the result. It must be dug out. This costs money and must be done whether the job is obtained or not. Most contractors will even recheck their work to be sure they are not wrong, remembering that it is always cheaper to be sure, and lose a job, than to win one that was obtained by some work left out of consideration.

The contractor when figuring often does it when there are other places for his time and where he would save money by watching this same thing on his job. He is continually bothered at the office. In most cases he cannot afford to hire a good estimator to do his work.

The quantity survey eliminates most of the above troubles. First, the surveyor does his work unhampered. Second, the quality of work must be better because of his steady continuance of this one sort of work. Third, the surveyor is a better estimator than many contractors can afford to hire, and yet the contractor gets the benefit from this. Fourth, and best of all, the cost of the work when spread among many is so slight, compared with the cost of taking the work off by the contractor and his consequent neglect of important business, that it is negligible and will more than repay by savings from other things.

Therefore it is easily seen that the contractor gets the same result as from his own estimating department, with men whom he can afford to hire, and yet his cost is negligible in comparison with the value of such service. —The Master Builder.

AWARDS RECOMMENDED ON EAST BAY WATER PROJECT

Arthur P. Davis, chief engineer for the East Bay Municipal Utility District, has submitted a report to the Board of Directors of the district recommending awards of contract in connection with the Mokelumne River project, naming the low bidders as follows:

Schedule No. 1—Lafayette Tunnel, 14,800 lineal feet, including 1600 cubic yards of reinforced concrete, Smith Bros., 412 Second St., Marysville, bid \$1,101,822.

Schedule No. 2—Walnut Creek Tunnel, 2100 feet including 350 cubic yards of concrete, T. E. Connolly, Sheldon Bldg., San Francisco, bid \$152,906.

Schedule No. 3—Walnut Creek Pumping plant, including one pump house complete, 20,000 pounds of reinforcing steel and 750 barrels of cement, Twoby Bros., Sharon Bldg., San Francisco, bid \$23,468.

Schedule No. 4—Wallut Creek pumping machinery including three 25 MGD units complete, head 285 feet, Pelton Company.

Schedules 5, 6, 7 and 8—Pipe line, 442,000 lineal feet of riveted steel pipe, diameter 60-inch, 66-inch and 68-inch, thickness $\frac{3}{8}$ -inch and $\frac{1}{2}$ -inch or 442,000 lineal feet of power hammer welded steel pipe, diameter 68-inch, 63-inch and 65-inch, thickness, $\frac{3}{8}$ -inch and $\frac{1}{2}$ -inch or 442,000 lineal feet of lock bar steel pipe, diameter 58-inch,

62-inch, and 66-inch, thicknesses, $\frac{3}{8}$ -inch and $\frac{1}{2}$ -inch, or 357,000 lineal feet of pre-cast reinforced concrete bar pipe, for heads ranging from 70 feet to 400 feet, diameter 60-inch and 63-inch and 48,000 lineal feet of Triple Riveted steel pipe, 60-inch diameter, $\frac{3}{8}$ -inch plate, 37,000 lineal feet of triple riveted steel pipe, 60-inch diameter, $\frac{1}{2}$ -inch plate or 85,000 lineal feet lock bar steel pipe, 68-inch, diameter $\frac{3}{8}$ -inch plate or 85,000 lin. ft. of power hammer welded steel pipe, 58-inch, diameter $\frac{1}{2}$ -inch plate.

Schedule No. 9—Lancha Plana Tunnel, 10,000 lineal feet, 670 cubic yards reinforced concrete, Chas. K. Thompson, 520 West Seventh St., Los Angeles, bid \$524,045.

Schedule No. 10—Lancha Plana Dam, 321,000 cubic yards plain concrete, 1700 cubic yards reinforced concrete; 2 catapillar shutter gates or sluice outlets and penstock, 143,000 pounds structural steel for trash rack, Lynn S. Atkinson, Jr., Edwards-Wildey Bldg., Los Angeles, bid \$3,081,378.

No action has been taken by the directors of the district on the above recommendations.

DECLARES DIVIDEND

Announcement is made by the Santa Cruz Portland Cement Company that the board of directors has declared a quarterly dividend of \$1 per share, payable October 1, to stockholders of record on September 18.

THAT FIVE-DAY WEEK

Although building trade unions have made no fight for the five-day week this year, there are many indications that the demands will be pressed later on. Agitation for the shortening of the working week is going on in several labor journals and bulletins, and a survey conducted by the New York World shows that such working conditions are gaining in factories and commercial houses, especially in big department stores during July and August.

The World also reports that the movement is spreading in many other establishments. Most of the employees who have been granted the 5-day week according to this report have not pressed demands through unions, the shorter week being freely granted by employers. Gains have chiefly affected sedentary workers.

OFFICERS ELECTED

W. B. Wickersham was elected president; C. S. Estes, vice-president, and J. M. Chase, secretary-treasurer of the Los Angeles Hoo-Hoo Club No. 2. B. S. Barker, J. J. Rea, F. M. Connolly, C. J. Laughlin and B. W. Bookstaver were named directors. Phil B. Hart was the choice for vice-general snark for this district and H. L. Rosenberg the nominee for state counsellor.

MONTEBELLO, Los Angeles Co., Cal.—
 Architect Richard M. Bates Jr., 1101
 Brack-Shops Bldg., is taking bids for
 a three-story Class C Masonic Temple
 building at Montebello for Montebello
 Masonic Temple Association. Two
 store rooms, banquet hall, lodge room,
 6 offices, club rooms; 50x130 ft., brick
 walls, stucco exterior, brick trim,
 plate glass, composition roofing, pine
 trim, maple and pine floors, water
 heater, gas radiators.

RICHMOND, Contra Costa Co., Cal.—
 Masonic Temple Association of Rich-
 mond has purchased two-story brick
 and frame structure at s. w. corner of
 8th St. and Macdonald Ave., and will
 remodel 2nd floor for lodge and club
 rooms. The announcement is made by
 L. M. Johnson, a director of the asso-
 ciation. Jas. T. Narbett, 910 Macdon-
 ald Ave., Richmond, is the architect.
 The improvements will cost approxi-
 mately \$15,000.

This building has been purchased in
 place of erecting a new lodge building.

PRATT'S CONCRETE MIX

*Champion
by Sand
Pratt*

LUCILE ALWAYS was bright.
SHE IS now cashier.
IN A San Francisco office.
NEAR THE central office.
OF SANDY Pratt, President.
OF THE Pratt Building Material Co.
PRODUCER OF clean sand.
AND HARD rock and gravel.
WHEN LUCILE was five.
THE NEIGHBORHOOD kids.
GAVE A circus.
AND IT cost one bottle.
OR A good sack.
FOR GENERAL admission.
NO CHARGE for reserved seats.
LUCILE'S MIND was always working
SO SHE took two sacks.
AND EXPECTED special attention.
SECURING A front seat, etc.
THE SHOW had only commenced.
WHEN THE ring master.
TOLD THE multitude assembled.
THAT THE next act.
WAS THEIR star number.
AND IT had only begun.

WHEN LUCILE yelled "Rotten."
THEY THREW her.
OUT OF the tent.
ONTO THE hard ground.
AND LUCILE went straight home.
AND TOLD her mother.
ON THE circus management.
"I THANK you."

Photo of Mr. "E. E. Barnum," manager of the kid circus, telling Lucile to walk out, but she argued. Then she passed through the "canvas" (an old bed sheet), lit on a pile of rock (from Sandy's crushed rock plant at Pratt-rock near Folsom).

NEAR FULLERTON, L. A. Co., Cal.—Archts. T. C. Kistner & Co., 1121 Detwiler Bldg., Los Angeles, have been commissioned to prepare plans for a new high sch. for the Irena Olinda Union High School, near Fullerton. Bond election for \$320,000 to be held Oct. 3rd, includ. site, bldg. and equipment.

9544—New York, N. Y. Export sales organization is available to represent San Francisco foreign trade firms in New York City.

9548—Singapore, Straits Settlements. Trading company desires to enter business connections with San Francisco firms.

SEEKS TO WITHDRAW BID ON OKLAND SCHOOL JOB

J. A. Bryant, low bidder on the new Daniel Webster school to be built at Eighty-first avenue and Olive street, has asked the Oakland School Board to be allowed to withdraw his contract as he had discovered a \$10,000 error in his figures. He stated that his figure of \$58,376 should have been \$98,376.

Earl Warren, district attorney, advised the Board to proceed in drawing the contract and submit it to Bryant. In case he refuses to carry out the contract, the board should cash Bryant's \$5000 certified check, it was advised.

W. J. Moorhead, council member on the Board, urged that the contract be rejected and new bids called for.

The Board referred the matter to the building committee.

ELECTRIC INSPECTORS TO MEET

Preparations have been completed for the semi-annual meeting of the State Association of Electrical Inspectors to be held in the library of the San Joaquin Power Corporation Building, Fresno, Sept. 24 to 26th, according to H. W. Stitt, city electrical inspector of Fresno, who is president of the association.

The association will complete the second year of its existence with the meeting.

The outstanding subject of discussion will be the new safety orders of the state accident commission which were effective September 1st and the new code of the National Board of Fire Underwriters which becomes effective October 1st.

The object of the association as outlined by President Stitt is to maintain standardization of electrical inspections throughout the state.

"Constant study of electrical installations for the protection of life and property has greatly reduced the number of accidents from this source," said Stitt.

It is expected that fifty of the membership of eighty will attend.

Officers of the association are: President, H. W. Stitt; vice president, R. W. Abright, Long Beach; secretary, C. W. Mitchell, board of fire underwriters. The executive board is composed of Stitt, Abright, Mitchell, Ben Hill, Oakland; Art Roe, Garnett Young and Company, and E. J. Crawford, San Joaquin Light and Power Corporation.

ISSUES BULLETIN

The Marion Steam Shovel Company, Marion, O., announces that Bulletin 316 on the new Marion model 125, steam and electric, is now ready for distribution and will be sent free upon request. This bulletin illustrates and describes the shovel which has been greatly improved and its working efficiency increased.

Official Proposals

NOTICE TO CONTRACTORS (Laguna Irrigation District)

Whereas, the Board of Directors of the Laguna Irrigation District has adopted a plan for the construction of a reinforced concrete weir, known as the Island Weir, and located on Kings river near the northeast corner of the northwest quarter of Section 10, Township 18 South, Range 20 East and containing approximately 354 cubic yards of reinforced concrete, with the necessary excavation, filling, etc.

Notice is hereby given that sealed proposals will be received for the construction of said work up to ten o'clock A. M. of Saturday, the 8th day of October, 1925, at the office of the said board, at Hub, in the County of Fresno, State of California.

Plans and specifications can be seen at the office of the board, or at the office of Max W. Enderlein, 514 Brix Bldg., Fresno, California.
A deposit of five dollars will be required for each copy of the plans and specifications.

Each bidder must accompany his bid with a certified check payable to the President of the Board of Directors of the Laguna Irrigation District for an amount not less than ten per cent of the estimated amount of his bid as security for the execution by him of the said contract in case his bid is accepted.

All bids should be enclosed in sealed envelopes addressed to the "Secretary of the Board of Directors of the Laguna Irrigation District," and at the time and place designated above, said bids will be opened in public and as soon as convenient thereafter the board will let said work as a whole to the lowest responsible bidder. The right is reserved to reject any or all bids.

The contractor will be requested to furnish two good and sufficient surety bonds, one in the amount of twenty-five per cent of the amount of the contract, conditioned upon the faithful performance and completion of the work, and the other in the amount of fifty per cent of the contract, for the payment of all material and labor for said work.

Published by order of the Board of Directors of the Laguna Irrigation District.

BESSIE L. SCUTT,
Secretary Laguna Irrigation District.

NOTICE TO CONTRACTORS (Highland Hospital—Alameda County)

Office of the Clerk of the Board of Supervisors of Alameda County, Calif. Sealed bids will be received by the Clerk of the Board of Supervisors of Alameda County at his office until Tuesday, October 13, 1925, at 10:30 A. M., when said bids will be opened and said contract awarded, for the erection and completion of certain supplementary carpenter work, (lining, pipe covering, etc., for Highland Hospital of Alameda County, situated at 14th Avenue and Vallecito Place in the City of Oakland, County of Alameda, State of California.

Complete specifications for said work are on file in the office of the County Clerk in the Hall of Records Building, City of Oakland, California, where copies may be obtained by deposit with the County Clerk the sum of twenty-five (\$25.00) dollars. Contractors will be restricted as to the length of time they may retain said specifications to twelve (12) days.

Contractors failing to return said specifications within said time limit will forfeit their deposit to the said County of Alameda. The entire amount of the deposit will be returned

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.
Not over 10 cents per line, per insertion.
All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

to said depositors returning said specifications in good condition within said time limit.

Each bid must be accompanied by a check for at least ten (10%) per cent of the total amount of said bid or proposal, certified to by some responsible bank and made payable to George E. Gross, Clerk of the Board, to be forfeited to the County of Alameda, as agreed and liquidated damages should the party or parties to whom the contract shall be awarded fail to enter into the contract after the award or to give the bond required by the board for the faithful performance of the contract.

The Board reserves the right to reject any and all bids.

GEO. E. GROSS,
Clerk of the Board of Supervisors of Alameda County, California.
Dated: September 14, 1925.

STATE OF CALIFORNIA CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock P. M. on October 10, 1925, at which time they will be publicly opened and read, for construction, in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

San Luis Obispo County, between Pismo and one mile south (V-S.L.O.-2-E), about nine-tenths (0.9) mile in length; to be graded and surfaced with crushed gravel or stone.

Mariposa County, a reinforced concrete girder bridge across Merced River (VI-Mpa-18-G), consisting of three 58 foot spans on concrete piers and abutments.

Riverside County, between Arrowhead Boulevard and Blythe (VIII-Riv-64-B), about one and nine-tenths (1.9) miles in length; to be graded and surfaced with crushed gravel or stone.

QUANTITY SURVEYOR

Valuation Engineer
ARTHUR PIEDDLE
693 Mission Street, at Third St.
San Francisco, Calif.
Telephone Douglas 8-4-9-3
General Listing Bureau
Architect's Preliminary Estimates

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineers' offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

HARVEY M. TOY,
LOUIS EVERDING,
N. T. EDWARDS,
California Highway Commission.
R. M. MORTON,
State Highway Engineer.
W. F. MIXON, Secretary.
Dated: September 21, 1925.

NOTICE TO CONTRACTORS

(Gymnasium — Willows Union High School District)

Sealed Bids will be received and opened at 2:00 o'clock P. M., on Tuesday, the 6th day of October, 1925, by the Board of Trustees of the Willows Union High School District, in the present High School Building in the City of Willows, California, for the erection and completion of a frame Gymnasium Building to be erected upon the present High School site in the City of Willows, all in accordance with plans and specifications made for the same by W. SEEK ELECTRICAL ENGINEER

H. R. Haddingham of Suffolk, England, is seeking information concerning Oscar William Beech, an electrical engineer, who was believed to be employed in Humboldt county, California. Haddingham states that in 1920, Beech left Peru, where he had resided with his wife and four children for 12 years, and within the wife and children returned to England. Beech went to San Francisco thence to Humboldt county.

A Variety of Work on the Same Machine

In addition to business correspondence the modern
office has a large variety of work for the typewriter.

Tabulating, billing (simple and condensed) sten-
c. cutting, writing on ruled forms and many other
kinds of office work can all be done on the L. C.
Smith & Bros. typewriter.

The decimal tabulator and the variable line
spacer are part of the inbuilt service of every L. C.
Smith & Bros. machine.

BUILDING CONTRACTS

SAN ANSELMO, MARIN COUNTY

Following is list of building permits granted by city trustees of San Anselmo during the month of August, 1925:

ALTER and repair dwelling, \$1000; Cor. Hedward Road and San Anselmo Ave., Lansdale; owner, I. O'Brien.

DWELLING, \$3500; Lot 25 Blk 2, Sunnyside Tract, Rose Ave., San Anselmo; owner, A. Christensen.

DWELLING, \$1500; Lots 70 and 71 Sub 1, San Rafael Heights, San Anselmo; owner, F. Stadelman.

DWELLING, \$4000; Lot 7 Blk 4, Sunnyside Tract, San Anselmo; owner, D. Proia.

DWELLING, \$4000; Blk 13, Sunnyside Tract, San Anselmo; owner, A. and L. P. Costa.

DWELLING, \$3000; Lot 2 Bush Tract, Sub. Lot 103, Scenic Ave., San Anselmo; owner, E. Lakeman.

DWELLING, \$2900; Lot 8 Blk D, Floral Park, San Anselmo; owner, H. Klarud.

FURNITURE store, \$5000; Lot 82 Sub. 1, San Rafael Heights, San Anselmo; owner, H. E. Nelson.

DWELLING, \$3500; Lot H Sub. Lots 14 and 14A, Bush Tract, San Anselmo; owner, E. J. Conlan.

GARAGE and dwelling, \$500; Red Hill Ave., San Anselmo; owner, M. Capbre.

FIVE dwellings, \$19,500; Lots 21 and 22, Blk 1, Sunnyside Tract, Ross Ave., San Anselmo; owner, Presbyterial Seminary.

IMPROVE dwelling, \$550; Lot 97 Bush Tract, San Anselmo Ave., San Anselmo; owner, J. Arata.

GARAGE, \$125; Lots 2 and 3 Blk 10, Sequoia Park, San Anselmo; owner, W. E. Bell.

DWELLING, \$4000; Lots 1 and 2, Hampton Court, San Anselmo; owner, C. Lavaroni.

CLYDE Electric Tower Hoist

One unit of the Clyde line which has been gaining popularity very rapidly is the Concrete Tower Hoist. Two one drum 60 H. P. electric motors were employed on the operation illustrated, which shows the Phoenix Utility Company, of Duluth, working on a Hydro-Electrical development for the Minnesota Power & Light Co. at Fond du Lac, Minn.

The dam is 600 feet long and 85 feet high. Twelve hundred and seventy-five yards of concrete a day were hoisted and spouted to place. The Clyde 10 ton stiff leg derrick shown in the picture was used for handling materials from storage to bins.

Officials of the Phoenix Company have shown their satisfaction with Clyde Equipment by placing several repeat orders.

Complete information about either one or two drum concrete tower hoists or any other unit of the Clyde line, will be furnished gladly by the home office or any branch.

You'll Take Pride in Your Clyde!

CLYDE IRON WORKS SALES COMPANY

Sole Distributors for CLYDE IRON WORKS, Duluth, U. S. A.

Western Branches:

50 Fremont St., San Francisco, Cal.
555 Thurman St., Portland, Oregon.

KOEHRING DANDIE

Light Mixer

**Four-cylinder
Gasoline
Engine**

FAST! Fast! Fast! Here is a light mixer with a speedy charging skip, liberal drum dimensions and a high speed discharge that will break all your records of putting concrete where it pays you profits!

Just the balanced light weight to haul behind your truck on its rubber tired disc wheels and get from job to job in a big hurry.

Four cylinder, radiator cooled, gasoline engine. Transmission from engine to drum enclosed in oil bath! Double gear drum drive, chilled, beveled gears! Drum rollers fixed to shafts revolving in big bearings!

It's useless to try to give you the smallest idea of what this Dandie represents in superior speed and construction details—but it's *strong, rugged*—it will stand-up for all the punishment you can give it, and *work and work, and work!*

And you have a chance to buy at a price that gives you all the benefit of the economies the Koehring Company effect by big, standardized production! If you had half an idea of what this mixer means in the way of actual value, you would send back the coupon for full detail by next mail!

Koehring Dandie — 7 cu. ft. capacity mixed concrete. High speed charging skip, or low charging hopper with hinged steel framed platform which may be folded against mixer for hauling. Discharged from either side of mixer.

4 cylinder gas engine, radiator cooled, or optional two cylinder engine, hopper cooled. Drum drive transmission in oil bath. May be equipped with *automatic water measuring tank*, and *Light Duty Hoist*.

**Send Back this
Coupon!**

COURT NULLIFIES STRIKE ORDER

Officials of carpenters' local unions at Youngstown and Warren, Ohio, were recently ordered in a decree handed down by Federal Judge Jones, to rescind a strike order issued on August 10th. Carpenters working on the Mahoning National Bank at Youngstown and the Union Savings & Trust Co. at Warren for the Selden-Breck Construction Co., of St. Louis were ordered out on a sympathetic strike when the same concern building a hospital in New Orleans sub-let the erection of metal trim to a sub-contractor who employed metal lathers to do the work. The attorney for the Selden-Breck Co., in a brief filed with the court, cited a decision by Federal Judge Westenhaver on the Cleveland City Hospital, which was sustained by the United Circuit Court of Appeals last May to the effect that a contractor had the right to employ whomsoever he pleased in the erection of metal trim. The attorney for the carpenters in contending that the strike should have been called cited a resolution, adopted by the Master Builders Association of St. Louis, of which the Selden-Breck Co., is a member to the effect that carpenters would be employed exclusively in the erection of metal trim. The plaintiff declared that the resolution was not applicable to the jobs in question in that it covered work done in St. Louis only.

All-Western Road Show Plans Are Outlined—Many Exhibits Assured

Every visitor at the All-Western Road Show to be held in San Francisco, November 9th to 14th, will find a convention particularly interesting to him. There will be prominent speakers and discussions covering every department of roadbuilding in the following schedule of conventions:

Monday, November 9—Annual Convention of the Western Association of State Highway Officials.

Tuesday, November 10—Morning session—Western Construction Equipment Distributors' Convention; afternoon session—Good Roads Convention.

Wednesday, November 11—Convention of Western Supervisors and Road Commissioners.

Thursday, November 12—Convention of Western Contractors.

Friday, November 13—Morning session—Business meeting of Western Construction Equipment Distributors; afternoon session—Annual convention Pacific Coast Sand and Gravel Association.

Program Committees of each of these organizations have prepared programs which will be announced later.

There are no evening sessions scheduled except the general banquet which will take place on Friday evening, November 13. Ladies are invited on this occasion and short speeches and entertainment will accompany the dinner after which the banquet hall will be cleared for dancing.

The exhibits of roadbuilding machinery will be housed in five enormous tents and will occupy more than 125,000 square feet of solid exhibits. Out-

side of the tents about 15 acres of ground will be given over to working exhibits of excavating machinery, graders, sand and gravel equipment, together with special unique displays set up by Eastern manufacturers.

Visitors will therefore be able to examine, under the most favorable condition the latest models of machinery with which they are familiar in their every day work. Many advanced models which otherwise would be introduced to the trade for the first time at the annual show in Chicago in January, will be shipped to San Francisco for the examination of Western roadbuilders.

The hotel committee is receiving hundreds of applications from all parts of the country for reservations during show week. Many groups are coming to the show in special cars and the hotel committee is endeavoring to establish them as far as possible according to States.

Among the interesting exhibits will be that of the Bureau of Public Roads. It will take the form of a number of panels each devoted to one particular phase of highway engineering. Miniature trains and automobiles will run through the exhibit to bring home to visitors the relationship of transportation and highway building. Working models illustrating the results of research the Bureau has made in connection with Western roadbuilding problems will be demonstrated and this exhibit alone is worth the attendance of every Western roadbuilder.

Canons of Ethics For Architects

The following Canons are adopted by the American Institute of Architects as a general guide, yet the enumeration of particular duties should not be construed as a denial of the existence of others equally important although not specially mentioned. It should also be noted that the several sections indicate offenses of generally varying degrees of gravity.

It is unprofessional for an architect—

1. To engage directly or indirectly in any of the building or decorative trades.

2. To guarantee an estimate or contract by bond or otherwise.

3. To accept any commission or substantial service from a contractor or from any interested party other than the owner.

4. To take part in any competition which has not received the approval of the Institute or to continue to act as professional adviser after it has been determined that the program cannot be so drawn as to receive such approval.

5. To attempt in any way, except as a duly authorized competitor, to

secure work for which a competition is in progress.

6. To attempt to influence, either directly or indirectly, the award of a competition in which he is a competitor.

7. To accept the commission to do the work for which a competition has been instituted if he has acted in an advisory capacity, either in drawing the program or in making the award.

8. To injure falsely or maliciously directly or indirectly, the professional reputation, prospects or business of a fellow architect.

9. To undertake a commission while the claim for compensation, or damages, or both, of an architect previously employed and whose employment has been terminated remains unsatisfied, until such claim has been referred to arbitration or issue has been joined at law, or unless the architect previously employed neglects to press his claim.

10. To attempt to supplant a fellow architect after definite steps have been taken toward his employment, e. g., by submitting sketches for a project for which another architect has been authorized to submit sketches.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

Failure of Santa Barbara to promptly adopt adequate building regulations has already resulted in complaints that advantage is being taken of the situation to use inferior materials in reconstruction of buildings damaged or destroyed by the earthquake of June 29. This may surprise some persons, but it is the old, old story. As an architect aptly put it, "the owner seems always willing to 'take the chance,' because it is cheaper to gamble with the forces of Nature than to spend the money to build right." Perhaps the disposition to gamble is a little stronger because seismologists have said that Santa Barbara is now safe from earthquake than before the recent readjustment of the earth's crust in that vicinity. It is an old saying that lightning never strikes twice in the same place, but there have been exceptions to that rule and there may be exceptions to the theory that disastrous earthquakes occur in the same locality only at widely separated intervals.—S. W. Bldr. & Cont.

Reiterating charges that "there is too much politics and too little business in our present commission system of building highways," State Controller Ray L. Riley returned from a tour of Humboldt, Del Norte, and other northern counties. The state official believes the counties would be far better served in the matter of highways if the state highway commission members represented districts instead of the present plan of having three commissioners-at-large. "The northern counties are entitled to more improved highways," said Riley.

The annual report of Paul Scharrenberg, secretary of the State Federation of Labor, in convention at San Diego, contained a bitter attack upon Governor Richardson whom he charged with having vetoed 26 of union labor's bills passed at the last session of the legislature. He promised that "the reactionary tendencies of the present governor" would be given full airing in the coming campaign.

Plans are under way for the formation of a \$750,000 irrigation project by the ranchers of Berryessa Valley in Eastern Napa county. Plans call for a dam across Elicarra creek, a tributary of Putah Creek, at a point where the water may be conveyed by canal along the eastern side of the Valley. The cost of the system is estimated at \$75 per acre. Under the plan, 10,000 acres can be irrigated.

There has been an increase of more than 130 per cent in the number of people living in zoned cities and towns in the United States during the past four years. By the first of July of this year more than 26,000,000 people were living in 366 zoned municipalities, as against the less than 11,000,000 people in 48 cities and towns in September, 1921.

The El Dorado Irrigation District, near Placerville, was organized at a recent election. The district comprises 30,000 acres. Proceedings will be started at once for a bond election to finance the construction of irrigation works.

Gas engineers and gas men generally are watching with considerable interest the experiment of a small gas company in Sheridan, Wyo., which is using the local lignite deposits, which are mined adjacent to the city, for the manufacture of coal gas supplied to the residents and industries of Sheridan for heating and cooking purposes. This is believed to be the first time that lignite has ever been used successfully in coal gas manufacture to the entire exclusion of other materials, and if applicable to other gas companies, may result in untold economies by eliminating high freight rates and the necessity of using high-priced gas or cooking coal.

The Fresno City Board of Education has set November 10 as the date to vote bonds of \$1,800,000 to finance school improvements. The funds will be expended as follows: \$700,000 to erect new Alexander Hamilton Junior High School in north end and for sanitary improvements, additions, and alterations for other elementary schools. The remaining \$1,100,000 would be for new Theodore Roosevelt high school in East Fresno, and for additions and alterations to Edison Technical, Fresno High, Fresno Technical, Longfellow Junior High, and Washington Junior High Schools.

The E. B. and A. L. Stone Company has filed suit in Martinez against the Great Western Power Company, seeking to collect \$70,420 damages for alleged seizure of land by the power company. It is set forth in the complaint that the power company erected towers and power lines on land near Richmond owned by the plaintiff, in 1922, but that the plaintiff company did not become aware of the fact until June 16, 1925. The Stone company values the land at \$20,240, and seeks \$50,000 as damages.

Mrs. Peter Kramer, finance chairman of the Oakland Federation of Parent-Teachers Associations, is the prime mover in a proposal to erect a \$1,300,000 clubhouse for women in Oakland. The proposal has been approved by over six thousand women in the East Bay District.

Mohawk Oil Company of San Francisco has closed a deal for four acres of land on the Parr Terminal, Oakland, and plans erection of storage and distributing plant, mainly for gasoline. The first unit of the plant will cost \$250,000.

United States Fibre Company is reported to have purchased property on the Sacramento river near West Sacramento on which it is proposed to construct wharves, factory and storage buildings.

R. T. Stone, San Francisco and Auburn lumber mill operator, was shot to death from ambush at his Forest Hill Divide plant, 20 miles north of Auburn, Sept. 27.

The twenty-third annual convention of the Western Retail Lumbermen's Association will be held February 18-20, at Portland, Ore.

ALONG THE LINE

The Porterville city council has by unanimous vote passed a second measure calling for a city manager form of government. Provided an initiative petition is not invoked against the ordinance, the measure will become a law October 21st. Last Fall the city council passed the same ordinance and an initiative petition resulted in a special election, when the manager plan was defeated by a small vote. It is understood that a new initiative petition will be started against the latest action of the council, again bringing the matter to a vote.

J. A. Bryant, general contractor, who sought release from the Oakland Board of Education on his bid to erect the Daniel Webster School after discovering an error of \$10,000 in the bid, has been instructed by the school board to proceed with the contract or forfeit his guarantee check of \$5000.

Wm. Stranahan, former city commissioner of public works at Fresno, has been named as Fresno agent for the Northern Life Insurance Company of Seattle. He will maintain offices in the Mattel Bldg., Fresno, with L. E. Merman, district supervisor for the company.

The Modesto Chapter of the American Association of Engineers has submitted plans to the Modesto city council for the installation of an electrolux street lighting system for the business and residential districts. The system would cost approximately \$100,000.

R. H. Green, 432 Lincoln Ave., Alameda, has purchased property at the southwest corner of Twenty-fourth and Magnolia streets, Oakland, will erect a fireproof plant for the manufacture of special electrical equipment.

Southern California Chapter, Associated General contractors, has declared its purpose to co-operate with the Los Angeles Board of Public Works to the fullest extent in eliminating irresponsible contractors.

Bernard Maybeck, San Francisco architect, has been appointed on the civic development and design committee of the re-organized city planning commission of Berkeley.

Jacob Schwarz, 64, former Napa merchant and for several years associated with the H. Schwarz Hardware Company of Napa, died suddenly in that city, September 26.

Marin county, at a recent election, voted bonds of \$1,250,000 to finance construction of highways. The bonds carried by a vote of seven to one.

Plant of the Tweedy-Boulevard Lumber Company at Los Angeles suffers \$200,000 fire loss Sept. 22.

ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

HELPFUL SUGGESTIONS FOR BUSY MATERIAL DEALERS

When the phone rings, don't answer it. The chances are that it's the wrong number.

Refuse to bid on all jobs. Probably the contractor's just playing a joke on you, anyhow.

Don't send out bills at the end of the month. It's a waste of time and postage. Your customers won't pay until they're ready.

Don't advertise. You might sell out and have to go to the trouble of re-ordering.

Why not start a cash and carry system? Delivering expenses soon eat up the profits.

A help-yourself style of building material store might prove profitable. Let the people pick out their own supplies and pay you as they leave. Dispense with your sales force.

Don't see any salesmen. They might have a new idea or two that'll bring in more business and thereby cause more work to be done.

Dismiss your office force. Close up shop and go home. You won't have any salaries to pay.—(Blue Diamond Big Whang).

NEW EXCHANGE MEMBERS

The following firms were recently admitted to membership in the San Francisco Builders' Exchange: Ray Cook Marble Co., Marble Contractors, Foot of Powell St., Emeryville, Cal.; McWilliams & Marosky, Magnesite Composition and Fiber Tile Flooring, 55 New Montgomery St.; Blue Diamond Co., Building Materials, 1650 S. Alameda St., Los Angeles, Cal.; The Bishopric Co. of Calif., Mfrs. Stucco and Plaster Backing Stucco, 60 California St.; John C. Shipp Co., Investments, 315 Crocker Bldg.; American LaFrance Fire Engine Co. of Calif., Mfrs. Motor Trucks, 1434 Howard St.

Applications for membership have been filed by the following: Rodoni Becker Co., Plumbing & Heating; Pacific Electrical Construction Co., Electrical Contractors; E. J. Finnerty, Building Cleaning; Jesse Shay, Plastering; Arthur Minnick, Heating & Ventilating; Stoneson Bros. & Thornison, Home Builders; Fred Merrill & Son, Plasterers; Lindsay Constr. Co., Builders; Cement Gun Constr. Co., Contractors; Engineers & Cement Gun Work; The Hoosier Store, Built-in Fixtures; Geo. Arthur Gibbs, Teaming & Grading; Acme Gravel Co., Building Material.

MILLWORK INSTITUTE TO MEET IN OAKLAND

The second annual meeting of the Millwork Institute of California will be held at Oakland, Nov. 19 and 20. The annual football game between Stanford and University of California is scheduled for Nov. 21 and members of the Institute who expect to see this game are being urged to buy their tickets now so they may be assured of reservations.

NEED FOR UNIFORM WIRING CODE STRESSED AT MEET

Approval of a uniform electrical code for California cities was expressed and discussed at length at the closing session of the three-day convention of the California Association of Electrical Inspectors in the San Joaquin Power Building, Fresno, Sept. 28.

Construction and maintenance of electric signs, and proposed changes in laws governing the installation of electrical equipment in theatres as recommended by the Pacific Board of Fire Underwriters were the principal topic at the session of the association, with Herbert W. Stitt, Fresno Inspector, and J. M. Evans of Los Angeles, a representative of the underwriters, respectively, leading the discussions.

Stitt, R. W. Albright of Long Beach, president of the association, and F. A. Morrell of Stockton were appointed on a committee to act in an advisory capacity in connection with promulgation of a national electrical code.

ARCHITECTS-ENGINEERS MEET

R. A. Herold, Sacramento architect, was the principal speaker at the regular monthly meeting of the Architects and Engineers Club of Sacramento, held September 14, in the Building Material Exhibit, 910 Ninth street, Sacramento. His talk covered his views on construction seen during his trip to the East where he attended the convention of the American Institute of Architects. He also told of the Affiliated Architectural Exhibit in New York City.

A feature of the meeting was the discussion of a more modern building code for Sacramento. Committees will be appointed shortly to further this work.

GOOD STUFF

The Builders' Exchange of Santa Clara County carries a standing advertisement in the San Jose dailies which will prove business getters for members of the organization. The advertisement listed under the caption "Contractors and Builders," is reproduced herewith:

BUILDERS EXCHANGE OF SANTA CLARA COUNTY (INCORPORATED).

Reliable estimates and constructing by Builders who are at present constructing a large majority of the community's building.

Commercial Blue Printing
75 West San Antonio Street.

Phones S. J. 778 and 779.

W. L. HOWE, Exec. Sec'y. and Mgr.

INSPECTORS SEEK UNIFORM BUILDING CODE

Unification of building codes in cities on the Pacific Coast was urged here at the convention recently held in Seattle. Speakers on a uniform building code were H. E. Plummer of Portland, A. C. Horner of Stockton, and M. C. Woodruff of San Jose. Homer Hadley of Portland and G. C. Knecht of San Diego discussed earthquake proof construction methods.

SACRAMENTO BUILDERS' INSTITUTE HOLDS HOUSE WARMING

The Builders' Institute of Sacramento held a house warming on the evening of Sept. 16 with representatives of various Northern California exchanges in attendance.

Howard K. Johnson, president of the Institute and a director in the Sacramento Brick Company, presided. Following opening remarks, Mr. Johnson made some interesting remarks in regard to the organization and outlined its purposes.

Harold J. McCurry, president of the Sacramento Chamber of Commerce, spoke on the benefits of organization and W. C. Keating, president of the Sacramento Master Builders' Association, told of accomplishments that might be made due to united efforts. Wm. Mott, secretary of the Master Plumbers' Association, spoken on organization from the plumbers point of view.

Frank Williams, Sacramento real estate operator and builder, told of his travels through England, Ireland, France and other parts of Europe and spoke most entertainingly of building conditions in that section.

Harold Dixon, plumber and a director of the Sacramento Institute, spoke briefly on the policies of the organization. W. Laffer of the Sacramento Building Trades' Council made an interesting talk with regards to organized labor and the construction industry.

AIM TO ELIMINATE LABOR DISPUTES

In order that every one connected with the construction industry may become better acquainted with the aims, objects and accomplishments of the National Board for Jurisdictional Awards, the Board has called a conference which will be held in the American Federation of Labor Building, Washington, D. C., tomorrow (Tuesday, September 22). Rumors are current to the effect that the Board has failed in its purposes and that the cessation of its activities may be looked for at any time. These rumors are apparently being spread for the purpose of discrediting the work of the Board and impairing its influence for peace in the building industry.

Representatives of all of the international building trades unions the building trades department of the American Federation of Labor, and associations of contractors, architects and engineers will meet to work out ways and means of strengthening the influence of decisions reached in jurisdictional disputes.

Invitations have been issued to Secretary of Commerce Hoover and Secretary of Labor Davis to address the meeting and assist in formulating plans to have the decisions more generally accepted throughout the industry.

That the percentage of construction work planned by architects has advanced more than 30 per cent in the last 14 years in indicated by a report made to the American Institute of Architects.

Building News Section

APARTMENTS

Completing Plans—Ready for Bids in Six Weeks.
APARTMENTS Cost, \$80,000
 SAN FRANCISCO. Seventh Ave. and Geary Street.
 Five-story Class C apartment building.
 Owner—Ashbury Methodist Episcopal Church.
 Architect—Rollin S. Tuttle, 363 17th St., Oakland.

Contract Awarded.
APARTMENTS Cost, \$25,000
 SAN FRANCISCO. SW Parnassus and Woodland Aves.
 Three-story and basement frame (18) apartments.
 Owner—De Borde & Nordstrom.
 Architect—Baumann & Jose, 251 Kearny St., San Francisco.
 Contractor—Buschke & Brown, 604 Mission St., San Francisco.

To Be Done By Days Work
APARTMENT Cost, \$30,000
 SAN FRANCISCO. S. Post, 150 W. Divisadero St.
 Three-story and basement frame (20) apartments.
 Owner—Wm. Van Herick, 2508 Lake St., San Francisco.
 Architect—none.

Contract Awarded
APARTMENT HOUSE Cost, \$33,500
 SAN FRANCISCO. Green St. east of Polk.
 Three-story frame and stucco apartment house.
 Owner—Della E. Kilduff, 1200 Pine St., San Francisco.
 Architect—Walter C. Falch, Hearst Bldg., San Francisco.
 Contractor—Geo. H. Hansell, 349 10th Ave., San Francisco.

Ready for Segregated Figures Oct. 1st.
APARTMENTS Cost, \$65,000
 BERKELEY, Alameda Co., Cal. San Pablo Ave. near Delaware St.
 Three-story frame, stucco and brick veneer store and apartment building (8 stores and 24 2 and 3-room apts.)
 Owner—R. E. McManis.
 Architect—Leonard H. Ford, Coit Hotel Bldg., Oakland.

Concrete and Rough Carpentry Work Awarded—Sub-Figures being taken
APARTMENTS Cost, \$125,000
 SAN FRANCISCO. W Van Ness Ave. 55 N Green Street.
 Six-story and basement reinforced concrete Class C apartment house (41 2-room apartments)
 Owner—Calif. rnia Bldg. & Finance Co., De Young Bldg., San Francisco.
 Architect—J. C. Hadik, Monadnock Bldg., San Francisco.
 Supt. of Construction—C. F. Parker 251 Kearny Street.
Concrete and Rough Carpenter Work—Mission concrete Co.
 Bids for all other portions of the work are being taken by the owner and superintendent.

Heating and Plumbing Bids Being Taken. Steel and Grading Contracts Awarded.
APARTMENTS Cost, \$100,000
 SAN FRANCISCO. S Turk bet. Taylor and Jones Sts., S. F.
 Six-story and basement concrete apartment bldg.
 Owner—M. V. Brady, Monadnock Bldg., San Francisco.
 Architect—D. C. Coleman, 110 Sutter Street.
 Grading—To Sibley Grading & Teaming Co., 165 Landers St.
 Structural Steel—To Central Iron Works, 2050 Bryant St.
 Bids on other portions of the work will be taken shortly.

Contract Awarded.
APARTMENTS Cost, \$20,893
 SAN FRANCISCO. S Cervantes Blvd 130 W Avila.
 Two-story and basement frame (8) apartments.
 Owner—T. J. and Jane Webb, 1030 Franklin St., S. F.
 Architect—Richard R. Irvine, New Call Bldg., S. F.
 Contractor—E. A. Janssen, 41 Bernal Ave., S. F.

Sub-Figures Being Taken.
APARTMENTS Cost, \$60,000
 SAN FRANCISCO. S Eddy St. 137 W Franklin St.
 Three-story and basement frame (36) apartments.
 Owner—Hind Building Co., Inc., 609 French Bank Bldg., San Francisco.
 Architect—W. G. Hind, 110 Sutter St., San Francisco.

Sub-Contracts Awarded.
APARTMENTS Cost, \$80,000
 SAN FRANCISCO. Corner Geary and Divisadero Sts.
 Two-story and basement steel frame and reinforced concrete store and apartment building.
 Owner—Mrs. Margaret Richardson.
 Architect—Miller & Pfeiffer, Lick Bldg., San Francisco.
 Contractor—G. P. W. Jensen, 320 Market St., San Francisco.
Reinforcing Steel—Edw. L. Soule Co., Hialto Bldg., San Francisco.
Structural Steel—Western Iron Works 141 Beale St., San Francisco.
Excavating—Sibley Grading & Teaming Co., 165 Landers St., S. F.
Concrete Work—G. B. Le Lucci, 2 Sharp St., San Francisco.

Plans Complete.
ALTERATIONS Cost, \$11,500
 SAN FRANCISCO. NE Pine and Hyde Streets.
 Minor alterations; cement plaster exterior stores and apartments.
 Owner—B. J. Joseph (agent for owner.)
